NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS ENDED 30 JUNE 2004

1. General information

CSG Holding Co., Ltd. (the “Company”) was incorporated in 1984 in the People’s Republic of China (the “PRC”) as a joint venture enterprise under the laws of the PRC and was reorganised as a joint stock limited company in 1991.

The name of the Company was changed from CSG Technology Holding Co., Ltd. to CSG Holding Co., Ltd. in 2003.

The Company’s domestic shares (“A Shares”) and domestically listed foreign shares (“B Shares”) have been listed on the Shenzhen Stock Exchange since 1992.

The Company and its subsidiaries (the “Group”) are principally engaged in the manufacture and sales of glass and ceramics products and property development. The business activities of its subsidiaries are shown in Note 29.

The registered address of the Company is as follows:
CSG Building,
No. 1 of the 6th Industrial Road, Shekou,
Shenzhen, the PRC.

2. Accounting policies

The principal accounting policies adopted in the preparation of these consolidated financial statements are set out below:

A Basis of preparation

The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”). The consolidated financial statements have been prepared under the historical cost convention. This basis of accounting differs from that used in the statutory accounts of the Company and its main subsidiaries (the “PRC Accounts”) which are prepared in accordance with generally accepted accounting principles and relevant financial regulations applicable to enterprises in the PRC (“PRC GAAP”).

The preparation of financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management’s best knowledge of current events and actions, actual results ultimately may differ from those estimates.

2. Accounting policies (Continued)

B Group accounting

(1) Subsidiaries

Subsidiaries, which are those entities in which the Group has an interest of more than one half of the voting rights or otherwise has power to govern the financial and operating policies are consolidated.

The existence and effect of potential voting rights that are presently exercisable or presently convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are consolidated from the date on which control is transferred to the Group and are no longer consolidated from the date that control ceases. The purchase method of accounting is used to account for the acquisition of subsidiaries. The cost of an acquisition is measured as the fair value of the assets given up, shares issued or liabilities undertaken at the date of acquisition plus costs directly attributable to the acquisition. Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated; unrealised losses are also eliminated unless cost cannot be recovered. Where necessary, accounting policies of subsidiaries have been changed to ensure consistency with the policies adopted by the Group.

(2) Associates

Investments in associates are accounted for by the equity method of accounting. Under this method the Company's share of the post-acquisition profits or losses of associates is recognised in the income statement and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the cost of the investment. Associates are entities over which the Group generally has between 20% and 50% of the voting rights, or over which the Group has significant influence, but which it does not control. Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates; unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. The Group's investment in associates includes goodwill (net of accumulated amortisation) on acquisition. When the Group's share of losses in an associate equals or exceeds its interest in the associate, the Group does not recognise further losses, unless the Group has incurred obligations or made payments on behalf of the associates.

C Foreign currency translation

(1) Measurement currency

Items included in the financial statements of each entity in the Group are measured using the currency that best reflects the economic substance of the underlying events and circumstances relevant to that entity (the "measurement currency"). The consolidated financial statements are presented in Renminbi ("RMB"), which is the measurement currency of the Company.

2. Accounting policies (Continued)

C Foreign currency translation (Continued)

(2) Transactions and balances

Foreign currency transactions are translated into the measurement currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies, are recognised in the consolidated income statement, except when deferred in equity as qualifying cash flow hedges.

Translation differences on debt securities and other monetary financial assets measured at fair value are included in foreign exchange gains and losses. Translation differences on non-monetary items and available-for-sale investments are reported as part of the fair value gain or loss.

(3) Group companies

Income statements and cash flows of foreign entities are translated into the Group's reporting currency at average exchange rates for the year and their balance sheets are translated at the exchange rates ruling on 30 June. Exchange differences arising from the translation of the net investment in foreign entities are taken to shareholders' equity. When a foreign entity is sold, such exchange difference is recognised in the consolidated income statement as part of the gain or loss on sale.

D Property, plant and equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and impairment, if any. Cost includes transfers from equity of any gains/losses on qualifying cash flow hedges of currency purchase costs.

Depreciation is calculated on the straight-line method to write off the cost amount of each asset to their residual values over their estimated useful lives as follows:

Buildings	20 - 35 years
Machinery and equipment	10 - 20 years
Vehicles and others	8 - 10 years

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are included in operating profit.

Interest costs on borrowings to finance the construction of property, plant and equipment are capitalised during the period of time that is required to complete and prepare the asset for its intended use. Other borrowing costs are expensed.

Repairs and maintenance are charged to the income statement during the financial period in which they are incurred. The cost of major renovations is included in the carrying amount of the asset when it is probable that future economic benefits in excess of the originally assessed standard of performance of the existing asset will flow to the Group. Major renovations are depreciated over the remaining useful life of the related asset.

2. Accounting policies (Continued)

E Construction-in-progress

Construction-in-progress represents plant and properties under construction and is stated at cost. This includes cost of construction, plant and equipment and other direct costs, including transfers from equity of any gains or losses on qualifying cash flow hedges of currency purchase costs. Construction-in-progress is not depreciated until such time as the relevant assets are completed and put into its intended use.

F Land use rights

Land use rights are stated at cost less accumulated amortisation. Land use rights are amortised over their lease terms using the straight-line method.

G Intangible assets

i. Computer software

The cost of acquisition of new software is capitalised and treated as an intangible asset if these costs are not an integral part of the related hardware and will probably generate economic benefits exceeding cost beyond one year. Software is amortised on a straight-line basis over a period of 5 to 10 years.

ii. Patents and licenses

Expenditure to acquire patents and licenses is capitalised and amortised on a straight-line basis over the expected useful lives of not more than 15 years.

iii. Negative goodwill

Negative goodwill represents the excess of the fair value of the Group's share of the net assets of the acquired subsidiary/associate at the date of acquisition over the cost of an acquisition. Negative goodwill is recognised in the consolidated income statement as follows:

- (a) to the extent that negative goodwill relates to expected future losses and expenses that are identified in the Group's plan for the acquisition and can be measured reliably but which cannot be accrued for at the date of acquisition, that portion of negative goodwill is recognised as income when the future losses and expenses are recognised.
- (b) the amount of negative goodwill not exceeding the fair values of acquired identifiable non-monetary assets is recognised as income on a systematic basis over the remaining weighted average useful life of the identifiable acquired depreciable assets.
- (c) the amount of negative goodwill in excess of the fair values of acquired identifiable non-monetary assets is recognised as income immediately.

Negative goodwill is presented as a deduction from intangible assets. Amortisation of negative goodwill is offset against administrative expenses in the consolidated income statement.

2. Accounting policies (Continued)

H Impairment of long lived assets

Property, plant and equipment, construction-in-progress and other non-current assets, including intangible assets are reviewed for impairment losses whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of the asset exceeds its recoverable amount which is the higher of an asset's net selling price and value in use. For the purposes of assessing impairment, assets are grouped at the lowest level for which there are separately identifiable cash flows.

I Investments

The Group classified its investments in debt and equity securities into the following categories: trading, held-to-maturity and available-for-sale. The classification is dependent on the purpose for which the investments were acquired. Management determines the classification of its investments at the time of the purchase and re-evaluates such designation on a regular basis. Investments that are acquired principally for the purpose of generating a profit from short-term fluctuations in price are classified as trading investments and included in current assets; for the purpose of these financial statements short term is defined as three months. Investments with a fixed maturity that management has the intent and ability to hold to maturity are classified as held-to-maturity and are included in non-current assets, except for maturities within 12 months from the balance sheet date which are classified as current assets; during the year the Group did not hold any investments in this category. Investments intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, are classified as available-for-sale; and are included in non-current assets unless management has the express intention of holding the investment for less than 12 months from the balance sheet date or unless they will need to be sold to raise operating capital, in which case they are included in current assets.

Purchases and sales of investments are recognised on the trade date, which is the date that the Group commits to purchase or sell the asset. Cost of purchase includes transaction costs. Trading and available-for-sale investments are subsequently carried at fair value. Held-to-maturity investments are carried at amortised cost using the effective yield method. Realised and unrealised gains and losses arising from changes in the fair value of trading investments and of available-for-sale investments are included in the income statement in the period in which they arise.

The fair value of investments are based on quoted bid prices or amounts derived from cash flow models. Fair values for unlisted equity securities are estimated using applicable price/earnings or price/cash flow ratios refined to reflect the specific circumstances of the issuer. Equity securities for which fair values cannot be measured reliably are recognised at cost less impairment. When securities classified as available-for-sale are sold or impaired, the accumulated fair value adjustments are included in the income statement as gains and losses from investment securities.

J Operating leases

Leases where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the consolidated income statement on a straight-line basis over the period of the lease.

Assets leased out under operating leases are included in property, plant and equipment in the consolidated balance sheet. They are depreciated over their expected useful lives on a basis consistent with similar owned property, plant and equipment. Rental income (net of any incentives given to lessees) is recognised on a straight-line basis over the lease term.

2. Accounting policies (Continued)

K Inventories

Inventories are stated at the lower of cost or net realisable value. Cost is determined using the weighted average method. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads (based on normal operating capacity) but excludes borrowing costs. Net realisable value is the estimated selling price in the ordinary course of business, less the costs of completion and selling expenses.

L Properties held for sale

Properties held for sale are stated at the lower of cost or net realisable value. Cost of properties held for sale comprises cost and interest of borrowings for the purpose of financing the construction for the period prior to their being in a condition to enter into service. Net realisable value is calculated based on the estimated selling price less all further costs of construction and the related marketing expenses.

M Trade receivables

Trade receivables are carried at original invoice amount less provision made for impairment of these receivables. A provision for impairment of trade receivables is established when there is an objective evidence that the Group will not be able to collect all amounts due according to the original terms of receivables. The amount of the provision is the difference between the carrying amount and the recoverable amount, being the present value of expected cash flows, discounted at the market rate of interest for similar borrowers.

N Cash and cash equivalents

Cash and cash equivalents are carried in the consolidated balance sheet at cost. For the purposes of the consolidated cash flow statement, cash and cash equivalents comprise cash on hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdraft.

O Borrowings

Borrowings are recognised initially at the proceeds received, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost using the effective yield method; any difference between proceeds (net of transaction costs) and the redemption value is recognised in the consolidated income statement over the period of the borrowings.

P Deferred income taxes

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Currently enacted tax rates are used in the determination of deferred income tax.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

2. Accounting policies (Continued)

Q Employee benefits

(1) Pension schemes

The Group participates in defined contribution retirement schemes organised by the respective municipal governments where the Group operates. The Group has no obligation beyond the contribution which are calculated based on certain percentage of basic salary set by the provincial government. The Group's contribution to the defined contribution retirement schemes are charged to the consolidated income statement when incurred.

(2) Bonus plans

A liability for employee benefits in the form of bonus plans is recognised in other provisions when there is no realistic alternative but to settle the liability and at least one of the following conditions is met:

- there is a formal plan and the amounts to be paid are determined before the time of issuing the consolidated financial statements; or
- past practice has created a valid expectation by employees that they will receive a bonus and the amount can be determined before the time of issuing the consolidated financial statements.

Liabilities for bonus plans are expected to be settled within 12 months and are measured at the amounts expected to be paid when they are settled.

R Revenue recognition

Revenue is recognised when it is probable that the economic benefit associated with the transaction will flow to the Group and the amount of the revenue can be measured reliably. Revenue is recognised on the following basis:

Revenue from the sale of goods is recognised when significant risks and rewards of ownership of the goods are transferred to the buyer.

Revenue from sale of properties is recognised when the significant risks and rewards of ownership of the properties have been transferred to customers and the bill of settlement has been submitted and confirmed by customers.

Revenue from rendering of services is recognised based on the stage of completion determined by reference to services performed to date as a percentage of total services to be preformed.

Interest income is recognised on a time proportion basis, taking account of the principal outstanding and the effective rate over the period to maturity, when it is determined that such income will accrue to the Group.

S Government subsidies

Subsidies from the government are recognised at their fair value where there is a reasonable assurance that the subsidies will be received and the Group will comply with all attached conditions.

Government grants relating to costs are deferred and recognised in the income statement over the period necessary to match them with the costs they are intended to compensate.

2. Accounting policies (Continued)

T Dividends

Dividends are recorded in the Group's consolidated financial statements in the period in which they are approved by the Group's shareholders.

U Segment reporting

Business segments provide products or services that are subject to risks and returns that are different from those of other business segments. Geographical segments provide products or services within a particular economic environment that is subject to risks and returns that are different from those of components operating in other economic environments.

V Comparatives

Where necessary, comparative figures have been adjusted to conform to changes in presentation in the current year.

W Financial assets and liabilities

Financial assets and financial liabilities carried on the balance sheet include cash and bank balances, investments, trade receivables, other receivables and prepayments, trade and other payables and borrowings. Investments, trade receivables and borrowings are stated at carrying amounts determined in accordance with Notes 2(I), 2(M) and 2(O) respectively. Other financial assets and financial liabilities are stated at cost.

3. Financial risk management

A Credit risk

The carrying amount of cash and cash equivalents and trade receivables represented the Group's maximum exposure to credit risk in relation to these financial assets.

Cash is placed with reputable banks in the PRC. Majority of the Group's trade receivables relate to sales of goods to third party customers. The Group performs ongoing credit evaluations of its customers' financial condition and generally does not require collateral on trade receivables. The Group maintains a provision for doubtful debts and actual losses have been within management's expectation.

No other financial assets carry a significant exposure to credit risk.

B Currency risk

Substantially all of the revenue-generating operations of the Group are transacted in Renminbi, which is not freely convertible into foreign currencies.

The Group hedges the foreign currency exposure of its contract commitments to purchase certain plant and equipment payable in Euro. The forward contracts used in its programme mature in twelve months or less, consistent with the related purchase commitments.

3. Financial risk management (Continued)

C Interest rate risk

The Group has no significant interest-bearing assets but borrowed substantial amount of short-term loans from banks at fixed rates.

D Fair values

The carrying amounts of the following financial assets and liabilities approximate to their fair values: bank balances and cash, investments, trade receivables and payables, other receivables and payables, short-term borrowings and long-term borrowings.

Fair value estimates are made at a specific point in time and are based on relevant market information. These estimates are subjective in nature and involved uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in valuation methods and assumptions could significantly affect the estimates.

E Accounting for derivative financial instruments and hedging activities

The Group designates hedges of firm commitments to purchase certain plant and equipment as cash flow hedges which are initially recognised in the balance sheet at cost and subsequently are remeasured at their fair value. Changes in the fair value of hedge that are highly effective, are recognised in equity. Where the firm commitments result in the recognition of an asset or of a liability, the gains and losses previously deferred in equity are transferred from equity and included in the initial measurement of the cost of the asset. Otherwise, amounts deferred in equity are transferred to the income statement and classified as revenue or expense in the same periods during which the hedged firm commitment affects the income statement.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting under IAS 39, any cumulative gain or loss existing in equity at that time remains in equity and is recognised when the committed transaction is ultimately recognised in the income statement. When a committed transaction is no longer expected to occur, the cumulative gain or loss that was reported in equity is immediately transferred to the income statement.

The Group documents at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. This process includes linking all hedges to specific firm commitments. The Group also documents its assessment, both at the hedge inception and on an ongoing basis, of whether the hedge are highly effective in offsetting changes in cash flows of hedged items.

The fair values of hedge of firm commitment to purchase plant and equipment are included in the ending balance of the account of other receivables and prepayments.

4. Sales

(a) Business segment

Sales, as disclosed net of applicable business tax and value-added tax, comprise:

	Jan.~Jun. 2004	Jan.~Jun. 2003
	RMB'000	RMB'000
Sales of glass products	745,644	519,445
Sales of ceramics products	28,648	20,935
Sales of properties	64,443	17,465
Glass installation service revenue	11,512	15,152
	<u>850,247</u>	<u>572,997</u>

(b) Geographical segment

The Group's activities are carried out and assets are located predominantly in the PRC.

Sales by locations of customers, are analysed as follows:

	Jan.~Jun. 2004	Jan.~Jun. 2003
	RMB'000	RMB'000
PRC	634,141	370,315
United States	19,497	27,066
Australia	18,803	14,130
Others	177,806	161,486
	<u>850,247</u>	<u>572,997</u>

5. Earnings per share

Basic earnings per share amount is calculated by dividing the net profit attributable to shareholders by the weighted average number of ordinary shares in issue during the year.

	30 June 2004	30 June 2004
Net profit attributable to shareholders (RMB)	187,624,000	92,512,000
Weighted average number of ordinary shares in issue (Number)	676,975,000	676,975,000
Basic earnings per share (RMB per share)	<u>0.28</u>	<u>0.14</u>

The Company has no dilutive potential shares and diluted earnings per share amount is not presented.

6. Property, plant and equipment

	Buildings	Machinery and equipment	Vehicles and others	Total
	RMB'000	RMB'000	RMB'000	RMB'000
Cost				
31 December 2003	547,054	2,054,864	138,960	2,740,878
Increase in repord period	108,658	297,716	7,992	414,366
Decrease in repord period	(390)	(3,339)	(1,824)	(5,552)
30 June 2004	<u>655,323</u>	<u>2,349,241</u>	<u>145,128</u>	<u>3,149,692</u>
Accumulated depreciation

Net book amount	<u>89,544</u>	<u>91,283</u>

Land use rights comprise fees paid for acquiring the rights to use the land where the Group's factory buildings are located.

Payments for land use rights represent prepaid lease payments for the land and are recognised as an expense on a straight-line basis over the period of use of the rights ranging from 27 to 50 years. The period of use of a land use right is the land use period granted according to the land use right certificate. As of 30 June 2004, the Group had no significant future lease payment obligations in respect of the above land use rights.
