3.4 Warning of the estimate that the accumulated net profits from the beginning of the year to the end of the next reporting period will be negative or will change significantly comparing with the same period of the previous year, and description of reasons

☒ Applicable ☐ N/A

Though the COVID-19 epidemic has been effectively controlled in China, it still spreads all over the world in a tendency far from optimistic, which has greatly affected the worldwide economy and industry. Due to the impact of this epidemic, businesses in the movie industry where the Company's

cinema light source lease service belongs have also suspended, causing the Company's shutdown of its cinema projector light source lease service business, hence the Company's income from cinema projector light source lease service has been directly affected. Meanwhile, the shrink of consumption demand as the result of the macro environment has also affected the Company's other businesses to a certain extent. As GDC invested by the Company belongs to the cinema projection equipment industry, it is also affected by the discontinued operation of cinemas, so that it may fail to achieve the expected results, which will increase the Company's external investment risks. Therefore, the Company is exposed to the risk that the Company's performance from the beginning of the year to the end of the next reporting period will be significantly lower than that of the same period of the previous year.
