(The above projects do not involve special administrative measures for the implementation access of national regulations, and those involving restricted projects and pre-existing administrative licenses must obtain the pre-existing administrative licensing documents before operation.)

Main products or services currently offered are: EMMELLE bicycles, electrical bicycles, lithium battery material and gold jewelry.

# 3. Release of the financial report

The Financial Report was approved to report at the 6th Session of 11th BOD of CBC on 25 August 2023.

# 4.Scope of the consolidate statement

The CBC has two subsidiaries and one sub-subsdiary included in the scope of consolidated financial statement, refer to the Note VIII-1.

# **IV.** Compilation Basis of Financial Statement

## 1. Compilation Basis

The financial statement is prepared based on continuing operation assumptions, and according to actual occurrence, in line with relevant accounting rules and follow important accounting policy and estimation.

# 2. Going concern

During the 12 months since end of the reporting period, there are no factors that cast significant doubt on the sustainability and other matters that have affected the Company.

# V. Main accounting policy and Accounting Estimate

Tips for specific accounting policy and estimate:

# Nil

# 1. Declaration on compliance with accounting standards for business enterprise

The financial statement prepared by the CBC Company, based on follow compilation basis, is comply with the requirement of new accounting standards for business enterprise issued by Ministry of Finance and its application guide, commentate as well as other regulations (collectively referred to as *Accounting Standards for Business Enterprise*), which is reflect a real and truth financial status of the Company, as well as operation results and cash flow situations.

Furthermore, the statement has reference to the listing and disclosure requirement from "*Rules Governing the Disclosure of Information for Enterprise with Stock Listed No.15-general regulation of financial report*" (2014 Revised) and "*Notice on Implementation of New Accounting Standards for Listed Companies*" (KJBH (2018) No. 453)

## 2. Accounting period

Calendar year is the accounting period for the CBC, which is starting from 1 January to 31 December.

## 3. Business cycles

The business period for the Company, which is the Gregorian calendar starting from 1 January to 31 December

# 4. Book-keeping currency

The CBC takes RMB as the standard currency for bookkeeping.

# 5. Accounting treatment for business combinations under the same control and those not under the same control

(1) Accounting treatment for business combinations under the same control and those not under the same control

For a business merger that is under the same control and is achieved by the CBC through one single transaction or multiple transactions, assets and liabilities obtained from that business combination shall be measured at their book value at the combination date as recorded by the party being absorbed in the consolidated financial statement of ultimate controlling party. Capital reserve shall be adjusted as per the difference between the book value of obtained net assets and the book value of paid consolidated consideration (or the nominal value of the issued shares) of the Company; retained earnings shall be adjusted if the capital reserve is not sufficient for offset.

(2) Accounting treatment for Enterprise combine not under the same control

The CBC will validate the difference that the combined cost is more than the fair value of the net identifiable assets gained from the acquiree on the acquisition date as goodwill; where the combined cost is less than the fair value of net identifiable assets gained from the acquiree during business combination, the fair value and combined cost of various identifiable assets, liabilities and contingent liabilities from the acquiree must be rechecked. Where the combined cost is, after the recheck, still less than the fair value of net identifiable assets gained from the acquiree shall be charged to current profits and losses.

As for business combination not under common control and realized through multiple transactions and by steps, the CBC shall make accounting treatment as follows:

1) Adjust the initial investment cost of long-term equity investments. As for stock equities held before the acquisition date according to the equity method, re-measurement is carried out according to the fair value of the equity on the acquisition date. The balance between the fair value and the book value is included in the current investment income. If the acquiree's stock equities held before the acquisition date involves changes of other comprehensive incomes and other owner's equities under accounting with the equity method, the balance between the fair value and the book value is included in the current investment income on the acquisition date, excluding other comprehensive incomes incurred by changes due to re-measurement of net liabilities or net assets

of the defined benefit plan.

2) Confirm the goodwill (or include the amount in the profits and losses). The initial investment cost of long-term equity investments adjusted in step 1 is compared with the fair value of net identifiable assets of the subsidiary shared on the acquisition date. If the former is greater than the latter, the balance is confirmed as goodwill; if the former is less than the latter, the balance is included in the current profits and losses.

Loss of control of a subsidiary in multiple transactions in which it disposes equity interests of its subsidiary in stages

(1)In determining whether to account for the multiple transactions as a single transaction

A parent shall consider all the terms and conditions of the transactions and their economic effects. One or more of the following may indicate that the parent should account for the multiple arrangements as a single transaction:

1) Arrangements are entered into at the same time or in contemplation of each other;

- 2) Arrangements work together to achieve an overall commercial effect;
- 3) The occurrence of one arrangement is dependent on the occurrence of at least one other arrangement;
- 4)One arrangement considered on its own is not economically justified, but it is economically justified when considered together with other arrangements.

(2)Accounting treatment for each of the multiple transactions forming part of a bundled transactions which eventually results in loss of control the subsidiary during disposal of its subsidiary in stages

If each of the multiple transactions forms part of a bundled transactions which eventually results in loss of control the subsidiary, these multiple transactions should be accounted for as a single transaction. In the consolidated financial statements, the difference between the consideration received and the corresponding percentage of the subsidiary's net assets in each transaction prior to the loss of control shall be recognized in other comprehensive income and transferred to the profit or loss when the parent eventually loses control of the subsidiary.

The remaining equity investment shall be re-measured at its fair value in the consolidated financial statements at the date when control is lost. The difference between the total amount of consideration received from the transaction that resulted in the loss of control and the fair value of the remaining equity investment and the share of net assets of the former subsidiary calculated continuously from the acquisition date or combination date based on the previous shareholding proportion, shall be recognized as investment income for the current period when control is lost. The amount previously recognized in other comprehensive income in relation to the former subsidiary's equity investment should be transferred to investment income for the current period when control is lost

(3)Accounting treatment for each of the multiple transactions NOT forming part of a bundled transactions which eventually results in loss of control the subsidiary during disposal of its subsidiary in stages

If the Company doesn't lose control of investee, the difference between the amount of the consideration received and the corresponding portion of net assets of the subsidiary shall be adjusted to the capital reserve (capital /equity premium) in the consolidated financial statements.

If the Company loses control of investee, the remaining equity investment shall be re-measured at its fair value in the consolidated financial statements at the date when control is lost. The difference between the total amount of consideration received from the transaction that resulted in the loss of control and the fair value of the remaining equity investment and the share of net assets of the former subsidiary calculated continuously from the acquisition date or combination date based on the previous shareholding percentage, shall be recognized as investment income for the current period when control is lost. The amount previously recognized in other comprehensive income in relation to the former subsidiary's equity investment should be transferred to investment income for the current period when control is lost.

## 6. Compilation method of consolidated financial statement

Consolidated financial statements are prepared by the Company in accordance with *Accounting Standard for Business Enterprise No. 33-Consolidated Financial Statements* and based on financial statements of parent company and its subsidiaries and other related information.

When consolidating the financial statements, the following items are eliminated: internal equity investment and owners' equity of subsidiaries, proceeds on internal investments and profit distribution of subsidiaries, internal transactions, internal debts and claim. The accounting policies adopted by subsidiaries are the same as parent company.

#### 7. Classification of joint venture arrangement and accounting treatment for joint control

## (1) Recognition and classification of joint venture arrangement

Joint arrangement refers to an arrangement controlled by two or more than two participants. Joint venture arrangement has the following characteristics: 1) Each participant is bound by the arrangement; 2) Two or more participants carry out joint control on implementation of the arrangement. Any participant cannot control the arrangement independently. Any participant for joint control can stop other participants or participant combinations to independently control the arrangement.

Joint control refers to the sharing of control over certain arrangement under related agreements, and related activities of the arrangement must be determined only when obtaining the unanimous consent of the parties sharing control.

Joint venture arrangement is classified in to joint operation and joint venture. Joint operation refers to an arrangement that a joint party enjoys assets related to the arrangement and bears liabilities related to the arrangement. Joint venture refers to an arrangement that a joint party only has the power governing net assets of the arrangement.

(2) Accounting treatment of joint venture arrangement

Joint venture participants should confirm the following items related to interest shares in joint venture and carry out accounting settlement according to relevant provisions of the Accounting Standards for Business Enterprises:

1) confirm the assets held separately and confirm the assets held jointly based on shares; 2) confirm the liabilities borne separately and confirm the liabilities borne jointly based on shares; 3) confirm the income incurred after selling its shares in joint venture output; 4) confirm the income after selling the joint venture outputs based on shares; 5) confirm the expenses incurred separately and confirm the expenses incurred separately and confirm the expenses incurred in joint venture based on shares.

Joint venture participants should carry out accounting settlement for investments of the joint venture according to provisions of *Accounting Standards for Business Enterprises No.2–Long-term Equity Investments*.

## 8. Recognition of cash and cash equivalents

Cash in cash flow statement means the inventory cash and savings available for use anytime. Cash equivalents refer to the short-term (generally due within three months since the date of purchase) highly liquid investments that are readily convertible into known amounts of cash and that are subject to an insignificant risk of change in value.

#### 9. Foreign currency transaction and financial statement conversion

#### (1)Conversion for foreign currency transaction

When initially recognized, the foreign currency for the transaction shall be converted into CNY amount according to the spot exchange rate on the date of transaction. For the foreign currency monetary items, conversion must be based on the spot exchange rate on the balance sheet date and the exchange difference incurred from different exchange rates, except for the exchange difference of principal and interest incurred due to foreign currency loan related to acquisition or construction of assets that qualify for capitalization, shall be charged to current profits and losses; foreign currency non-monetary items measured with historical cost are still converted as per the spot exchange rate on the transaction date and keep the RMB amount unchanged; foreign currency non-monetary items measured with fair value shall be converted as per the spot exchange rate on the date of determining the fair value and the difference shall be charged to current profits and losses or other comprehensive income.

(2)Conversion of financial statements presented in foreign currencies

The asset and liability items in the balance sheet shall be converted at the spot exchange rate on the balance sheet date; the owner's equity items, except for the items of "Retained profit", shall be converted at the spot exchange rate on the transaction date; the income and expenditure items in the profit statement shall be converted at the spot exchange rate on the transaction date. The translation difference of foreign financial statements conducted as above is recognized as other comprehensive incomes.

# **10. Financial instruments**

#### (1) Recognition and termination for financial instrument

Financial assets or financial liabilities are recognized when the CBC becomes a party to the contractual provisions of the instrument.

When buying and selling financial assets in a conventional manner, recognize and derecognize them according to the accounting of the trading day. Buying and selling financial assets in a conventional manner refers to the collection or delivery of financial assets in accordance with the contract terms and within the period prescribed by regulations or prevailing practices. Trading day refers to the date when the CBC promises to buy or sell financial assets.

When meeting the following conditions, a financial asset (or part of a financial asset, or part of a group of similar financial assets) need terminate recognition, i.e. to write off from its account and balance sheet:

1) The right to receive cash flows from financial assets expires;

2) The right to receive cash flows of financial assets is transferred, or assume the obligation to pay the full amount of cash flows received to a third party in a timely manner under the "handover agreement"; and (a) virtually transferred almost all risks and rewards of the ownership of financial assets, or (b) although virtually neither transferred nor retained almost all risks and rewards of the ownership of financial assets, abandoned the control of the financial assets.

#### (2) Classification and measurement of financial assets

The CBC's financial assets are classified as financial assets measured at amortized cost, financial assets measured at fair value and whose changes are included in other comprehensive income, and financial assets measured at fair value and whose changes are included in the current profit and loss according to the CBC's business model for managing financial assets and the contractual cash flow characteristics of financial assets at initial recognition. The subsequent measurement of financial assets depends on their classification.

The CBC's classification of financial assets is based on CBC's business model for managing financial assets and the cash flow characteristics of financial assets.

1)Financial assets measured at amortized cost

Financial assets that meet the following conditions at the same time are classified as financial assets measured at amortized cost: the Company's business model for managing this financial asset is to collect contractual cash

flows; the contract terms of the financial asset stipulate that the cash flow generated on a specific date is only the payment of principal and interest based on the outstanding principal amount. For such financial assets, the actual interest rate method is used for subsequent measurement based on amortized cost, and the gains or losses arising from amortization or impairment are included in the current profit and loss.

2)Debt instrument investments measured at fair value and whose changes are included in other comprehensive income

Financial assets that meet the following conditions at the same time are classified as financial assets measured at fair value and whose changes are included in other comprehensive income: the Company's business model for managing this financial asset is to both collect contractual cash flows and sell the financial assets; the contract terms of the financial asset stipulate that the cash flow generated on a specific date is only for the payment of principal and interest based on the outstanding principal amount. For such financial assets, fair value is used for subsequent measurement. The discount or premium is amortized by using the actual interest method and is recognized as interest income or expenses. Except that the impairment loss and the exchange difference of foreign currency monetary financial assets are recognized as current gains and losses, changes in the fair value of such financial assets are recognized as other comprehensive income, until the financial asset is derecognized, its cumulative gains or losses are transferred to the current profit and loss. Interest income related to such financial assets is included in the current profit and loss.

3)Equity instrument investments measured at fair value and whose changes are included in other comprehensive income

The CBC irrevocably chooses to designate some non-trading equity instrument investments as financial assets measured at fair value and whose changes are included in other comprehensive income. Only relevant dividend income is included in the current profit and loss, and changes in fair value are recognized as other comprehensive income, until the financial asset is terminate recognition, its accumulated gains or losses are transferred to retained earnings.

4) Financial assets measured at fair value and whose changes are included in the current profit and loss

Financial assets except for above financial assets measured at amortized cost and financial assets measured at fair value and whose changes are included in other comprehensive income are classified as financial assets measured at fair value and whose changes are included in the current profit and loss. During initial recognition, in order to eliminate or significantly reduce accounting mismatches, financial assets can be designated as financial assets measured at fair value and whose changes included in the current profit and loss. For such financial assets, fair value is used for subsequent measurement, and all changes in fair value are included in the current profit and loss.

When and only when the Company changes its business model for managing financial assets, it will reclassify all

affected related financial assets. For financial assets measured at fair value and whose changes are included in the current profit or loss, the related transaction costs are directly included in the current profit and loss, and the related transaction costs of other types of financial assets are included in the initial recognition amount.

(3) Classification and measurement of financial liabilities

The CBC's financial liabilities are classified as financial liabilities measured at amortized cost and financial liabilities measured at fair value and whose changes are included in the current profit and loss at initial recognition.

Financial liabilities that meet one of the following conditions can be designated as financial liabilities measured at fair value and whose changes are included in current profit or loss during initial measurement: (1) This designation can eliminate or significantly reduce accounting mismatches; (2) According to the group risk management or investment strategies stated in official written documents, management and performance evaluation of financial liability portfolios or financial assets and financial liability portfolios are conducted based on fair value, and are reported to key management personnel within the group on this basis; (3) The financial liability includes embedded derivatives that need to be split separately.

The CBC determines the classification of financial liabilities at initial recognition. For financial liabilities that are measured at fair value and whose changes are included in the current profit or loss, the related transaction costs are directly included in the current profit and loss, and the related transaction costs of other financial liabilities are included in its initial recognition amount.

The subsequent measurement of financial liabilities depends on their classification:

1)Financial liabilities measured at amortized cost

For such financial liabilities, adopt actual interest rate method and make subsequent measurements based on amortized costs.

2)Financial liabilities measured at fair value and whose changes are included in the current profit and loss

Financial liabilities that are measured at fair value and whose changes are included in the current profit or loss include trading financial liabilities (including derivatives that are financial liabilities) and financial liabilities designated to be measured at fair value at the initial recognition and whose changes are included in the current profit or loss.

#### (4) Financial instruments offset

If the following conditions are met at the same time, the financial assets and financial liabilities are listed in the balance sheet with the net amount after mutual offset: legal right to offset the confirmed amount, and this legal right is currently executable; Net settlement, or simultaneous realization of the financial assets and liquidation of the financial liabilities.

#### (5)Impairment of financial assets

The CBC recognizes the loss provisions on the basis of expected credit losses for financial assets measured at amortized cost, debt instrument investments measured at fair value and whose changes are included in other comprehensive income and financial guarantee contracts. Credit loss refers to the difference between all contractual cash flows receivable under the contract and discounted according to original actual interest rate by the CBC and all expected receivable cash flows, that is, the present value of all cash shortages.

The CBC considers all reasonable and evidence-based information, including forward-looking information, and estimates the expected credit loss of financial assets measured at amortized cost and financial assets measured at fair value and whose changes are included in other comprehensive income (debt instruments) in a single or combined manner.

#### 1)General model of expected credit loss

If the credit risk of the financial instrument has increased significantly since the initial recognition, the CBC measures its loss provisions in accordance with the amount equivalent to the expected credit loss of the financial instrument for the entire duration; if the credit risk of the financial instrument has not significantly increased since the initial recognition, the CBC measures its loss provisions in accordance with the amount equivalent to the expected credit loss of the financial instrument to the expected credit loss of the financial instrument in the next 12 months. The resulting increased or reversed amount of the loss provisions is included in the current profit and loss as an impairment loss or gain. For the CBC's specific assessment of credit risk, please see details in Note IX. Risks Related to Financial Instruments".

Generally, the CBC believes that the credit risk of the financial instrument has significantly increased when it exceeds 30 days after the due date, unless there is concrete evidence that the credit risk of the financial instrument has not increased significantly since initial recognition.

Specifically, the Company divides the process of credit impairment of financial instruments of which no credit impairment has occurred at the time of purchase or origin into three stages. There are different accounting treatment methods for the impairment of financial instruments at different stages:

Stage one: Credit risk has not increased significantly since initial recognition

For a financial instrument at this stage, the enterprise should measure the loss provisions according to the expected credit losses in the next 12 months, and calculate the interest income based on its book balance (that is, without deducting provisions for impairment) and the actual interest rate (if the instrument is a financial asset, the same below).

Stage two: Credit risk has increased significantly since initial recognition but no credit impairment has occurred

For a financial instrument at this stage, the enterprise should measure the loss provisions according to the expected credit loss of the instrument for its entire duration, and calculate the interest income based on its book balance and actual interest rate.

Stage three: Credit impairment occurs after initial recognition

For a financial instrument at this stage, the enterprise should measure the loss provisions based on the expected credit losses of the instrument for its entire duration, but the calculation of interest income is different from the financial assets at the previous two stages. For financial assets that have suffered credit impairment, the enterprise should calculate interest income based on its amortized cost (book balance minus the provisions for impairment, i.e., book value) and the actual interest rate.

For financial assets that have suffered credit impairment at the time of purchase or origin, the enterprise should only recognize changes in expected credit losses for the entire duration after initial recognition as loss provisions, and calculate the interest income based on its amortized cost and credit-adjusted actual interest rate.

2) The CBC chooses not to compare the financial instrument with lower credit risk on the balance sheet date with its credit risk at initial recognition, but directly makes the assumption that the credit risk of the instrument has not increased significantly since the initial recognition.

If the enterprise confirms that the default risk of financial instruments is low, the borrower has a strong ability to fulfill its contractual cash flow obligations in the short term, and even if there are adverse changes in the economic situation and operating environment in a longer period of time, it will not necessarily reduce the borrower's ability to fulfill its contractual cash flow obligations, then the financial instrument can be considered to have lower credit risk.

3)Account receivable and lease receivables

The CBC adopts the simplified model of expected credit loss for accounts receivables specified in "Accounting Standards for Business Enterprises No.14 - Revenue" and without containing significant financing components (including the case that the financing components in contracts that do not exceed one year are not considered according to the standards), that is, always measures their loss provisions according to the amount of expected credit loss during the entire duration.

The CBC makes accounting policy choices for the receivables containing significant financing components and the lease receivables specified in "Accounting Standards for Business Enterprises No.21 - Leases", and chooses to adopt the simplified model of expected credit losses, that is, to measure the loss provisions in accordance with the amount of expected credit losses throughout the entire duration.

#### (6) Transfer of financial assets

Where the CBC has transferred almost all the risks and rewards in the ownership of the financial asset to the transferee, the recognition of the financial assets shall be terminated; where almost all risks and rewards in the ownership of a financial asset are retained, the recognition of the financial assets are not terminated.

If the CBC neither transfers nor retains substantially all the risks and rewards of ownership of a financial asset, it shall be accounted for as follows: the financial asset should be terminated if the Group waives control over the asset; it recognizes the financial asset to the extent of its continuing involvement in the transferred financial asset and recognizes an associated liability if the Group does not waives control over the asset.

If the transferred financial assets continue to be involved by providing financial guarantee, the assets continue to be involved shall be recognized according to the lower of the book value of the financial assets and the amount of financial guarantee. The financial guarantee amount means the maximum amount of consideration received which will be required to be repaid.

The Company shall comply with the disclosure requirement of jewelry-related industries in the "Shenzhen Stock Exchange Self-Regulatory Guidelines for Listed Companies No. 3- Industry Disclosure"

Nil

## 11.Note receivable

The Group adopts the simplified model of expected credit loss for the accounts receivables specified in "Accounting Standards for Business Enterprises No.14 - Revenue" and without containing significant financing components (including the case that the financing components in contracts that do not exceed one year are not considered according to the standards), that is, always measures their loss provisions according to the amount of expected credit loss during the entire duration, and the resulting increased or reversed amount of the loss provision is included in the current profit and loss as an impairment loss or gain. The accrual method is as follows:

The CBC divides the bills receivable into two types, i.e. bank acceptance bills and commercial acceptance bills portfolios, according to the type of financial instruments. For bank acceptance bills, the accepting bank pays the determined amount to the taker or the bearer unconditionally due to the maturity of the bills, the overdue credit loss is low and has not increased significantly since the initial confirmation, the Company believes that the risk of overdue default is 0; for commercial acceptance bills, the Company believes that the probability of default is related to the aging, we use a simplified model of expected credit losses, that is the allowance for losses is always measured at the amount of expected credit losses over the entire duration period. Proportion for accrual found more in the 12. accounting policy and estimate for account receivable in III.

# 12.Account receivable

The CBC adopts the simplified model of expected credit loss for accounts receivables specified in "Accounting Standards for Business Enterprises No.14 - Revenue" and without containing significant financing components (including the case that the financing components in contracts that do not exceed one year are not considered according to the standards), that is, always measures their loss provisions according to the amount of expected credit loss during the entire duration, and the resulting increased or reversed amount of the loss provision is included in the current profit and loss as an impairment loss or gain.

For accounts receivable that contain a significant financing component, the CBC chooses to use the simplified model of expected credit losses, that is, to always measure its loss provisions according to the amount of expected credit losses during the entire duration.

1. Simplified model of expected credit losses: always measure the loss provisions according to the amount of expected credit losses during the entire duration

The CBC considers all reasonable and well-founded information, including estimates of expected credit losses on accounts receivable in a single or combined manner.

(1)Account receivable with single significant amount and with individual provision for bad debt reserves

Judgment basis or amount criteria for account with single	Withdrawal method for bad debt provision of account
significant amount	receivable with single significant amount
Receivable commercial acceptance bill, account receivable and other receivables with single amount more than 5 million yuan (including)	Carry out impairment test separately, and withdraw bad debt provision according to the difference between the present value of future cash flow and its book value

(2)Receivables with provision for bad debts by portfolio

Portfolio determine basis	
Age analysis	On the basis of the actual loss rate of the portfolio of receivables with similar credit risk characteristics which are the
	same or similar in the previous year, for the single amount of non-material receivables, it is divided into several portfolios

	according to the credit risk characteristics together with the receivables without impairment after the separate test
Other	Bank acceptance

# In the combination, the proportion of bad debt provision withdrawn by aging analysis method is as follow:

Account age	Accrual proportion of commercial acceptance bill receivable	Withdrawing proportion of the account receivable	Withdrawing proportion of other receivable
Within one year(one year			
included)	0.3%	0.3%	0.3%
$1\sim2$ years (2-year included)	100%	0.3%	0.3%
$2\sim3$ years (3-year included)	100%	0.3%	0.3%
Over 3 years	100%	100%	100%
Including:Irrecoverable			
recognized	Write off	Write off	Write off

(3)Account receivable with single significant amount and with individual provision for bad debt reserves

Judgment basis or amount criteria for account with single	Withdrawal method for bad debt provision of account
minor amount	receivable with single minor amount
Receivable commercial acceptance bill, account receivable and other receivables with single amount less than 5 million yuan (including), and the probability of recall is small by nature	Carry out impairment test separately, and withdraw bad debt provision according to the difference between the present value of future cash flow and its book value

2. A general model of expected credit loss

Found more in the treatment in [Note 10. Financial instrument]

## 13. Receivable financing

Financial assets that meet the following conditions at the same time are classified as financial assets measured at fair value and whose changes are included in other comprehensive income: the CBC's business model for managing this financial asset is to both collect contractual cash flows and sell the financial assets; the contract terms of the financial asset stipulate that the cash flow generated on a specific date is only for the payment of principal and interest based on the outstanding principal amount.

The CBC transfers the receivables held by discounting or endorsement, and such operations are more frequent with large amount involved. The management business models is essentially both the collection of contractual cash flows and the sales; in accordance with the relevant provision of financial instrument standards, classified them into the financial assets measured at fair value and with its variation reckoned into other comprehensive income.

#### 14.Other account receivable

Determination method and accounting treatment of the expected credit loss of other account receivable (1)Account receivable with single significant amount and with individual provision for bad debt reserves:

Account with single significant amount: the single receivable has over 5 million yuan at end of the period

At the end of the period, the receivables with significant single amount are tested separately for impairment. If there is objective evidence that they have been impaired, the impairment loss will be recognized and the provision for bad debts will be made based on the balance between the present value of future cash flows and its book value.

#### (2)Account receivable with bad debt provision accrual by portfolio

For the receivables with non significant single amount at the end of the period, they are divided into several combinations together with the receivables without impairment after independent test according to the account age as the credit risk feature. The impairment loss is calculated and determined according to a certain proportion of the ending balance of these receivables combinations (impairment test can be conducted separately), and the bad debt provision is withdrawn.

In addition to the receivables for which impairment provision has been separately made, the company determines the following proportion of provision for bad debts based on the actual loss rate of the combination of receivables with account age as credit risk characteristics in the previous year, which is the same or similar to the receivables, in combination with the current situation:

#### (2) Age analysis

Account age	Accrual ratio of account receivable	Accrual ratio of other account receivable
Within one year(one year included)	0.3%	0.3%
$1 \sim 2$ years (2-year included)	0.3%	0.3%
$2\sim3$ years (3-year included)	0.3%	0.3%
Over 3 years	100%	100%
Including:Irrecoverable recognized	Write off	Write off

Note: no bad debt provision for account receivable and other account receivable between the companies within the scope of consolidation

(3) Account receivable with minor single amount but with bad debt provision accrual

Reasons for individual provision for bad debt: the Company carry out separate impairment test for receivables that are not individually significant but have the following characteristics. If there is an objective evidence of impairment, an impairment loss is recognized for the difference between the present value of future cash flow and the carrying amount, and a provision for bad debts is made; the receivables in dispute with the other party or involved in litigation or arbitration; receivables where there are clear indications that the debtor is likely to be unable to meet its repayment obligations.

Accrual method for bad debt provision: if an impairment test is performed separately and there is an objective evidence of impairment, an impairment loss is recognized and a provision for bad debt is made on the basis of the difference between the present value of future cash flow and the carrying amount.

#### **15.Inventory**

The Company shall comply with the disclosure requirement of jewelry-related industries in the "Shenzhen Stock Exchange Self-Regulatory Guidelines for Listed Companies No. 3- Industry Disclosure"

#### (1) Classification of inventory

The CBC classifies the inventory into raw materials, goods in process, goods on hand, wrap page, low value consumables, materials for consigned processing and goods sold, etc.

#### (2) Valuation of inventories

Inventories are initially measured at cost upon acquisition, which includes procurement costs, processing costs and other costs. Cost of the inventory issued is carried forward on the basis of a combination of the weighted average method and specific identification when inventories are issued.

## (3) Provision for inventory impairment

When a comprehensive count of inventories is done at the end of the period, provision for inventory impairment is allocated or adjusted using the lower of the cost of inventory and the net realizable value. The net realizable value of stock in inventory (including finished products, goods in stock and materials for sale) that can be sold directly is determined using the estimated saleable price of such inventory deducted by the cost of sales and relevant taxation over the course of ordinary production and operation. The net realizable value of material in inventory that requires processing is determined using the estimated saleable price of the finished product deducted by the cost to completion, estimated cost of sales and relevant taxation over the course of ordinary production held for performance of sales contract or labor service contract is determined based on the contractual price; in case the amount of inventory held exceeds the contractual amount, the net realizable value of the excess portion of inventory is calculated using the normal saleable price.

Provision for impairment is made according to individual items of inventories at the end of the period; however, for inventories with large quantity and low unit price, the provision is made by categories; inventories of products that are produced and sold in the same region or with the same or similar purpose or usage and are difficult to be measured separately are combined for provision for impairment.

If the factors causing a previous write-off of inventory value has disappeared, the amount written-off is reversed and the amount provided for inventory impairment is reversed and recognized in profit or loss for the period.

#### (4)Inventory system

Perpetual inventory system is adopted.

## **16.**Contractual assets

1. Method and standard for recognition of contractual assets

The CBC lists contractual assets or contractual liabilities in the balance sheet based on the relationship between performance obligations and customer payments. The CBC's right to receive consideration for goods or services transferred to the customer (And that right depends on factors other than the passage of time) is listed as contractual assets. Contractual assets and contractual liabilities under the same contract are listed as a net amount. The CBC's right to receive consideration from customers unconditionally (only depends on the passage of time) is listed as a receivable.

2. Determination and accounting treatment of the expected credit loss for contractual assets

Determination and accounting treatment of the expected credit loss for contractual assets found more in Note "10. Financial instrument"

#### 17. Contractual cost

Nil

#### 18. Assets held for sale

The CBC classifies such corporate components (or non-current assets) that meet the following criteria as held-forsale: (1) Disposable immediately under current conditions based on similar transactions for disposals of such assets or practices for the disposal group; (2) Probable disposal; that is, a decision has been made on a plan for disposal and an undertaking to purchase has been obtained (the undertaking to purchase means a binding purchase agreement entered into by the Company and other parties, which contains transaction price, time and adequately strict punishments for breach of contract provisions, which renders the possibility of material adjustment or revocation of the agreement is extremely minor), and the disposal is expected to be completed within a year. Besides, approval from relevant competent authorities or regulatory authorities has been obtained as required by relevant rules.

The expected net residual value of asset held for sale is adjusted by the CBC to reflect its fair value less selling expense, provided that the net amount shall not exceed the original carrying value of the asset. In case that the original value is higher than the adjusted expected net residual value, the difference shall be recorded in profit or loss for the period as asset impairment loss, and allowance of impairment for the asset shall be provided. Impairment loss recognized in respect of the disposal group held for sale shall be used to offset the carrying value of the goodwill in the disposal group, and then offset the carrying value of the non-current assets within the disposal group based on their respective proportion of their carrying value.

In respect of the non-current assets held for sale, if the net amount after their fair value less the selling expenses increased as at the subsequent balance date, the reduced amount before will be recovered and reversed in the assets impairment loss amount recognized after being classified as held for sale, and the reversed amount will be recorded in the current profits or loss. The impairment loss on assets recognized before being classified as held for sale will not be reversed. In respect of the disposal group held for sale, if the net amount after their fair value less the selling expenses increased as at the subsequent balance date, the reduced amount before will be recovered and reversed in the assets impairment loss amount recognized in non-current assets after being classified as held for sale, and the reversed amount will be recorded in the current profits or loss. The reduced book value of the goodwill as well as the impairment loss on assets recognized before the non-current assets are classified as held for sale will not be reversed.

The amount of subsequent reversal of the impairment losses on assets recognized in disposal group held for sale, shall be increased proportionately to the carrying amount of each non-current asset in the disposal group other than goodwill to which the measurement provisions of the is standards applied, based on its proportionate share of the carrying amount.

In respect of loss of control in a subsidiary arising from disposal of the investment in such subsidiary, the investment in a subsidiary shall be classified as held for sale in its entirety in the individual financial statement of the parent company, and all the assets and liabilities of the subsidiary shall be classified as held for sale in the consolidated financial statement subject to that the proposed disposal of investment in the subsidiary satisfies such conditions as required for being classified as held for sale notwithstanding part equity investment will be retained by the Company after such disposal.

#### 19. Debt investment

Nil

## 20. Other debt investment

Nil

#### 21. Long-term account receivable

Nil

#### 22. Long-term equity investment

(1)Recognition of investment costs

1)If it is formed by the business combination under the common control, and that the combining party takes cash payment, transfer of non-cash assets, assumption of debts or issuance of equity securities as the consolidation

consideration, the shares of the book value of the owner's equity obtained from the combined party on the date of combination in the ultimate controlling party's consolidated financial statements shall be recognized as its initial investment cost. Capital reserves shall be adjusted according to the balance between the initial investment cost for long-term equity investment and the book value of paid consolidation consideration or the total face value of issued shares (capital premium or equity premium). If capital reserves are insufficient for offset, retained earnings shall be adjusted.

As for business combination under the common control realized by the Company through several transactions, the initial investment cost of the investment shall be determined based on the share of the carrying value of the owners' equity of the consolidated party as calculated according to the shareholding proportion on the consolidation date. Difference between initial investment cost and the carrying value of long-term equity investment before combination and the sum of carrying value of newly paid consideration for additional shares acquired on the date of combination is to adjust capital reserve (capital premium or equity premium). If the balance of capital reserve is insufficient, any excess is adjusted to retained earnings.

2) As for long-term equity investment formed from business combination not under common control, the fair value of the consolidated consideration paid shall be deemed as the initial investment cost on the acquisition date.

3) Except those ones formed by the business combination, for all items obtained by means of cash payment, actually paid acquisition costs shall be taken as the initial investment cost. For those ones obtained by the issuance of equity securities, the fair value of the issued equity securities shall be taken as the initial investment cost. For those ones invested by investors, the value agreed in the investment contract or agreement shall be taken as the initial investment cost, provided that the value agreed in the contract or agreement shall be fair.

(2)Subsequent measurement and profit or loss recognition

For a long-term equity investment where the CBC can exercise control over the investee, the long-term investment is accounted for using the cost method in the Company's financial statements. The equity method is adopted when the Group has joint control, or exercises significant influence on the investee.

Under cost method, long term equity investment is measured at initial investment cost. Except for the price actually paid for obtaining the investment or the cash dividends or profits declared but not yet distributed which is included in the consideration, the Company recognizes cash dividends or profits declared by the investee as current investment gains, and determine whether there is impairment on long term investment according to relevant assets impairment policies.

Under equity method, when the initial investment cost of the long-term equity investment exceeds the share of fair value in the net identifiable assets in the investee, the difference shall be included in initial investment cost of the long-term equity investment. When the initial investment cost is lower than the share of fair value in the net identifiable asset in the investee, such difference is recognized in profit or loss for the period with adjustment of cost of the long-term equity investment.

Under equity method, after the Company acquires a long-term equity investment, it shall, in accordance with its attributable share of the net profit or loss realized by the investee, recognize the investment profit or loss and adjust carrying value of the investment. The Group recognizes its share of the investee's net profits or losses after making appropriate adjustments to the investee's net profits and losses based on the fair value of the investee's identifiable assets at the acquisition date, using the Group's accounting policies and periods, and eliminating the portion of the profits or losses arising from internal transactions with its joint ventures and associates, attributable to the investing entity according to its shareholding proportion (but impairment losses for assets arising from internal transactions shall be recognized in full). The carrying amount of the investee. The CBC's share of net losses of the investee is recognized to the extent the carrying amount of the investee. The CBC's share of net losses of the investee is recognized to the extent the carrying amount of the investee is reduced to zero, except that the Group has the obligations to assume additional losses. The CBC adjusts the carrying amount of the long-term equity investment for any changes in owners' equity of the investee (other than net profits or losses) and includes the corresponding adjustments in the owners' equity of the Group.

#### (3) Determination of control and significant influence on investee

Control is the power over an investee. An investor must have exposure or rights to variable returns from its involvement with the investee, and the ability to use its power over the investee to affect the amount of the investor's returns. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control with other parties over those policies

- (4)Disposal of long-term equity investment
- 1) Partial disposal of long term investment in which control is retained

When long term investment is been partially disposed but control is retained by the company, the difference between disposal proceeds and carrying amount of the proportion being disposed is accounted for through profit or loss.

#### 2) Partial disposal of long term investment in which control is lost

When long term investment is partially disposed and control is lost as a result, the carrying value of the long term invest on the stock right, the difference between carrying amount of the part being disposed and disposal proceeds should be recognized as profit or loss. The residual part should be treated as long term investment or other financial assets according to their carrying amount. After partial disposal, if the company is able to exert significant influence or common control over the investee, the investment should be measured according to cost method or equity method, in compliance with relevant accounting standards and regulations.

#### (5)Impairment test and provision for impairment

If there is objective evidence on the balance sheet date showing investment in subsidiaries, associates and joint ventures is impaired, provision of impairment shall be made against the difference between the carrying amount

and the recoverable amount of the investment.

## 23.Investment real estate

Measurement mode Measured by cost method Depreciation or amortization method

(1) Investment real estate including land use right which has been rented out, land use right which is held for transfer upon appreciation and buildings which has been rented out.

(2) Investment real estate are initially measured at cost and subsequently measured as per the cost pattern, and relevant withdrawal of provision for depreciation or amortization is carried out by the same method for fixed assets and intangible assets. As of the balance sheet date, where there is any indication that an Investment real estate experiences impairment, the relevant impairment provision shall be provided for based on the difference between the carrying value and the recoverable amount.

## 24.Fix assets

#### (1) Recognition conditions

Fixed assets refer to the tangible assets for production of products, provision of labor, lease or operation, and with a service life in excess of one financial year.

Fixed assets are recorded at the actual cost at the time of acquisition, and depreciation is calculated and withdrawn using the average life method from the month after they reach the intended usable state

## (2) Depreciation methods

Category	Method	Years of depreciation	Scrap value rate	Yearly depreciation rate
Houses and buildings	Straight-line depreciation	20 years	10%	4.5%
Machinery equipment	Straight-line depreciation	10 years	10%	9%
Transportation equipment	Straight-line depreciation	5 years	10%	18%
Electronic equipment and others	Straight-line depreciation	5 years	10%	18%

(3)Impairment test method for fixed assets and impairment provision

As of the balance sheet date, if there is an indication that fixed assets are impaired, a corresponding provision for impairment is made for the difference between the carrying amount and the recoverable amount.

#### (3) Recognition basis, valuation and depreciation method for financial lease assets

Finance lease is determined when one or a combination of the following conditions are satisfied: 1) the ownership has been transferred to the lessee when the leasing term is due; 2) the lessee has the option to purchase the leasing asset at a price that is much lower than its fair value, so it can be reasonably determined that the lessee will take the option at the very beginning of the lease; 3) the leasing term accounts for most time of the useful life (ordinarily accounting for 75% or higher) even if the ownership does not transfer to the lessee; 4) the present value of the minimum amount of rent that the lessee has to pay at the first day of the lease amounts to 90% or higher of its fair value at the same date; or the present value of the minimum amount of rent that the lessee can use them without major modifications.

Fixed assets rented-in under finance lease are recorded at the lower of fair value and the present value of the minimum lease payment at the inception of the lease, and are depreciated following the depreciation policy for self-owned fixed assets.

#### 25. Construction in progress

(1)When the construction in progress has reached the intended condition for use, it will be treated as fixed assets as per the actual construction cost. If the construction in progress has reached the intended condition for use but completion accounting is not carried out, the construction in progress should be first treated as fixed assets as per the estimated value. After completion accounting is carried out, the original estimated value should be adjusted as per the actual cost, but the provision for depreciation withdrawn should not be adjusted.

(2)As of the balance sheet date, where there is any indication that a construction in process experiences impairment, the relevant impairment provision shall be provided for based on the difference between the carrying value and the recoverable amount.

#### 26. Borrowing expenses

Nil

27. Biological assets

Nil

#### 28. Oil and gas asset

Nil

#### 29. Right-of-use assets

On the commencement date of the lease term, the Group recognizes right-of-use assets and lease liabilities for leases, except for short-term leases and leases of low-value assets that are simplified by the standard.

The Group initially measures right-of-use assets at cost. This cost includes:

1. The initial measurement amount of the lease liability;

2. The lease payment amount paid on or before the commencement date of the lease term, if there is a lease incentive, deduct the relevant amount of the lease incentive already enjoyed;

3. Initial direct costs incurred;

4. The expected cost of demolishing and removing the leased asset, restoring the site where the leased asset is located or restoring the leased asset to the condition as agreed in the lease terms. If the aforementioned cost is incurred for the production of inventories, and the *Accounting Standards for Business Enterprises No. 1* - *Inventories* shall apply.

The Group recognizes and measures the cost mentioned in Item 4 above in accordance with *Accounting Standards for Business Enterprises No. 13 - Contingencies*.

Initial direct costs are the incremental cost incurred to achieve the lease. Incremental cost is the cost that would not have incurred if the enterprise had not acquired the lease.

With reference to the relevant depreciation provisions of *Accounting Standards for Business Enterprises No. 4* - *Fixed Assets*, the Group accrues depreciation for right-of-use assets. Where it can be reasonably determined that the ownership of the leased asset will be obtained at the expiration of the lease term, depreciation shall be accrued within the remaining service life of the leased asset. Where it cannot be reasonably determined that the ownership of the lease term asset asset can be obtained at the expiration of the lease term, depreciation shall be accrued within the the shorter of the lease term and the remaining service life of the leased asset.

In accordance with the Accounting Standards for Business Enterprises No. 8 - Impairment of Assets, the Group determines whether the right-of-use asset is impaired, and performs accounting treatment on the identified impairment losses.

#### **30. Intangible assets**

## (1) Valuation method, service life and impairment test

1).Intangible assets include land use right, patent right and non-patent technology, which should be initially measured at cost.

2).Intangible assets with limited service life should be amortized systematically and reasonably in their service lives as per the expected form of realization economic benefits relating to the said intangible assets. If the form of realization cannot be reliably determined, the intangible assets should be amortized on a straight-line basis.

3).At the balance sheet date, when there is any indication that the intangible assets with finite useful lives may be impaired, a provision for impairment loss is recognized on the excess of the carrying amounts of the assets over their recoverable amounts. Intangible assets with infinite useful lives and intangible assets not satisfying the condition for use yet are subject to impairment test each year notwithstanding whether the assets are impaired.

4). Expenditure incurred in the research phase of internal R&D shall be included in current gain/loss at the time of occurrence. Intangible assets recognized for expenditure in exploitation stage by satisfying the followed at same time: ①it is technically feasible that the intangible asset can be used or sold upon completion; ②there is intention to complete the intangible asset for use or sale; ③the intangible asset can produce economic benefits, including there is evidence that the products produced using the intangible asset has a market or the intangible asset itself has a market; if the intangible asset is for internal use, there is evidence that there exists usage for the intangible asset; ④there is sufficient support in terms of technology, financial resources and other resources in order to complete the development of the intangible asset, and there is capability to use or sell the intangible asset; ⑤the expenses attributable to the development phase of the intangible asset can be measured reliably.

## (2) Internal accounting policies relating to research and development expenditures

Expenditure incurred in the research phase of internal R&D shall be included in current gain/loss at the time of occurrence. Intangible assets recognized for expenditure in exploitation stage by satisfying the followed at same time: ①it is technically feasible that the intangible asset can be used or sold upon completion; ②there is intention to complete the intangible asset for use or sale; ③the intangible asset can produce economic benefits, including there is evidence that the products produced using the intangible asset has a market or the intangible asset itself has a market; if the intangible asset is for internal use, there is evidence that there exists usage for the intangible asset; ④there is sufficient support in terms of technology, financial resources and other resources in order to complete the development of the intangible asset, and there is capability to use or sell the intangible asset; ⑤the expenses attributable to the development phase of the intangible asset can be measured reliably.

#### 31. Impairment of long-term assets

Nil

#### 32. Long-term expenses to be apportioned

Long-term expenses to be apportioned are booked by actual amount occurred, and apportioned evenly during the benefit period or regulated period. In case that the long-term deferred expenses are not likely to benefit the subsequent accounting periods, the outstanding value of the item to be amortized shall be included in current profit or loss in full.

#### 33. Contract liability

The CBC lists contractual assets or contractual liabilities in the balance sheet based on the relationship between performance obligations and customer payments. The CBC's obligations to transfer goods or provide services to customers for which consideration has been received or receivable are listed as contractual liabilities. contractual assets and contractual liabilities under the same contract are listed as a net amount.

#### 34. Employee compensation

#### (1) Accounting treatment for short-term compensation

The CBC terminates the labor relationship with an employee before the employee labor contract expires, or proposes to offer a compensation to encourage an employee to voluntarily accept the downsizing. When the CBC cannot unilaterally withdraw the labor relationship cancellation plan or the downsizing proposal nor confirm the relevant costs of the restructuring involving the payment of termination benefits, whichever is earlier, the liabilities arising from the compensation for the termination of the labor relationship with the employees are recognized and included in the current profit and loss.

#### (2) Accounting treatment for post-employment benefit

The CBC terminates the labor relationship with an employee before the employee labor contract expires, or proposes to offer a compensation to encourage an employee to voluntarily accept the downsizing. When the CBC cannot unilaterally withdraw the labor relationship cancellation plan or the downsizing proposal nor confirm the relevant costs of the restructuring involving the payment of termination benefits, whichever is earlier, the liabilities arising from the compensation for the termination of the labor relationship with the employees are recognized and included in the current profit and loss.

#### (3) Accounting for retirement benefits

When the CBC terminates the employment relationship with employees before the end of the employment contracts or provides compensation as an offer to encourage employees to accept voluntary redundancy, the CBC shall recognize employee compensation liabilities arising from compensation for staff dismissal and included in

profit or loss for the current period, when the CBC cannot revoke unilaterally compensation for dismissal due to the cancellation of labor relationship plans and employee redundant proposals; and the CBC recognize cost and expenses related to payment of compensation for dismissal and restructuring, whichever is earlier.

#### (4) Accounting for other long-term employee benefits

The employees of the CBC have participated in the basic social endowment insurance organized and implemented by the local labor and social security department. The CBC pays the endowment insurance premium to the local basic social endowment insurance agency on a monthly basis based on the base and ratio of the local basic social endowment insurance payment. After the retirement of employees, the local labor and social security department has the responsibility to pay the social basic pension to the retired employees. During the accounting period in which employees provide services, the CBC recognizes the amount payable calculated according to the above social security insurance regulations as the liabilities and includes them in the current profit and loss or related asset costs.

#### **35.Lease liability**

Nil

## **36.Accrual liability**

Nil

#### 37. Share-based payment

(1)Types of share-based payment

Share-based payment comprises of equity-settled share-based payment and cash-settled share-based payment.

#### (2)Determination of fair value of equity instruments

1)determined based on the price quoted in an active market if there exists active market for the instrument. 2)determined by adoption of valuation technology if there exists no active market, including by reference to the recent arm's length market transactions between knowledgeable, willing parties, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models.

(3)Basis for determination of the best estimate of exercisable equity instruments

To be determined based on the subsequent information relating to latest change of exercisable employees.

(4)Accounting relating to implementation, amendment and termination of share-based payment schemes

1)Equity-settled share-based payment

For equity instruments that may be exercised immediately after the grant, the fair value of such instrument shall, on the date of the grant, be recognized in relevant costs or expenses with the increase in the capital reserve

accordingly. For equity-settled share-based payment made in return for the rendering of employee services that cannot be exercised until the services are fully rendered during vesting period or specified performance targets are met, on each balance sheet date within the vesting period, the services acquired in the current period shall, based on the best estimate of the number of exercisable instruments, be recognized in relevant costs or expenses and the capital reserves at the fair value of such instruments on the date of the grant.

For equity-settled share-based payment made in exchange for service from other parties, such payment shall be measured at the fair value of the service as of the acquisition date is the fair value can be measured reliably. And if the fair value of the service cannot be measured reliably while the fair value of the equity instrument can be measured reliably, it shall be measure at the fair value of the instrument as of the date on which the service is acquired, which shall be recorded in relevant cost or expense with increase in owners' equity accordingly.

#### 2)Cash-settled share-based payment

For the cash-settled share-based payment that may be exercised immediately after the grant in exchange for render of service by employees, the fair value of the liability incurred by the CBC shall, on the date of the grant, be recognized in relevant costs or expenses and the liabilities shall be increased accordingly. For cash-settled sharebased payment made in return for the rendering of employee services that cannot be exercised until the services are fully provided during vesting period or specified performance targets are met, on each balance sheet date within the vesting period, the services acquired in the current period shall, based on the best estimate of the number of exercisable instruments, be recognized in relevant costs or expenses and the corresponding liabilities at the fair value of the liability incurred by the CBC.

#### 3)Revision and termination of share-based payment schemes

If the revision results in an increase in the fair value of the equity instruments granted, the CBC shall recognize the increase in the services rendered accordingly at the increased fair value of the equity instruments. If the revision results in an increase in the number of equity instruments granted, the CBC will recognize the increase in the services rendered accordingly at the fair value of the increased number of equity instruments. If the CBC revises the vesting conditions on terms favorable to the employees, the CBC will take into consideration of the revised vesting conditions when dealing with the vesting conditions.

If the revision results in a decrease in the fair value of the equity instruments granted, the CBC shall continue recognize the amount of services rendered accordingly at the fair value of the equity instruments on the date of grant without considering the decrease in the fair value of the equity instruments. If the revision results in a decrease in the number of equity instruments granted, the CBC will account for such decrease by reducing part of the cancellation of equity instruments granted. If the CBC revises the vesting conditions on terms not favorable to the employees, the CBC will not take into consideration of the revised vesting conditions when dealing with the vesting conditions.

If the CBC cancels the equity instruments granted or settles the equity instruments granted during the vesting

period (other than cancellation as a result of failure to satisfy the vesting conditions), such cancellation or settlement will be treated as accelerated exercisable rights and the original amount in the remaining vesting period will be recognized immediately.

## 38. Other financial instruments including preferred stock, Perpetual capital securities

Nil

#### 39. Revenue

The Company shall comply with the disclosure requirement of jewelry-related industries in the "Shenzhen Stock Exchange Self-Regulatory Guidelines for Listed Companies No. 3- Industry Disclosure"

#### (1) Recognition of revenue

On the starting date of the contract, the company evaluates the contract, identifies each individual performance obligation contained in the contract, and determines whether each individual performance obligation is performed within a certain period of time or at a certain point in time.

When meeting one of the following conditions, it belongs to the performance obligation within a certain period of time, otherwise, it belongs to the performance obligation at a certain point in time: 1) The customer obtains and consumes the economic benefits brought by the company's performance at the same time as the company performs the contract; 2) The customer can control the goods or services under construction during the company's performance; 3) The goods or services produced during the company's performance have irreplaceable uses, and the company has the right to collect payments for the accumulated performance part of the contract during the entire contract period.

For performance obligations performed within a certain period of time, the company recognizes revenue in accordance with the performance progress during that period of time. When the performance progress cannot be reasonably determined, if the cost incurred is expected to be compensated, the revenue shall be recognized according to the amount of the cost incurred until the performance progress can be reasonably determined. For performance obligations performed at a certain point in time, revenue is recognized at the point when the customer obtains control of the relevant goods or services. When judging whether the customer has obtained control of the goods, the company considers the following signs: 1) The company has the current right to receive payment for the goods, that is, the customer has the current payment obligation for the goods; 2) The company has transferred the legal ownership of the goods to the customer in kind, that is, the customer has physically taken possession of the product; 4) The company has transferred the major risks and rewards of the ownership of the goods; 5) the customer has accepted the goods; 6) Other signs indicate that the customer has obtained control of

the goods.

#### (2) Principles of revenue measurement

1) The company measures revenue based on the transaction price allocated to each individual performance obligation. The transaction price is the amount of consideration that the company expects to be entitled to receive due to the transfer of goods or services to the customer, and does not include the amount collected on behalf of a third party and the amount expected to be returned to the customer.

2) If there is variable consideration in the contract, the company shall determine the best estimate of the variable consideration based on the expected value or the amount most likely to incur, but the transaction price including the variable consideration shall not exceed the amount at which the accumulatively recognized income is most likely not be subject to a significant reversal when the relevant uncertainty is eliminated.

3) If there is a major financing component in the contract, the company shall determine the transaction price based on the amount payable in cash when the customer assumes control of the goods or services. The difference between the transaction price and the contract consideration shall be amortized by the effective interest method during the contract period. On the starting date of the contract, if the company expects that the interval between the customer's acquisition of control of the goods or services and the customer's payment of the price will not exceed one year, we will not consider the significant financing components in the contract.

4) If the contract contains two or more performance obligations, the company will allocate the transaction prices to each individual performance obligation in accordance with the relative proportion of the stand-alone selling price of the goods promised by each individual performance obligation on the commencement date of contract.

#### (3) Specific method of revenue recognition:

In accordance with the general principles of revenue recognition and the actual situation of the company's product sales, the company formulates a specific revenue recognition method that the products sold by the company to customers are recognized as revenue after the products are delivered to the customer and the customer carries out acceptance and inspection.

#### 40. Government subsidy

(1) government subsidy including those relating to assets and relating to income

(2)government grant, if granted as monetary assets, are measured at the amount received or receivable, and

measured at fair value if granted as non-monetary assets. If the fair value can not be determined reliably, they shall be measured at nominal value.

#### (3) Aggregate method for government subsidy:

1)government subsidy relating to assets are recognized as deferred income, which shall be recorded in profit or loss by installment reasonably and systematically within the useful life of the assets. If assets are sold, transferred, discarded as useless or damaged prior to expiration of the useful life, the remaining deferred income undistributed shall be transferred to profit or loss for the period in which the assets are disposed.

2)If government subsidy relating to income are used to compensate for relevant costs or loss for the subsequent periods, they shall be recognized as deferred income, and recorded in profit or loss for the period in which the relevant costs are recognized. If government subsidy relating to income are used to compensate for the relevant costs or loss occurred, they shall be recorded in profit or loss for the period directly.

(4)Net method for government subsidy

1) government subsidy relating to assets are used to write off the carrying value of the relevant assets;

2) If government subsidy relating to income are used to compensate for relevant costs or loss for the subsequent periods, they shall be recognized as deferred income, and recorded in profit or loss for the period in which offset against the relevant costs. If government subsidy relating to income are used to compensate for the relevant costs or loss occurred, they shall be offset against the relevant costs for the period directly.

(5)The CBC adopts aggregated accounting method for the government subsidy received.

(6)As for the government subsidy comprising both portions relating to assets and income, separate accounting shall be made for different portion; in case it is hard to differentiate the portions, the subsidy will be recorded as related to income in general.

(7)The CBC realizes government subsidy relating to its normal activities as other income based on the substance of economic business, and if not related to its normal activities, realized as non-operating income and expenditure.

(8)Subsidized loans from preferential policy obtained by the CBC are classified based on whether subsidy funds are paid to the loaning bank or directly to the CBC by the competent financial authorities and are treated based on the following principles:

1)Where subsidy funds are paid to the loaning bank by the competent financial authorities and the bank then

provides loans to the CBC at a preferential policy rate, accounting shall be made by the CBC as follows:

a. Recognizes the actual borrowing amount received as the carrying value of the loan, and calculates the relevant borrowing costs based on the principal and the preferential policy rate.

b.Recognizes the fair value of the loan as the carrying value and calculates the borrowing cost under effective interest method, and recognizes the difference between the actual amount received and the fair value of the loan as deferred income. Deferred income is amortized over the term of the loan under effective interest method and offset against the relevant borrowing costs.

2)If the subsidy funds are paid directly to the CBC by finance authority, the CBC will offset the corresponding subsidy against the relevant borrowing expenses.

## 41.Deferred income tax asset /Deferred income tax liabilities

(1) Deferred tax assets or deferred tax liabilities are calculated and recognized based on the difference between the carrying amount and tax base of assets and liabilities (and the difference of the carrying amount and tax base of items not recognized as assets and liabilities but with their tax base being able to be determined according to tax laws) and in accordance with the tax rate applicable to the period during which the assets are expected to be recovered or the liabilities are expected to be settled.

(2)A deferred tax asset is recognized to the extent of the amount of the taxable income, which it is most likely to obtain and which can be deducted from the deductible temporary difference. At the balance sheet date, if there is any exact evidence that it is probable that future taxable profits will be available against which deductible temporary differences can be utilized, the deferred tax assets unrecognized in prior periods are recognized.

(3)At the balance sheet date, the carrying amount of deferred tax assets is reviewed. The carrying amount of a deferred tax asset is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the benefit of the deferred tax asset to be utilized. Such reduction is subsequently reversed to the extent that it becomes probable that sufficient taxable income will be available.

(4)The income tax and deferred tax for the period are treated as income tax expenses or income through profit or loss, excluding those arising from the following circumstances: ① business combination; and ② the transactions or items directly recognized in equity.

## 42. Lease

#### (1)Accounting for operating lease

When the Company is the lessee, lease payments are recognized as cost or profit or loss with straight-line method over the lease term. Initial expenses are recognized directly into profit or loss. Contingent rents are charged as profit or loss in the periods in which they are incurred.

When the Company is the lessor, lease income is recognized as profit or loss with straight-line method over the lease term. Initial expenses, other than those with material amount and eligible for capitalization which are recognized as profit or loss by installments, are recognized directly as profit or loss. Contingent rents are charged into profit or loss in the periods in which they are incurred.

## (2)Accounting for financing lease

When the company acts as lessee, at the inception of lease, the lower of fair value of leased assets at the inception of lease and the present value of minimum lease payment is recognized as the value of leased assets. The minimum lease payment is recognized as the value of long-term payable. Their difference is recorded as unrecognized finance costs with any initial direct expense incurred recorded in the value of leased assets. For each period of the lease term, current finance cost is calculated using effective interest method.

When the company acts as lessor, at the inception of lease, the sum of minimum lease income at the inception of lease and the initial direct expense is recognized as the value of finance lease payment receivable, with unsecured balance also recorded. The difference between the sum of minimum lease income, initial direct expense and unsecured balance and the sum of their present values is recognized as unrealized finance income. For each period of the lease term, current finance income is calculated using effective interest method.

#### 43. Other important accounting policy and estimation

Discontinued operation refers to the operation disposed or classified as held-for-sale by the Company and presented separately under operation segments and financial statements, which has fulfilled one of the following criteria:

(1) it represents an independent key operation or key operating region;

(2) it is part of the proposed disposal plan on an independent key operation or proposed disposal in key operating region; or

(3) it only establishes for acquisition of subsidiary through disposal.

The enterprise shall separately list profit and loss from continuing operations and profit and loss from discontinuing operations in the profit statement. For non-current assets held for sale or disposal groups that do not

meet the definition of discontinuing operations, the impairment losses and reversal amounts and disposal gains and losses should be presented as profit or loss from continuing operations. Operational gains and losses and disposal profits and losses such as impairment losses and reversal amounts of discontinuing operations should be reported as profits or losses of discontinuing operations.

# VIII. Changes of consolidation scope

# 1. Enterprise combined under different control

# (1) Enterprise combined under different control in the Period

							Unit:	RMB/CNY
Acquiree	Time point for equity obtained	Cost of equity obtained	Ratio of equity obtained	Acquired way Equity obtained way	Purchasing date	Standard to determine the purchasing date	Income of acquiree from purchasing date to period-end	Net profit of acquiree from purchasing date to period-end

Other explanation:

Nil

#### (2) Combination cost and goodwill

Consolidation cost	
Cash	
Fair value of non-cash assets	
Fair value of debts issued or assumed	
Fair value of equity securities issued	
Fair value of contingent consideration	

Fair value of the equity prior to the purchasing date	
Other	
Total combination cost	
Less: shares of fair value of identifiable net assets acquired	
The amount by which the goodwill/cost of consolidation is less	
than the share of fair value of identifiable net assets acquired	

Determination method for fair value of the combination cost and contingent consideration and changes:

Nil

Main reasons for large goodwill resulted:

Nil

Other explanation:

#### (3) Identifiable assets and liability on purchasing date under the acquiree

Unit: RMB/CNY

	Fair value on purchasing date	Book value on purchasing date
Assets:		
Monetary fund		
Account receivable		
Inventory		
Fix assets		
Intangible assets		
Liability:		
Loan		
Account payable		
Deferred income tax liabilities		
Net assets		
Less: Minority interests		
Net assets acquired		

Determination method for fair value of the identifiable assets and liabilities:

Nil

Contingent liability of the acquiree bear during combination:

Nil

Other explanation:

Nil

#### (4) Gains or losses arising from re-measured by fair value for the equity held before purchasing date

Whether it is a business combination realized by two or more transactions of exchange and a transaction of obtained control rights in the Period or not

 ${\scriptstyle \Box} Yes \ {\scriptsize \blacksquare} No$ 

(5) On purchasing date or period-end of the combination, combination consideration or fair value of identifiable assets and liability for the acquiree are un-able to confirm rationally

Nil

#### (6) Other explanation:

Nil

#### 2. Enterprise combine under the same control

#### (1) Enterprise combined under the same control in the Period

							Unit:	RMB/CNY
Combined party	Equity ratio obtained in combinatio n	Basis of combined under the same control	Combinatio n date	Standard to determine the combinatio n date	Income of the combined party from period- begin of combinatio n to the combinatio n date	Net profit of the combined party from period- begin of combinatio n to the combinatio n date	Income of the combined party during the comparison period	Net profit of the combined party during the comparison period

Other explanation:

Nil

#### (2) Combination cost

Unit: RMB/CNY

Consolidation cost	
Cash	
Book value of non-cash assets	
- Book value of debts issued or assumed	
The face value of the equity securities issued	
Contingent consideration	

Explanation on contingent consideration and its changes:

Nil

Other explanation:

#### (3) Book value of the assets and liability of the combined party on combination date

Unit: RMB/CNY

	Consolidation date	End of last period
