ABOUT THIS REPORT (continued)

Reporting Boundary and Period

This report discloses environmental and social performance of the Group for the financial year from 1 January 2021 to 31 December 2021 (“the Year”). This report covers the Group’s 8 major operation groups, including 1 in Hong Kong, 1 in Taizhou, China and 6 in Europe. These entities are 100% owned by the Group, with a processing capacity of over 10,000 tonnes per month. As compared to 2020, our operation in the United States has been excluded from the reporting boundary for 2021 because the operation scale of the United States business has narrowed down and did not meet the minimum reporting criteria after the divestments of non-performing business during the Year. The Group continually improves its data collection and expands its reporting boundary when appropriate. There have been no significant changes in the Group’s organisational structure or significant data restatement during the Year.

Feedback

Your thoughts and feedback on the report are appreciated for ongoing improvement of the Group’s ESG performance. Please feel free to contact us.

報告範圍及期間

本報告披露本集團截至二零二一年一月一日至二零二一年十二月三十一日止財政年度（「本年度」）在環境及社會方面的表現。本報告涵蓋本集團的八個主要營運集團，包括香港一個、中國台州一個及歐洲六個。本集團全資擁有該等實體，其加工能力每月超過10,000噸。相比二零二零年，在美國的營運不納入二零二一年的報告範圍，原因是美國業務的營運規模於本年度剝離不良業務後縮減，未達到最低的匯報標準。本集團持續改進數據收集方法並適時擴大報告範圍。於本年度，本集團組織架構概無重大變動，亦無任何重大數據重述。

Environmental, Social and Governance Report 2021 二零二一年環境、社會及管治報告

MESSAGE FROM CHAIRMAN

2021 was another challenging year for corporates and businesses across the globe. In the second year of the COVID-19 outbreak, the pervasive impact of the biggest pandemic in a century was continually felt in every area of the global economy. Yet, thanks to the unwavering dedication of our staff worldwide and the tremendous support given by our business partners, Chiho has not only weathered the storm, but has grown even stronger, delivering a remarkable set of annual results to our shareholders.

As the Chairman of Chiho, I am acutely aware of our obligations to strengthen our business and keep our pledges to investors, but our business value goes beyond purely delivering strong earnings. Chiho has always held a long-term vision of becoming the most desired circular economy solution partner and this vision has been empowered further by carbon neutral goals across the globe, in particular at China. Hence in 2021, we continued to make substantial efforts in improving not only our business and ESG performance, but also contributing to the sustainability ambitions of ecosystem globally. Our efforts include:

- Processed 4.3 million tonnes of scrap metal worldwide, which reduced carbon emissions by about 7.8 million tonnes after equivalent conversion.
 - The recycled steel processed had saved 72% of energy consumption per tonne, which reduced carbon emissions by more than 65% after equivalent conversion.
 - The recycled aluminum processed had saved 94% of energy consumption per tonne, which reduced carbon emissions by more than 85% after equivalent conversion.

主席致辭

對於全球的企業而言，二零二一年又是極具挑戰的一年。在新冠疫情爆發的第二年，全球各地的經濟仍然受到百年來規模最大的疫情的持續衝擊。但幸運的是，在全球各地員工的堅毅努力以及業務夥伴的巨大支持之下，齊合環保渡過風暴的洗禮，且愈加強大，為股東創造了非凡的年度業績。

作為齊合環保董事會的主席，我深切意識到我們有責任加強業務、信守對於投資者的承諾，但我們的企業價值不僅僅是創造豐厚的盈利。齊合環保一直堅守成為最理想的循環經濟解決方案合作夥伴的長期願景，而這一願景更是得到全球（尤其是中國）碳中和目標的賦能。因此，在二零二一年，我們繼續致力提升業務與環境、社會及管治表現，及為全球生態可持續發展的願望作出貢獻。我們所作的努力包括：

- 在全球加工4,300,000噸再生金屬，減少碳排放7,800,000噸（經等量轉換）。
 - 經處理的回收鋼材每噸節省72%能源消耗，減少碳排放65%以上（經等量轉換）。
 - 經處理的回收鋁材每噸節省94%能源消耗，減少碳排放85%以上（經等量轉換）。

MESSAGE FROM CHAIRMAN (continued)

- Further enhanced our own proprietary technology that enables Chiho to transform 97% of end-of-life vehicles and 99% of fine grained residuals into new high quality products for industrial use in a way that far exceeds even the strictest European Union targets.
- Established a new industrial recycling facility in Binzhou, China, with China's largest aluminum producer, China Hongqiao Ltd. ("Hongqiao"), as well as investing in an end-of-life vehicles and electric vehicle battery recycling facility in Taizhou, China. Both facilities with combined processing capacities up to 150,000 tonnes of end-of-life vehicles and mixed metals, 10,000 tonnes of electric vehicle batteries and 500,000 tonnes of secondary aluminum.

In addition to our core ESG initiatives, we also continued to address material ESG concerns related to energy supply and waste materials. Chiho has significantly reduced its reliance on certain hydraulic oils in Europe, and increased our use of light-emitting diode ("LED") lighting and photovoltaic systems in the region. Our water conservation program pioneered in Taizhou, China, has demonstrated the effectiveness of water usage monitoring and has encouraged saving habits among our staff. The site's entire water needs are supplied by rainwater reservoirs. In 2021, we have completed the construction of the largest stand-alone solar power generation system in Hong Kong. Our operating sites in Europe have also started to obtain electricity from renewable energy sources.

On the waste management front, we have overhauled our supply chain selection, evaluation and management processes, with a strong emphasis on ensuring waste materials are properly handled. In addition, we have adopted strict environmental management systems under the ISO 14001 and ISO 50001 certifications and worked relentlessly in exploring and adopting cost-effective practices to boost energy efficiency and reduce emissions from our vehicle fleet while keeping air pollutants, effluents and noise levels to the minimum. We are committed to ensuring all of our operations and subsidiaries comply with relevant environmental laws and regulations in the locations where we operate.

主席致辭 (續)

- 進一步提升專有技術，達到齊合環保可將97%的報廢汽車及99%的細粒殘留物轉化為新的可用於工業用途的高質量產品的水平，甚至遠超歐盟最嚴格的目標。
- 與中國最大的鋁生產商中國宏橋有限公司（「宏橋」）合作，在中國濱州建立全新的工業循環設施，並於中國台州自設新報廢汽車及動力鋰電池回收設施。兩地設施的加工能力合計最高為150,000噸報廢汽車及混合金屬、10,000噸動力鋰電池及500,000噸再生鋁。

除了實施環境、社會及管治核心計劃，我們亦持續解決與能源供應及廢料有關的重要環境、社會及管治議題。在歐洲，齊合環保已大幅減少對使用液壓油的依賴，並增加了該地域發光二極管（「LED」）照明裝置及光伏系統的使用。在中國台州推行的節水計劃在監控用水量方面成效顯著，並鼓勵員工養成節水習慣。該工場的全部用水需求目前完全由雨水收集庫供應。於二零二一年，我們完成香港最大的單一太陽能發電系統的建設；歐洲的營運工場亦開始使用可再生能源產生的電力。

在廢棄物管理方面，我們全面檢視並修訂供應鏈挑選、評估及管理流程，尤其注重妥善處理廢料。此外，我們採用了ISO 14001及ISO 50001認證下的嚴格環境管理體系，並不遺餘力地探索及應用具有成本效益的措施，以提高能源效率及減少車隊的排放，同時將空氣污染物、污水及噪音水平保持在最低水平。我們努力確保所有業務及附屬公司均遵守營運所在地的相關環境法律法規。

MESSAGE FROM CHAIRMAN (continued)

The nature of our business creates both positive environmental and social impacts on global citizens as we endeavor to promote a circular economy model where the world is less dependent on natural resources, thus preventing natural resource exhaustion. We are also committed to fostering the development of low-carbon economy by minimizing energy consumption and emissions, with an ultimate goal to help solving some of the world's most pressing issues like global warming. While we continue to promote the implementation of long-term and comprehensive plans that aim at creating more sustainable and better living environment, as a responsible corporate, we are also committed to giving back to local communities in the aspects of culture, education, health and sports.

Last but not least, we have carried out significant measures to enhance our corporate governance in the past year, upholding our core values of integrity, reliability and trust that underpin our success and operation stability. A management change has also been implemented, and as a result, the Board and I firmly believe that with the new management team onboard, we will be in a stronger position to make significant progress and grow even further. I have full confidence that our global recycling business will continue to perform exceptionally in this carbon neutral era. I would like to take this opportunity to thank all of our staff worldwide for their loyalty, dedication, continuous efforts and valuable contributions, and also to our customers and partners for their unwavering support and trust. I look forward to continuing to work closely with all of you to build a better and a more sustainable future together.

Environmental, Social and Governance Report 2021 二零二一年環境、社會及管治報告

ENVIRONMENTAL STEWARDSHIP

As Chiho, we make continuous contribution to the establishment of a circular economy, enabling other companies to benefit from our processed metal scraps products. By doing so, we help companies avoid generating millions of tons of carbon emissions that would otherwise result each year from their having to solely rely on primary raw materials.

Our commitments and programs as described above contribute to:

Target 12.4, 12.5 – Achieve the environmentally sound management of chemicals and all wastes throughout their life cycles, as well as substantial reduction in waste through recycling and reuse
目標12.4、12.5 – 在化學品及所有廢棄物的整個生命週期中實現無害環境管理，並通過回收及再利用大幅減少廢棄物

Target 13.3 – Improve human and institutional capacity on climate change mitigation
目標13.3 – 增強人類及機構在減緩氣候變化方面的能力

環境管理

齊合環保為構建循環經濟堅持不懈地努力，提供經處理的再生金屬產品予其他企業，幫助其他企業減少每年因依賴主要原材料而產生的數百萬噸碳排放。

我們的上述承諾及計劃有助於實現：

Recycling Business Development

While most countries across the globe have begun to recover from the pandemic in 2021, new opportunities are emerging for recycling business because of the economic recovery as well as the global trend shifting towards a more sustainable development pathway. We are confident of capturing these new opportunities.

Since the lifting of the lockdowns, our European operations have performed consistently well. We saw an increase in sales of ferrous products in Europe over the same period. We expect our core business in Europe to continue to grow. Our Germany operations will continue to function as the research and development hub to support other operations across regions with expertise in recycling technology, while our operations in the North America will be leaner and more focused on achieving higher overall efficiency.

Our Value Chain

The Group operates over 200 recycling yards or processing facilities around the world, with recycling capacities of approximately 4.8 million tons of scrap metals each year. We collect, process, and refine non-ferrous and ferrous scrap metals, end-of-life vehicles, waste electrical and electronic equipment, wasted oil and Zorba, and turn them into recycled iron, recycled aluminum and recycled copper, which will then be sold as industrial materials for further production.

回收業務發展

二零二一年開始，全球各國從新冠疫情中復甦，經濟得以復甦，加上全球趨向更注重可持續性發展，為回收再造業帶來新機遇。我們有信心能夠抓緊此等新機遇。

自封鎖政策取消以來，歐洲的業務一直表現良好，同期歐洲的黑色金屬產品銷售錄得增長。我們預計在歐洲的核心業務將持續增長。德國的營運將繼續作為集團的研發中心，以其回收再造科技專長支持其他地區的業務營運；北美洲的營運將更精簡、更注重提升整體效益。

我們的價值鏈

本集團在全球經營超過200個回收工場或處理工場，回收能力約為每年4,800,000噸再生金屬廢料。我們回收、處理及精煉有色及黑色金屬廢料、報廢汽車、廢電器電子產品、廢油及破碎鋁料(Zorba)，將其變為再生鐵、再生鋁及再生銅，作為用於再生產的工業材料出售。

Stable Upstream Materials 穩定的上游材料供應

- We keep strengthening procurement network with established and developed suppliers network across the globe, enabling us to obtain stable supplies of materials and ensure better control of the supply chain. See "Engaging Our Suppliers".

我們不斷加強與全球成熟及知名的供應商的採購關係，保證我們獲得穩定的材料供應，並確保更有效地管控供應鏈。請參閱「管理供應商」。

Mid-stream Processing 中游加工

- We handle dismantling, demolition and separation of mixed metal scrap such as motor scrap, end-of-life vehicles and electric wire into their respective metal constituents, comprising mainly copper scrap, steel scrap, aluminium scrap and iron scrap. See "Our Recycling Business".
- 我們將混合金屬廢料(如廢電機、報廢汽車及電線)拆解、拆除及分拆成相關的金屬成分，主要為再生銅、再生鋼、再生鋁及再生鐵。請參閱「我們的回收業務」。

Down-stream Processing 下游加工

- The recycled metals are then sold as industrial materials for further production. See "Product Responsibility".
- 再生金屬作為用於再生產的工業材料出售。請參閱「產品責任」。

Environmental, Social and Governance Report 2021

二零二一年環境、社會及管治報告

Our Asian operations have shown great improvement compared to last year. Southeast Asian operations have been focusing on the profitable e-motor recycling business since we shifted the operations from China to Southeast Asia in 2019. The region maintained stable growth as we ramped up operations in Malaysia, India and Thailand by sending skilled supervisors and personnel to these markets from February 2021 onwards. Our operations in Southeast Asia will continue to expand and play a more important role in supporting our Chinese business.

In 2021, we heavily invested in our business operations in China, one of our key growth markets in the coming years. The Chinese government stated in its 14th Five-Year Plan that a circular economy would be a priority for the country's future development. The favourable policies and active discussions on achieving carbon neutrality have offered immediate growth opportunities for us. As a leading player in the recycling business, we made a head start by collaborating with China's largest aluminum producer, Hongqiao, to establish a new industrial recycling facility in Binzhou, China, as well as investing in a new end-of-life vehicle and electric vehicle battery recycling facility in Taizhou, China. Both facilities are expected to bring tremendous, long-term revenue growth to the Group.

In Europe, as the demand for the safe and efficient recycling of electric vehicle batteries continues to grow, we will further strengthen our technology and capacity to fulfill the market need.

與上一年度相比，我們在亞洲的業務顯著增長。自二零一九年業務從中國轉移至東南亞以來，東南亞的業務一直專注於發展較高利潤的電機回收業務。從二零二一年二月起，我們派遣資深的主管及技工到馬來西亞、印度及泰國，以加強當地的業務營運，保持穩定增長。我們將繼續擴大在東南亞的業務，使其在支持中國的業務中發揮更重要的作用。

於二零二一年，我們加強對中國的業務投資。中國是我們未來數年的主要增長市場之一。中國政府於「十四五」規劃中指出，循環經濟將是國家未來發展的重點。有關實現碳中和的有利政策及熱切討論為我們提供了直接的增長機遇。作為全球領先的回收公司，我們率先與中國最大的鋁生產商宏橋合作，在中國濱州建立全新的工業循環設施，並於中國台州自設新報廢汽車及動力鋰電池回收設施，預期此兩項投資將為本集團帶來巨大的長期收益增長。

在歐洲，對安全高效地回收動力鋰電池的需求持續增加，我們將進一步鞏固我們的技術和能力，以滿足市場需求。

Tackling Climate Change

The Group recognises that climate change impacts its operations. The risks that climate change may bring to the Group include physical risks such as extreme weather events and sea level rise and transition risks such as the enactment of laws and regulations related to climate change.

Chiho is committed to mitigating climate change and managing impacts on its recycling business. We have established a Climate Change Policy which outlines the management approaches Chiho takes to tackle climate change. This policy lists adaptation and mitigation measures which apply to all business units of the Group.

應對氣候變化

本集團深切意識到氣候變化會影響業務營運。氣候變化致使本集團面臨的風險包括實體風險(如極端天氣及海平面上升)及過渡風險(如有關氣候變化的法律法規的實施)。

齊合環保一直致力於減輕氣候變化、管理氣候變化對於回收業務的影響。我們已制定氣候變化政策，該政策明確齊合環保為應對氣候變化應採取的管理對策，列舉適用於本集團所有業務實體的適應和減緩措施。

Mitigation 減緩措施

- Comply with applicable laws and regulations regarding carbon emissions at jurisdictions where the Company's operations are based
遵守本公司營運所在司法管轄區有關碳排放的適用法律法規
- Reduce carbon emissions by establishment and implementation of reduction targets
設定及實施減排目標，以減少碳排放
- Ensure high quality in Greenhouse gas (GHG) emissions data collection, calculation and documentation
確保高質量的溫室氣體排放數據收集、計算及記錄
- Favouring low-carbon technologies in facilities and operations
在工場設施及業務營運中運用低碳技術
- Adopt environmentally responsible procurement processes, such as selecting environmentally friendly raw materials and equipment
採用對環境負責的採購流程，如優先選擇環境友好型原材料及設備
- Encourage suppliers to reduce carbon emissions in their daily operations when practicable
鼓勵供應商在實際可行的情況下減少日常業務營運中的碳排放

Adaptation 適應措施

- Evaluate and analyse climate risks to business and take advantage of opportunities that may arise
評估及分析企業可能面臨的氣候風險，並有效利用可能出現的機會
- Address climate-related risks as part of the risk management process by adoption of mitigation measures
採取減緩措施，將氣候相關風險納入風險管理流程
- Incorporate climate change and extreme weather events into business operation and continuity plans, establish contingency measures that are monitored and reviewed regularly to prevent or minimise potential damage
將氣候變化及極端天氣納入業務營運及持續經營計劃之中，制定應急反應措施，並定期監測及檢討該等措施，以防止或減少潛在的損失

Environmental, Social and Governance Report 2021 二零二一年環境、社會及管治報告

We review this climate policy from time to time as appropriate. In the future, we will further promote various energy saving and emission reduction measures to gradually achieve a strategy consistent with industry best practices, thereby mitigating the impact of climate change on our business.

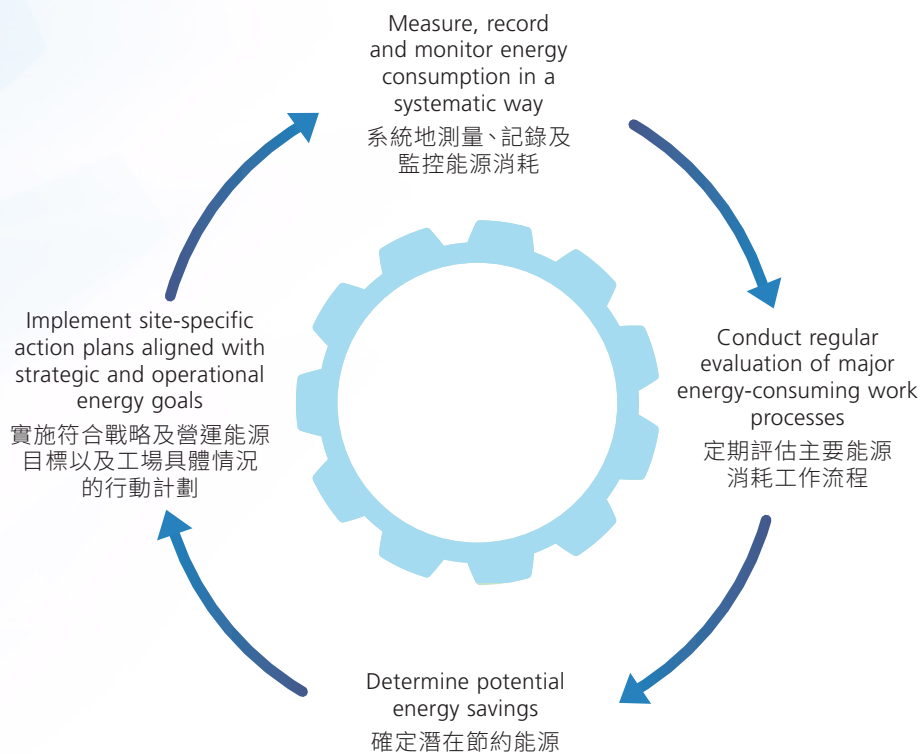

Energy & Carbon Emissions

The Group continuously enhances its energy management and explores energy saving opportunities. Our operations in Europe and North America have ISO 50001 certification in place for energy management systems and are internally audited on a regular basis.

我們適時檢討此氣候政策。未來，我們將進一步推行多項節能減排措施，逐步制定與行業最佳實踐相一致的策略，以減少氣候變化對業務的影響。

能源及碳排放

本集團持續加強能源管理，並不斷地探索節約能源的機會。我們在歐洲及北美的業務擁有經ISO 50001認證的能源管理系統，並定期進行內部審核。

Environmental, Social and Governance Report 2021 二零二一年環境、社會及管治報告

In 2021, our operation in Hong Kong has invested in solar energy technologies, supporting the development of green energy technology. Our operating sites in Europe have also started to obtain electricity from renewable energy sources.

Environmental, Social and Governance Report 2021 二零二一年環境、社會及管治報告

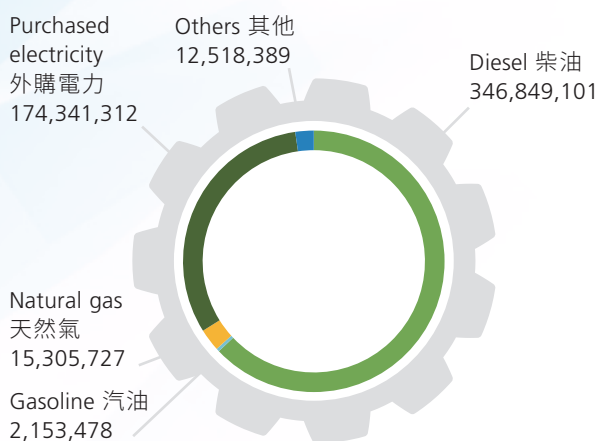

The Group's energy consumption comprises diesel, gasoline, natural gas, liquid gas, propane gas, heating oil, heating and purchased electricity. In 2021, the Group consumed a total of 551,168,007 MJ of energy, 23% less compared to 2020. The energy intensity was 184.0 MJ per tonne of product sold.

The total carbon emissions in 2021 were 37,086 tCO₂e. Direct emissions (Scope 1) and indirect emissions (Scope 2) were 30,100 tCO₂e and 6,986 tCO₂e, respectively. A 75% reduction in indirect emissions compared with 2020 is achieved by our effort in increasing the use of renewable energy sources. Carbon intensity was computed as 0.0124 tCO₂e per tonne of product sold.

本集團的能源消耗包括柴油、汽油、天然氣、液化氣、丙烷氣、燃料油、熱能及外購電力。於二零二一年，本集團合共消耗551,168,007兆焦耳能源，較二零二零年減少23%。能源密度為每噸售出產品184.0兆焦耳。

於二零二一年，總碳排放量為37,086噸二氧化碳當量。直接排放（範圍一）及間接排放（範圍二）分別為30,100噸二氧化碳當量及6,986噸二氧化碳當量。我們大力地增加可再生能源資源的使用，因此，間接排放較二零二零年減少75%。碳密度為每噸售出產品0.0124噸二氧化碳當量。

Energy Saving

Our subsidiaries across Europe, North America and Asia have been striving to discover any energy-saving opportunities and enhance energy efficiencies through embarking on various initiatives. Our operational sites in Europe have continued to replace traditional lighting with LED lights during the Year. Telemetry systems are installed in our fleets to enhance operational efficiency, thereby lowering energy consumption. Operational processes are also equipped with technology that supports advanced monitoring in order to monitor our energy use. At our operations in Hong Kong, green office initiatives are continuously implemented, minimising unnecessary energy consumption. Measures include turning off electrical appliances such as air-conditioning and lights when not in use.

We have set up directional targets to propel our performance in mitigating our fossil fuel consumption and carbon reduction, which are listed in the table below.

節約能源

我們在歐洲、北美洲及亞洲的附屬公司一直不斷地尋找節能機會、實施多項措施提高能源效益。於本年度，歐洲的營運工場繼續將傳統照明替換為LED燈具。車隊裝配遙測系統，以提升營運效率、降低能源消耗。各營運流程應用支持高級監控的科技監測能源使用。香港營運集團持續推行綠色辦公舉措，減少不必要的能源消耗。該等措施包括在不需要使用時關閉冷氣機及電燈等電器。

我們制定指導性目標以提升我們在減少化石燃料消耗及碳排放層面的表現，其詳情如下表所載。

Aspect 層面	Environmental target 環境目標	Progress made in 2021 於二零二一年取得的進展
Fossil fuel consumption/ GHG emissions 化石燃料消耗／ 溫室氣體排放	Increase the adoption of renewable energy 增加可再生能源的使用	<ul style="list-style-type: none"> • Our Hong Kong operation built the largest stand-alone solar power system in Hong Kong, with a capacity to generate 1 million kWh of electricity per year which is estimated to reduce carbon emissions by approximately 572,000 kg per year 香港營運集團建成香港最大的獨立太陽能系統，其產能為每年1,000,000千瓦時電力，預計每年減少碳排放約572,000千克 • In Europe, approximately 75 percent of electricity consumption was from renewable energy 在歐洲，約75%的電力消耗來源於可再生能源

Water Resources

The Group's major water use is for cleaning, fire-fighting and industrial use. In 2021, our overall water consumption was 94,779 cubic metres, representing a 49% drop from that in 2020. This is achieved by the huge reduction in water consumption in the United States due to reduction in processing operations after the divestments of the non-performing business. Water intensity was computed as 0.0316 m³ per tonne of product sold. In 2021, there were no issues in sourcing water that is fit for the purpose.

水資源

本集團主要在清潔、消防及工業用途中使用水資源。二零二一年的總耗水量為94,779立方米，較二零二零年的耗水量減少49%，主要原因是不良業務剝離後，美國的加工業務減少，在美國的耗水量也因此而大幅下降。用水密度為每噸售出產品0.0316立方米。於二零二一年，我們在求取適用水源上並無任何問題。

Environmental, Social and Governance Report 2021 二零二一年環境、社會及管治報告

To prevent excess water consumption, water use at our Europe and North America operations is monitored on a daily basis. Water-saving devices such as sensors on water taps and water saving ceiling shower heads have been installed to increase water use efficiency. To raise our employees' awareness of water saving, we have been providing internal training on water conservation to our staff.

We have been implementing a water conservation programme in Taizhou to track and monitor water usage. A rainwater collection system with a capacity of 10,000 m³ is installed on rooftops, collecting rainwater for irrigation, cleaning, firefighting, and industrial processes. A water circulation system is also adopted, recycling wastewater to minimise freshwater consumption.

為防止過度用水，歐洲及北美洲的營運實體每日監測用水量，安裝水龍頭傳感器及節水天花板淋浴噴頭等節水設備提高用水效益。我們為員工提供有關節約水資源的內部培訓，以增強員工的節水意識。

我們在台州實施節水計劃追蹤及監測用水量。屋頂裝配了容量為10,000立方米的雨水收集系統，收集雨水用於灌溉、清潔、消防及工業流程。同時，應用水循環系統回收利用廢水，減少鮮活水的耗用。

Environmental Management

The Group is committed to reducing environmental impacts of its operations through effective environmental management. To ensure environmental compliance, major facilities with greater environmental impacts have certified their environmental management system (“EMS”) with ISO 14001 certification. Proper implementation of the EMS is ensured by the concerned departments of each subsidiary. The EMS is reviewed on a regular basis according to stringent environmental risk assessment procedures to ensure its effectiveness.

To ensure compliance with environmental legislations, we conduct Environmental Impact Assessment (“EIA”) for all new facilities. Internal and external on-site audits are conducted on a regular basis to ensure adherence to environmental system protocols. We keep ourselves prepared for environmental accidents. Our operational sites have detailed plans in place to address emergency situations such as fire or explosion.

We constantly provide environmental trainings to employees in order to raise their awareness and knowledge of environmental management. We ensure that our employees are equipped with required knowledge and understanding of ISO 14001 standards, environmental laws and regulations, as well as environmental policies of the Group.

In 2021, a small yard located in Slovenia had been found non-compliance with certain wastewater treatments requirements. We have initiated a project to build a new pool for wastewater and oil catchers. Other than this, we were not aware of any non-compliance with relevant laws and regulations¹ that have a significant impact on the environment or the Group relating to air and greenhouse gas emissions, discharges into water and land, and generation of hazardous and non-hazardous waste during the Year.

¹ Please refer to the section headed “Laws and Regulations” for environment-related laws and regulations.

環境管理

本集團致力於通過有效的環境管理減少其運營對環境的影響。為確保符合環保要求，對環境影響較大的主要設施的環境管理系統（「環境管理系統」）已通過ISO 14001認證。各附屬公司的有關部門確保環境管理系統的妥善執行。環境管理系統乃根據嚴格的環境風險評估程序定期審核，以確保其有效性。

為確保遵守環境法規，我們對所有新設施進行環境影響評估（「環境影響評估」）。我們定期進行內外部工場審核，以確保遵守環境體系條例。我們時刻準備好應對環境事故。我們的運營工場訂有詳細的計劃，以應對火災或爆炸等緊急情況。

我們不斷為員工提供環境培訓，以提高彼等的環境管理意識及認知。我們確保我們的員工具備對ISO 14001標準、環境法律和法規以及本集團環境政策的必要認知及了解。

二零二一年，位於斯洛維尼亞的一處小院子經發現不符合若干廢水處理要求。我們已經啟動一個項目，為廢水和集油器建造一個新的水池。除此之外，我們於本年度並未知悉任何違反有關廢氣及溫室氣體排放、向水及土地的排污以及有害及無害廢棄物且對環境或本集團有重大影響的法律法規¹的情況。

¹ 有關環境的法律法規，請參閱「法律及法規」一節。

Effluent & Waste

Hazardous and non-hazardous waste are generated during our production process. During the Year, the Group generated 10,016 tonnes of hazardous waste and 105,608 tonnes of non-hazardous waste. In 2021, the total hazardous waste recorded was higher than that in 2020 due to the increased iron fillings emulsion processes.

污水及廢棄物

我們的生產過程中產生有害及無害廢棄物。於本年度，本集團產生10,016噸有害廢棄物及105,608噸無害廢棄物。二零二一年錄得的有害廢棄物總量超過二零二零年，原因在於鐵填料乳化工藝增加。

To ensure that both hazardous and non-hazardous waste are handled in strict compliance with relevant laws and regulations, hazardous and non-hazardous waste are stored, transported and disposed according to stringent waste storage control procedures at our operational sites. Before disposal, a preliminary screening process is conducted where uncleaned oil tanks, used oil filters and asbestos-containing materials are first removed. Hazardous waste is separated into different categories and stored in designated hazardous waste storage warehouses or in specific containers to prevent spillage and leakage. After separation, it is disposed by specialised waste handling companies for incineration. Non-hazardous waste is classified into industrial waste and general waste and handled by a designated industrial property management company.

為確保有害及無害廢棄物的處理均嚴格遵守相關法律法規，我們營運工場的有害及無害廢棄物均按嚴格的廢棄物儲存控制程序儲存、運輸和處置。在處置之前，會經過初步篩選程序（篩選出未經清潔的油箱、廢油過濾器、含石棉材料等）。有害廢棄物會分成不同類別，存放在指定的有害廢棄物儲存倉庫或特定容器中，防止溢出和洩漏。分離後，由專門的廢棄物處理公司進行焚燒處理。無害廢棄物乃分類為工業廢物和一般廢物，並由指定的工業物業管理公司處理。

Environmental, Social and Governance Report 2021 二零二一年環境、社會及管治報告

To ensure that hazardous and non-hazardous waste are handled properly, European recyclers are examined and verified to ensure that they are accredited service providers. The amount of and type of waste collected are clearly documented.

In addition, waste generated in Europe operations is managed according to a hierarchical disposal system. We minimise the amount of waste by reducing waste generation. For example, we ensure that all technical devices are in good condition through proper maintenance, and manage the use of materials, raw materials and technical devices with care. When waste arises, it should, if possible, be reused and recycled. We also adopt paper-saving measures such as digitalisation of invoices and other hard-copy documents in offices.

Effluent

The Group ensures that effluent generated from its operations are treated and discharged in compliance with all relevant local laws and regulations through various control measures. We conduct regular third-party testing to ensure that the levels of heavy metals, chemical oxygen demand ("COD"), suspended solids ("SS") and other pollutants in effluent are within the regulatory requirements. Due to the intensive industrial process involved at European production sites, we follow stringent guidelines when managing wastewater.

為確保妥善處理有害及無害廢棄物，我們對歐洲回收商進行審查和驗證，以確保彼等為經過認證的服務提供商。所收集廢棄物數量及種類都有明確記錄。

此外，在歐洲營運中產生的廢棄物會按照分級處理系統進行管理。我們通過減少廢棄物的產生而盡量減少廢棄物數量。例如，我們通過適當的維護確保所有技術設備處於良好狀態，並謹慎管理材料、原材料和技術設備的使用。當產生廢物時，如可能，應予再利用及回收。我們亦採取節省紙張的措施，例如將發票及辦公室內其他硬拷貝文件數字化。

污水

本集團已採取多項控制措施，確保營運過程中產生的污水的處理及排放符合所有相關當地法律及法規。我們進行定期的第三方測試，以確保污水中重金屬、化學需氧量（「COD」）、懸浮固體（「SS」）和其他污染物的水平保持在監管規定之內。由於歐洲生產工場涉及密集的工業流程，我們在管理廢水時遵循嚴格的指導方針。

Environmental, Social and Governance Report 2021 二零二一年環境、社會及管治報告

Discharge of effluents at Taizhou facilities has reached the third level of the GB8978-1996 Integrated Wastewater Discharge Standard. Wastewater is handled by sewage treatment facilities. Sewage produced at construction sites is treated by septic tanks before being discharged into sewage pipe network, while collected domestic sewage is not discharged. The Group's target in 2022 is to maintain 100% compliant disposal and discharge.

Air Emissions

Air emissions are generated in the course of use of machinery for recycling, including air pollutants and carbon emissions. The Group has been adopting various measures to reduce air emissions generated.

In 2021, our operating sites in Europe upgraded various equipment to reduce air emissions. Electric excavators were adopted to reduce emissions from the use of diesel. Battery forklifts, hybrid cars and cleaner vehicle models were also purchased. To reduce and remove air emissions, we have upgraded our dedusting equipment and adopted double-walled tanks for storage and internal distribution of exhaust reduction fluids.

On the other hand, we also try to replace business travel with digital meetings to reduce air emissions arising from travelling. Baghouse filter systems and desulphurisation devices were adopted in Taizhou, which fulfils both the second level of GB16297-1996 Integrated Emission Standards for Atmosphere Pollutant and GB1843-2001 Catering Industry Soot Emission Standards. Air emissions from our operations in Hong Kong are reported every 3 months to ensure compliance. Our household electrical appliances recycling facilities collect exhaust and dust generated to prevent emitting into the atmosphere.

In 2021, the Group generated 2,449 kg, 2,113 kg and 1,651 kg of nitrogen oxides ("NO_x"), sulphur oxides ("SO_x") and particulate matters ("PM"), respectively.

Noise

To minimise the noise pollution generated by its waste disassembly and processing operations, the Group conducts regular audits and takes measurements of the noise level. If the noise level exceeds regulatory limits, investigation and rectification actions are initiated. We ensure proper maintenance of our equipment and machinery on an ongoing basis to eliminate any abnormal noise generation resulting from aging and heavy usage. While site planning, restructuring and noise mapping are conducted to ensure noise from machinery, such as operating shredders, is well-contained and managed, we also set up noise barriers to minimise noise pollution.

廢氣排放

在使用機械進行回收利用的過程中會產生廢氣排放，包括空氣污染物及碳排放。本集團一直採取多項措施減少產生的廢氣排放。

二零二一年，我們的歐洲運營工場升級多種設備以減少廢氣排放。我們採用電動挖掘機以減少使用柴油產生的排放。我們亦購買電動叉車、混合動力汽車及清潔車型。為減少及消除廢氣排放，我們升級除塵設備，並採用雙壁罐以儲存及內部分配廢氣還原液。

另一方面，我們亦嘗試以數字會議代替商務旅行，以減少旅行產生的廢氣排放。台州採用袋式除塵系統及脫硫設備，符合GB16297-1996《大氣污染物綜合排放標準》二級和GB1843-2001《餐飲業煙塵排放標準》。我們每3個月報告一次我們在香港運營的廢氣排放，以確保合規。我們的家用電器回收設施收集產生的廢氣和灰塵，以防止排放到大氣中。

二零二一年，本集團分別產生氮氧化物（「NO_x」）、硫氧化物（「SO_x」）及顆粒物（「PM」）2,449千克、2,113千克及1,651千克。

噪音

為盡量減輕因廢物拆解及加工作業所產生的噪音污染，本集團進行定期審核，並對噪音水平進行測量。如噪音超出監管標準，則會立即進行檢測及採取補救行動。我們確保對我們的設備及機器進行持續的適當維護，以消除因老化和大量使用而產生的任何異常噪音。在進行工場規劃、重組及噪音測繪以確保機器（如碎紙機）產生的噪音得到良好控制及管理的同時，我們亦設置有隔音屏障，以盡量減少噪音污染。

Combating COVID-19

In 2021, we have focused on protecting and supporting our employees throughout the COVID-19 pandemic. The Group has strictly followed government guidelines and regulations, and appropriate operational adjustments have been made. We established organizational preventive measures, including hygiene norms and instructions, to reduce virus propagation in our business premises and the community where we operate. Chiho has a high vaccination rate, and unvaccinated employees are examined on a regular basis to ensure a safe working environment. To avoid unnecessary personal contacts, business travel is suspended, and split-team work arrangement is implemented. We also supply complimentary masks to our staff once a month to protect their health. N95 masks are offered to production workers as an added layer of protection.

Our crisis team has been keeping a close eye on the development of the pandemic, analysing the societal effects of the public health issue on an hourly basis and responding accordingly. Internal communication channels, including notices, emails, and online instructions, keep employees engaged and informed at all times. If suspected cases of infection are identified, they are handled under an established COVID-19 response mechanism. Operating procedures and instructions are suggested in the mechanism and outlined in the Employee Manual which is updated regularly to ensure compliance with the latest COVID-19 related regulations.

In 2021, we launched a series of Leadership Masterclasses trainings for around 60 management executives from our global operations. The international group of participants ranges from the management board to the country managers and department heads. The Leadership Masterclasses aims to assist our management team to consciously deal with their own understanding of leadership, develop a common language and gain clarity about the way in which leadership will mean in Chiho Group in the future.

The Leadership Masterclasses consisted of three modules of 6 hours each in the form of online training. The trainings were held in fixed groups of 6 – 7 participants so that, in addition to professional input, there was also space for individual reflection and discussion. The Leadership Masterclasses laid the foundation for personal and collective growth. Individual leadership skills have been improved, while our global leadership team grows closer together by sharing their own experiences and best practices.

Participant Cristian Draghici, Manager in Rumania, described his impression: *"I consider learning as a continuous journey throughout lifetime and these Leadership Masterclass courses gave me the opportunity of seeing other points of view as well as similarities to my experiences. In our case the group involved opened up their mind and mostly their hearts creating an emotional and memorable experience of being human and thus bringing us closer."*

二零二一年，我們為來自全球業務的約60名管理人員舉行了一系列領導力大師班培訓。該國際團體的參與者包括管理委員會、地區經理及部門主管。領導力大師班旨在協助我們的管理層團隊自覺達成其對領導力的理解，發展共同語言，並明確未來領導力對齊合環保集團的意義。

領導力大師班由三個模塊組成，每個模塊6小時，採用在線培訓的形式。培訓以6至7人的固定小組形式進行，因此除專業意見外，還有個人反思及討論的空間。領導力大師班為個人與集體的成長奠定基礎。個人領導技能得到提高，而我們的全球領導團隊通過分享自身的經驗及最佳實踐聯繫更加緊密。

參與者Cristian Draghici是羅馬尼亞的經理，如此描述其感受：「我認為學習是貫穿一生的持續旅程，而這些領導力大師班課程讓我有機會獲悉其他觀點以及與我的經驗相似之處。於我們而言，參與的小組放開思想，用心創造了令人難忘的情感交流體驗，從而拉近了我們的距離。」

We also organised several regional online sharing and discussion forums “Ask Anything” in various locations. Management executives, including managing directors, were invited to participate in the “Ask Anything” forum which was a new form of dialog offered to local employees to allow them to have direct interactions with management team. In the forums, representative from the management team shared the latest information on the development of the Group while local employees could ask any live questions to the management executives. We believe that these “Ask Anything” forums provide valuable platforms to enhance communication between management and local employees.

Labour Practices

The Group respects all human and labour rights, with zero tolerance for the use of child and forced labour. To eliminate the risk of child or forced labour, the Human Resource Department has implemented stringent rules on employees' age limit, which is enforced by identity checking for new hires. In Europe, all our permanent employees are 18 years old or older. In terms of young apprentices, we strictly comply with relevant labour laws and regulations and record the number of working hours for interns. In case of any instance of child employment due to the use of forged documents, we immediately terminate the contract. In 2021, the Group was not aware of any non-compliance with relevant laws and regulations³ that have a significant impact on the Group relating to employment and labour standards. Engaging Our Supply Chain

The Group is devoted to conducting business with suppliers who share our commitment to sustainability. We pay close attention to the development of a robust procurement network and work with only renowned suppliers worldwide to ensure the stability of upstream supplies and to improve control over our supply chain.

Environmental, Social and Governance Report 2021 **二零二一年環境、社會及管治報告**

The Group closely monitors its suppliers to ensure compliance with its expectations. We arrange for an in-person visit with the suppliers to verify the accuracy of the data and information provided. In addition, we constantly assess our suppliers through questionnaires and other means of contact to ensure that their business practices adhere to our standards. We also monitor supplier performance on an annual basis using our standardised rating system, ensuring corrective action can be taken early in case of a quality or reliability issue. Otherwise, appropriate disciplinary action, including termination of the commercial agreement, is taken.

We provide training materials to our suppliers in order to educate them about our business operation, helping them improve the effectiveness of waste scrap collection in their processes. This action contributes to carbon reduction by minimizing waste raw materials and promoting a sustainable economy. Each year, we host a few seminars to educate suppliers about any changes in waste management legislation, ensuring they comply with all legal standards and help reduce operational impacts on the environment.

Product Responsibility

Quality Assurance

The Group has committed to providing high-quality products and services. Our scrap transport, storage, processing, and production activities adhere to all applicable environmental licenses and regulations, as well as health and safety standards. We have a business policy in place that outlines our approaches to quality control and our quality management systems are certified under the ISO 9001 Standard.

Throughout the manufacturing process, we closely monitor materials and product quality. Waste materials are inspected upon arrival at our processing facilities for dismantling and classification. Product quality and standards are monitored in accordance with our non-conforming product control methods. The director of the operation center is immediately notified if any defective product is found. The Purchasing Department is responsible for communicating with associated departments regarding the reporting and return of unqualified products. Non-conforming batches are reviewed and isolated to prevent misuse of unqualified materials, which are returned to suppliers for reprocessing or other corrective steps.

本集團密切監察其供應商以確保符合其預期。我們安排與供應商進行面對面訪問，以驗證所提供數據及資料的準確性。此外，我們通過問卷調查及其他聯繫方式不斷評估我們的供應商，以確保其商業行為符合我們的標準。我們亦使用標準化評級系統每年監察供應商的表現，確保在出現質量或可靠性問題時能夠及早採取糾正措施。否則，我們將採取適當的紀律處分，包括終止商業協議。

我們向供應商提供培訓材料，以使彼等了解我們的業務營運，幫助彼等提高工藝流程中廢料收集的效率。此舉有助於最大限度地減少原材料浪費及促進可持續經濟來減少碳排放。我們每年會舉辦多次研討會，向供應商宣傳有關廢棄物管理立法的任何變化，確保彼等遵守所有法律標準並幫助減少營運對環境的影響。

產品責任

質量保證

本集團一直致力於提供優質的產品及服務。我們的廢料運輸、儲存、加工及生產活動均遵守所有適用的環境許可及法規，以及健康與安全標準。我們設有業務政策，其中概述我們的質量控制方法，且我們的質量管理體系已通過ISO 9001標準認證。

我們在整個生產過程中均會密切監控材料和產品質量。廢料在送達加工場後會先進行檢查再進行拆解及分類。我們會根據不合格產品控制程序對產品質量和標準進行監察。若發現任何有瑕疵的產品，須立即告知營運中心主管。採購部會負責就不合格產品的匯報和退貨與相關部門保持溝通。不合規格的產品批次會進行複檢及分開存放，以免誤用不合格的材料。不合規格的產品批次會被退回供應商進行再加工或其他糾正措施。
