The Company does not define the non-recurring profit and loss items listed in the Explanatory Notice of Information Disclosure for Publicly Issued Securities No. 1 -- Non-recurring Profit and loss items as recurring profit and loss items.

## **Chapter III. Management discussion and analysis**

### **I. Industry situation of the Company during the reporting period**

The company is a leading listed company in domestic bearing manufacturing and has participated in the formulation of a number of standards in the industry.

At present, the domestic high-end bearing market is still occupied by foreign brands, overseas enterprises and domestic advanced bearing enterprises are accelerating the investment layout, and the competition situation is further heated. However, opportunities and challenges remain, China's economy continues to maintain a steady growth trend, macroeconomic policies continue to remain positive and stable, and the long-term fundamentals of the economy and the factors supporting high-quality development have not changed. Fiscal, monetary, industrial and other policies will continue to exert their strength and strengthen coordination. Driven by factors such as increasing domestic demand, slight improvement in external demand and export, and accelerated formation of new quality productivity, the economy is expected to further stabilize and recover.

### **II. Main business of the Company during the reporting period**

The business scope of the company is licensed items: inspection and testing services, import and export of goods, import and export of technology (items subject to approval according to law, business activities can be carried out only after approval by relevant departments, specific business items subject to approval results) general items: Bearing manufacturing, bearings, gears and transmission components manufacturing, high speed precision heavy-duty bearing sales, sales bearings, gears and transmission parts, bearing sales, general equipment manufacturing (excluding special equipment manufacturing), high-speed rail equipment, parts manufacturing, machinery and equipment sales, rail transportation equipment, key system and parts sales, sales of lubricating oil, high-speed rail equipment and accessories sales, Wind generators and spare parts sales, machinery parts, spare parts sales, railway locomotive vehicle accessories manufacturing, railway locomotive vehicle accessories sales, auto parts and accessories manufacturing, auto parts wholesale and retail auto parts, metal products repair, sales metal materials, metal products sales, metal surface treatment and heat treatment processing, quenching process, Mechanical parts and spare parts processing, land use right leasing, housing leasing, non-residential real estate leasing, mechanical equipment leasing, computer and communication equipment leasing, transportation equipment leasing service, office equipment leasing service, storage equipment leasing service, special equipment leasing, labor service (excluding labor dispatch), Technical services, technology development, technology consultation, technology exchange, technology transfer and technology popularization (except for projects subject to approval according to law, independently carry out business activities according to law with business license)

The company has strong manufacturing capacity and quality assurance ability, widely serve railway, metallurgy, mining and other industries and fields.

### **III. Analysis of core competitiveness**

As the largest bearing technology and product research and development and manufacturing base in China, the company has accumulated many years of practical experience in bearings and related fields, established a sound bearing technology innovation system, and maintains close cooperation with domestic research institutes and universities. As the main drafter of several standards in the bearing industry, it has mastered the latest technical trends in the development of the industry. It has established significant advantages in technology research and development, product manufacturing, marketing and user service.

The company's personalized design and manufacturing process for customers can take into account cost, delivery time and customer needs, improving the ability to respond to the market and customer personalized needs.

The company has a complete product service system, with all-weather dynamic service capabilities for product operation site. And with the "ten value-added services" good image by the majority of customers praise. The company has a strong manufacturing capacity and quality assurance capabilities, a wide range of services in railway, metallurgy, mining and other industries and fields.

At present, the company has established strategic cooperative relations with key customers in the field of domestic equipment application, and carried out in-depth marketing through the involvement of customer value engineering, firmly established the company's brand and influence in the domestic bearing market. In the international market, the company has obtained the certification qualification of important target markets, and the international reputation has been preliminarily established.

#### IV. Analysis of main business

##### 1. overview

2023 is the year of accelerating global economic divergence. The world economic recovery is sluggish, global inflation remains high, the spillover effects of tight monetary policies of major economies are prominent, geopolitical conflicts are intensifying, unilateralism and trade protectionism are on the rise, and the international environment is becoming more complex and grim. The domestic economy has been developing in waves, zigzagging forward, and recovering to the good at the same time, it also faces insufficient effective demand, weak social expectations and some cyclical and structural problems. For the bearing industry, multiple risk factors such as increased volume in the industry and insufficient consumption power continue to test the enterprise's anti-risk ability, strategic focus and development resilience.

In the face of complex external environment and severe industry competition environment, during the reporting period, the company continued to take the sustainable development of "seeking progress in stability and quality in stability" as the core, adhere to the high-quality development of the enterprise in the overall situation of the construction of a strong country and national rejuvenation, in the revitalization of Northeast China and industry-led exploration, and adhere to high-quality development.

In 2023, the company's main production and operation indicators are achieved as follows:

During the reporting period, the company achieved annual operating income of 2.19 billion yuan, down 6.6% year-on-year. Although it did not complete the annual operating income target, it maintained the resilience of performance and better controlled operating risks and costs and expenses. Net profit was minus 99 million yuan, a reduction of 40 million yuan over the previous year. Total assets of 3.18 billion yuan, down 4.3% year-on-year; Net assets of 370 million yuan, down 21.0% year-on-year.

### 4. Investment in R & D

Applicable  Inapplicable

Name of main R&D project	Project purpose	Project progress	The goal to be achieved	Expected impact on the company's future development
Technology research and manufacturing of large wind power spindle bearings	The development of high power fan spindle tapered bearing is currently the mainstream at home and abroad, and it is necessary to complete the domestic replacement as soon as possible.	Implement and complete according to the project plan	Realize the structure and performance design method of the main shaft bearing of more than 3 MW high-power fan, break through the key technologies of bearing machining, organization regulation and performance testing, form the design criteria and	Increase market share

			manufacturing technical specifications, greatly improve the design and manufacturing level of China's fan main shaft bearing, and promote the localization of high-power fan main shaft bearing.	
Steel hot rolling, cold roll system bearing development	Steel hot rolling, cold rolling bearing market demand, bearing capacity is large, high precision requirements. At present, the domestic bearing raceway is easy to fatigue, roller fragmentation, resulting in low service life, the need for technical research, increase research and development efforts, improve bearing quality, to replace imported bearings.	Implement and complete according to the project plan	The service life of the main technical indicators can reach more than 7800 hours; The product accuracy is stable to P5 level; The rolling line speed can reach 1000m/min; Product quality reliability increased to more than 98%;	Increase market share
Cement roller bearing technology improvement and research and manufacture	The main bearing types of roller bearing products are spherical bearings and four-row cylindrical bearings. In order to improve the service life and reliability of bearings, the bearing development and key parts are improved and optimized.	Implement and complete according to the project plan	Key research directions: 1. Improve the position and shape accuracy of the raceway size to ensure the stability of the size; 2, improve the heat treatment quality of the working surface.	Increase market share
Large high-end precision machine tool bearing research and development	Large high-end precision machine tool bearings are used with high-end machine tools, the processing control is strict, the shape and position tolerance level is high, the microscopic accuracy of the bearing is strict, and high-precision instruments are required to detect.	Implement and complete according to the project plan	The dimensional accuracy of the product reaches P5 level or above, and the reliability and rotation accuracy of the product are improved.	Increase market share
Development of four-row tapered bearing for long life rolling mill	Rolling mill four row tapered bearings are mostly used for rolling mill work rolls, with high load bearing, high speed, fatigue resistance, high reliability requirements, long life, need to improve the quality of bearings, domestic replacement	Implement and complete according to the project plan	1, the required life of more than 6000 hours; 2, the product accuracy reaches P5 level or above.	Increase market share
Research and manufacture of precision angular contact ball bearings	The use of advanced heat treatment technology, so that the product stability and life is reliable; Through the grinding process technology research, master precision	Implement and complete according to the project plan	Through the control of raceway curvature and position in grinding process, the sorting of sealing process, and the optimization of assembly	Increase market share

	angular contact ball bearing raceway grinding technology, super lapping technology, curing processing technology; The micro-geometric precision control technology of precision angular contact ball bearing raceway is studied. Solve the problem of cleanliness in the assembly process, and study the non-destructive sealing technology.		process, the precision angular contact ball bearing assembly technology is broken through.	
High performance motor insulated bearing technology	High power track traction motor, wind turbine and high power industrial motor insulation bearings in the domestic application blank, bearing insulation coating/lock layer preparation, grinding processing and insulation performance test technology lack, need to fill the domestic blank	Implement and complete according to the project plan	Through the research of high-performance insulation coating/locking technology of insulated bearings, the research of bearing insulation performance and life acceleration test methods, and the research of bearing insulation coating low-damage and high-precision manufacturing technology, the key technologies of high-performance composite insulation coating, such as spraying, grinding, locking film and testing, are broken through, and the high-performance composite insulation coating material is applied to insulated bearings. Meet the application requirements of insulated motor bearing under complex working conditions.	Increase market share
Wind power gearbox bearing	Optimize the oil groove coordinates of bearing inner ring, improve bearing bearing capacity and prolong bearing life.	Implement and complete according to the project plan	Reformulate the drawing of the ring quench parts to ensure the stability of the quench parts, and solve the influence of the uneven quench parts on the chamfer and the coordinate size of the oil groove.	Increase market share

## Company R &amp; D personnel

	2023	2022	Changes in the proportion
Number of R&D personnel (people)	386	295	30.85%
The proportion of R&D personnel	15.27%	12.18%	3.09%
Educational structure of R&D personnel			

undergraduate	82	34	141.18%
Master's degree	10	4	150.00%
Age composition of R&D personnel			
Under 30 years old	57	30	90.00%
30 to 40 years old	115	93	23.66%

## R&amp;d investment of the company

	2023	2022	Changes in the proportion
R&d investment amount (Yuan)	157,836,380.65	231,245,330.98	-31.75%
R&d investment as a percentage of revenue	7.20%	9.85%	-2.65%
Capitalized amount of R&D investment (Yuan)	0.00	0.00	
Capitalized R&D investment as a percentage of R&D investment	0.00%	0.00%	

## Causes and impacts of major changes in the composition of r&amp;d personnel

Applicable  Inapplicable

## V. Analysis of Non-Core Business Operations

Unit: yuan

	Amount	Proportion of total profits	Causes of formation	Whether it is sustainable
Investment income	12,935,641.78	-13.00%	Debt restructuring	No
Gain or loss on changes in fair value	-29,276.17	0.03%	The impact of changes in the market price of Chongqing Iron and Steel stocks held	No
Asset impairment	24,761,343.96	24.88%	Impairment of receivables, inventories, fixed assets, construction in progress, etc	No
Non-operating income	603,316.44	-0.61%	Penalty income and unpayable payments are written off	No
Non-operating expenses	445,093.57	-0.45%	Expenditure on fines, losses from the scrapping of non-current assets, etc.	No

## VI. Situation of assets and liabilities

### 1. Major change in asset items

Unit: yuan

	At the end of the year 2023		At the beginning of the year 2023		The proportion (+/-)	Notes on Major Changes
	Amount	Percentage of total assets	Amount	Percentage of total assets		
Monetary funds	210,814,228.05	6.63%	330,746,706.88	9.95%	-3.32%	
Accounts receivable	1,086,438,008.68	34.16%	1,136,295,329.59	34.18%	-0.02%	
Contract assets	5,565,143.57	0.17%	601,375.84	0.02%	0.15%	
stock	651,494,088.99	20.48%	646,619,143.91	19.45%	1.03%	
Investment real estate	68,614,653.76	2.16%	67,211,806.69	2.02%	0.14%	
Fixed assets	448,651,044.66	14.11%	391,769,315.64	11.78%	2.33%	
Construction in progress	37,354,969.68	1.17%	81,891,139.54	2.46%	-1.29%	
Short-term loan	598,000,000.00	18.80%	699,000,000.00	21.02%	-2.22%	
Contractual liability	30,546,735.85	0.96%	30,449,983.07	0.92%	0.04%	
Long-term loan	99,450,000.00	3.13%			3.13%	

Foreign assets account for a relatively high proportion

Applicable  Inapplicable

### 2. Assets and liabilities measured at fair value

Applicable  Inapplicable

Unit: yuan

item	Ending balance	Current fair value change profit and loss	Accumulated changes in fair value of equity	Impairment of the current period	Current Purchase Amount	Current Sale Amount	Other changes	The final number
------	----------------	---	---	----------------------------------	-------------------------	---------------------	---------------	------------------

Financial assets								
1. Transactional financial assets (excluding derivative financial assets)	243,454.50	-29,276.17	-352,854.97					214,178.33
Subtotal of financial assets	243,454.50	-29,276.17	-352,854.97					214,178.33
Receivables financing	30,996,930.63					24,549,544.24		55,546,474.87
Above total	31,240,385.13	-29,276.17	-352,854.97			24,549,544.24		55,760,653.20
Financial liability	0.00							0.00

Other changes: the amount of receivables financing increase

Whether the measurement attribute of the company's main assets has changed significantly during the reporting period

Yes  No

### 3.Limitation of asset rights by the end of the report

item	End of term				At the end of last year			
	Book balance	Book value	Restricted type	Restricted case	Book balance	Book value	Restricted type	Restricted case
Monetary funds	42,939,828.07	42,939,828.07	Other monetary funds	Bank acceptance deposit	75,389,415.51	75,389,415.51	Other monetary funds	Bank acceptance deposit

### **XIII. the implementation of the "Quality return double improvement" action plan**

Whether the company disclosed the "quality return double improvement" action plan.

Yes  No

## Chapter IV Corporate Governance

### I. Basic situation of corporate governance

Company in accordance with the "company law", "securities law" and other related regulations established by the general meeting of shareholders, board of directors, board of supervisors, and senior management personnel of the company governance structure, formed the authority and decision-making body, watchdog and senior management responsibilities clear, standardized operation mechanism of mutual coordination and mutual checks and balances. It has established internal systems related to the operation of the "three associations", independent directors, information disclosure, investor protection, related party transactions, and internal control. Through the formulation of the Articles of Association and the implementation of various internal systems, the company has clarified the responsibilities, powers, procedures and obligations of institutions at all levels in decision-making, implementation and supervision.

Whether the actual situation of corporate governance is materially different from laws, administrative regulations and regulations on listed company governance issued by CSRC

yes  no

The actual situation of corporate governance is not significantly different from laws, administrative regulations and regulations on listed company governance issued by the CSRC.

### II. The company's independence from the controlling shareholders and actual controllers in ensuring the company's assets, personnel, finance, institutions and business

In terms of business, personnel, assets, institutions and finance, the Company and the controlling shareholder are independently accounting, undertaking responsibilities and risks independently. There is no situation in which the company and the controlling shareholder cannot guarantee their independence and independent operation ability in terms of business, personnel, assets, institutions and finance.

### III. The situation of industry competition

Applicable  Inapplicable

### IV. Information about the annual and extraordinary general meetings of shareholders held during the reporting period

During the reporting period, whether any directors or supervisors leave office or senior managers are dismissed

yes  no

Due to job changes, Ms. Wang Lin resigned as supervisor of the company

Changes of directors, supervisors and senior managers of the company

Applicable  Inapplicable

Name	post	type	Date	Cause
Liang Shuang	Independent director	Leave office at the end of one's term	May 31, 2023	Leave office at the end of one's term
Wang Lin	supervisor	Leave office	April 10th, 2023	Job change

## 2. Position

The professional background, main work experience and main responsibilities of the current directors, supervisors and senior managers of the company

### 1. Resumes of non-independent directors

**Mr. Liu Jun**, born in January 1970, university degree and owns a master's degree, he joined the workforce in August 1992 and join the CPC in December 2000. Mr. Liu worked as the deputy GM of DHI·DCW Group Co., Ltd. , the deputy president of Dalian Huarui Heavy Industry Group Co., Ltd, the president and Party Secretary of Dalian Rubber & Plastics Machinery Co., Ltd. Currently he is the Party Secretary and President of Wafangdian Bearing Group Corp., Ltd.

**Mr. Zhang Xinghai**, born in October 1968, university degree and a senior accountant at researcher level, he joined the workforce in July 1991. Mr. Zhang worked as the deputy chief accountant and secretary of the Board of Wafangdian Bearing Company Limited, the director, chief accountant and secretary of the Board of Wafangdian Bearing Company Limited. Now he is the deputy secretary of the Party Committee and GM of Wafangdian Bearing Group Corp., Ltd.

**Mr. Chen Jiajun**, born in December 1967, university degree and an economist and statistician, he joined the workforce in August 1990. Mr. Chen worked as the section chief, assistant director, deputy director, director of economic operation department of Wafangdian Bearing Group Corp., Ltd., the assistant GM and head of economic operation department of Wafangdian Bearing Group Corp., Ltd.; now he is the deputy GM of Wafangdian Bearing Group Corp., Ltd.

**Mr. Wang Jiyuan**, born in December 1966. he graduated from Liaoning University with a university degree major in industrial economics. Mr. Wang worked as the vice president of management department, director of planning & finance department and vice GM of the Company, the assistant GM of ZWZ Corporation. Now he is the Director and GM of the Company.

**Ms. Sun Najuan**, born in October 1968, University degree, Master degree, senior accountant at research level,she joined the workforce in August 1990. she worked as the account of finance department and head of inspection section of Wafangdian Bearing Group Corp., Ltd., assistant GM of material supply company under the Wafangdian Bearing Company Limited, the assistant GM of sales head office of Wafangdian Bearing Company Limited and the deputy chief accountant of Wafangdian Bearing Group Corp., Ltd.; now she is the chief accountant, director and secretary of the Board of Wafangdian Bearing Company Limited.

**Mr. Tan Jianguang**, born in December 1964, an assistant engineer, he joined the workforce in August 1986. he worked as the workshop director in cage branch factory, the sales man, director, vice president, vice GM and GM of the marketing department of Wafangdian Bearing Company Limited.; the assistant GM and GM of the railway division and railway bearing sales company under the Wafangdian Bearing Company Limited.; now he is the Director and Deputy GM of Wafangdian Bearing Company Limited.

**Mr. Zhao Qingtao**, born in July 1977, master degree. In 1999, he joined Shanghai Hongzheng Law Firm as a lawyer; in 2005, he joined Shanghai Xieli Management Consulting Co. , Ltd. as a legal consultant; in 2006, he joined eastby Industrial Minerals Co. , Ltd. as a legal officer in China since 2008; In 2010 joined Bekaert Business Management (Shanghai) Co. , Ltd. , 2013 as North Asia legal director; 2015 joined Valeo Business Management (Shanghai) Co. , Ltd. as deputy director of Legal Affairs in China; Joined skf (China) Ltd. as director of legal affairs and compliance in 2019 and has been director of legal, compliance, environment, health and safety for Skf China and northeast subregion since March 2022.

**Ms. Fang Bo**, born June 1972, undergraduate. Joined pricewaterhousecoopers as an auditor in 1994. He

joined skf (China) Co. , Ltd. in 1997. He was the finance manager of the subsidiary company of the Investment Company. He is the finance manager of skf (China) Co. , Ltd. . Since January 2020, he has been in charge of skf's Northeast Asia Financial Operation Center.

## **2. Resumes of independent directors**

**Mr. Liu Yuping**, born in August 1956, is a professor and has been teaching at the School of Law of Dongbei University of Finance and Economics since graduation. Treatment of pollutants

After centralized collection of the collection system, four sets of oil mist purification devices are used for processing by centrifugal and filtration separation technology.

The lathe is equipped with a mist absorber, and the filter element is replaced every six months, and the workshop ventilation is strengthened.

The pickling operation is equipped with acid mist neutralization processor and enhanced indoor ventilation.  
Environmental self-monitoring programme

The subsidiary has developed an environmental self-monitoring program, and the self-monitoring program and monitoring data are uploaded to the "self-monitoring information release platform of key pollutant discharge units in Liaoning Province, which is monitored in real time by the local environmental protection department."

Emergency plan for environmental emergencies

The emergency plan for environmental emergencies shall be filed in the Ecological Environment Bureau of Jinpu New District (Jinzhou) of Dalian City.

File No. 210213S2020003-L

Investment in environmental governance and protection and payment of environmental protection tax

No sewage charges are required for quarterly declarations

Measures taken to reduce its carbon emissions during the reporting period and their effects

Applicable  Not applicable

The company is an enterprise with sustainable development as its core values, and has a worldwide influence in the field of bearing manufacturing. Our company is committed to promoting the reduction of carbon emissions and striving to adopt sustainable production methods to contribute to environmental protection. By collecting detailed data and actionable recommendations on the company's carbon footprint in 2023, combined with a comprehensive assessment of the level of carbon emissions, the aim is to identify and drive potential opportunities to reduce the carbon footprint in order to achieve sustainable development goals.

### **1. Energy consumption and carbon emissions**

The company's annual energy consumption of 9090.90 tons of standard coal, equivalent to carbon emissions of 22,300 tons of carbon emissions, an increase of 0.1%, while the energy consumption of 10,000 yuan of output value is 26.08 kg of standard coal, a year-on-year decrease of 37.29%, 10,000 yuan of output value energy consumption decreased significantly, and energy conservation has achieved excellent results.

### **2. Basic energy management work**

Optimize the energy management system. The company has completed the external audit and certification of energy management system, and has obtained the international and domestic certificates of energy management system issued by Rheinland Company, and has obtained the international mutual recognition qualification of IAF.

Cooperated with energy supply units to conduct energy training. Participated in green power training in China Resources Jinzhou Power Plant, further deepened the cooperation between the joint stock company and energy supply units, and laid the foundation for future green power acquisition

Conduct knowledge training on "cloud empowerment". Use the company's knowledge sharing platform to release the fourth phase of energy management "Cloud empowerment".

### **3. Energy saving and carbon reduction technical reform measures project**

To the national "carbon peak, carbon neutrality" as the goal, combined with new technology, new materials,

new processes, new equipment of the "four new" energy-saving means, innovative ideas, the development of energy-saving project plans.

During the year, 18 new energy-saving and carbon reduction project measures were developed, and the implementation of each project was tracked and implemented every quarter. By the end of the year, all 18 energy-saving measures were completed and implemented, and 205.88 tons of carbon emissions were reduced throughout the year. Among them, energy-saving lighting mining lamps cover more than 85%, and further increase the proportion of green lighting; Continue to implement the quota control of a single high energy consumption equipment to improve the energy efficiency of thermal processing equipment; The green area was expanded, more than 980 trees were planted, and carbon emissions were absorbed by green plants, achieving a reduction of 17.93 tons.

#### **4. We will optimize the energy mix and increase the utilization rate of clean energy**

In 2023, using the opportunity of power reform, we obtained 10% of the total annual electricity consumption of wind power and 20% of nuclear power in the power market, and achieved a clean energy utilization rate of 30%, an increase of 25% over the same period last year, refreshing the record of clean energy utilization. At the same time, the company obtained 3 million KWH of green electricity (with green certificate), and the company obtained the green certificate for the first time, providing strong support for green manufacturing.

#### **5. Work measures for 2024**

##### **First of all, the team construction was strengthened to expand the scope of carbon footprint verification of Waxing Co., LTD**

Absorb college graduates from environmental protection and energy related majors, hire experts in carbon emission and carbon trading, strengthen the energy management team, and improve the scale and professionalism of the team. In order to cope with the future requirements of the country in terms of carbon emission and carbon footprint for enterprises.

At the same time, we are doing a good job in the statistics of carbon footprint scope 2, continue to deepen the statistics of scope 1, and will extend to scope 3 in the future.

##### **Secondly, the company will optimize the efficiency of energy use through technological innovation and process improvement.**

The company will seek to reduce greenhouse gas emissions in the production process and achieve reductions in energy consumption through the use of cleaner energy sources and improvements in traditional processes.

By strengthening the annual "four new" energy-saving technical transformation project measures, the supporting role of green and low-carbon technology continues to strengthen. In 2024, the joint-stock company will introduce state-level energy-saving projects into the annual energy-saving technical transformation measures, and use the favorable national policies to drive the in-depth implementation of the joint-stock company's energy-saving transformation projects.

Among them, the green lighting work will be completed by 2024 to achieve full coverage of green lighting; Continue to deepen the management of a single high energy consumption quota to achieve efficient operation of thermal processing equipment; Promote single-unit lighting, single-unit circulating cooling, single-unit compressed air, etc., to achieve energy-saving single-unit production.

##### **Thirdly, the company will "break first and then stand" to improve the "green content" of energy development.**

To promote carbon peak carbon neutrality, the energy sector is the main battlefield. The joint Stock Company will promote the development of new and clean energy in a more prominent position, and will actively promote the development and utilization of renewable energy in the future. In the form of investment or cooperation, the joint-stock company will develop renewable energy projects, such as solar power and wind power, to reduce dependence on traditional fossil fuels and reduce carbon emissions.

Beginning in 2024, the joint stock Company will continue to carry out rooftop distributed photovoltaic power generation projects in the North, South and old factory areas, the project is expected to be about 40 megawatts, is expected to achieve annual photovoltaic power generation of 50 million KWH or more, clean energy consumption continues to improve, and non-fossil energy to achieve leap-forward development.

**In addition, the company will strengthen the monitoring and management of energy management and carbon emission data.**

The company will establish an efficient energy management system to further reduce carbon emissions by regularly monitoring and evaluating energy consumption, timely adjusting and improving energy efficiency.

The company will be guided by the national new infrastructure construction development strategy and national energy security strategy, driven by the realization of the development goal of "carbon peak and carbon neutrality", and establish a set of intelligent energy management information system integrating "new management, new model and new guarantee" which is suitable for the production and operation of joint stock companies. Comprehensively improve the intelligent, refined and intensive management level of the company's energy use, and comply with the company's business philosophy of high-quality development.

**Administrative punishment for environmental problems during the reporting period**

Name of company or subsidiary	Penalty reason	non-compliance	The penalty	The impact on the production and operation of listed companies	Corrective measures of the company
None	None	None	None	None	None

Other environmental information that should be disclosed

no

Other environmental related information

no

## II. Social responsibility

In 2023, the company will earnestly fulfill its due social responsibilities. While pursuing corporate economic benefits, it will actively undertake the responsibilities for the comprehensive development of the country and society, the natural environment and resources, as well as stakeholders such as shareholders, employees, customers, consumers, suppliers and communities, and realize the social value of the company. It has better realized the win-win cooperation between the state, society and stakeholders, strengthened environmental protection, improved resource efficiency, influenced and driven the development of local economy through project construction and other ways, and effectively promoted the coordinated development of the company with society, nature and other stakeholders.

In strict accordance with the relevant national and local laws and regulations and document requirements, the company has handled pension insurance, unemployment insurance, medical insurance, work-related injury insurance, maternity insurance, housing provident fund and large medical mutual insurance for

employees. Provide timely assistance to employees in need. The employment system, including the salary system and incentive mechanism, has been established and improved to ensure that employees enjoy labor rights and fulfill labor obligations according to law. The state has established and improved the system of occupational safety and health, strictly implements the state regulations and standards on occupational safety and health, conducts education on occupational safety and health, provides occupational protection and health examination to employees, and provides them with a healthy and safe working and living environment, so as to prevent accidents at work and reduce occupational disease hazards to the greatest extent.

The company adheres to the principle of voluntariness, fairness, compensation of equivalent value, honesty and credit in its business activities, strictly controls the quality target, and ensures the provision of qualified products. The technical department of the company actively carries out the development of new products and new materials, and ensures that the various products or services provided by the company meet the relevant national quality standards or have been certified by the relevant national quality inspection departments, and actively applies for various third-party certifications at home and abroad. The company pays attention to customer after-sales service, and properly handles complaints and suggestions made by customers and consumers. Strictly conduct third-party qualification review and site inspection on suppliers, select qualified suppliers, carefully understand the needs of suppliers, and actively build a good cooperation atmosphere.

### **III. Consolidating and expanding poverty alleviation efforts and rural revitalization**

Send village cadres to the surrounding areas of Dalian City, support rural construction, assume social responsibilities, and constantly build strong village party organizations and strengthen party building work. Promote the work of strengthening villages and enriching people, implement projects benefiting agriculture, and increase the collective income of villages. We will improve the appearance and appearance of villages, raise the level of governance, do a good job in publicity and supervision, organize timely cleanup of garbage sites, improve the living environment, and build beautiful villages. Carry out the sunshine three affairs open, follow up to solve the problems left over by letters and visits, implement the basic farmland rehabilitation work, holiday and village two committee team members, carry out the "three prevention" work, care for the elderly, contact with hospitals and love organizations, health check-up for the elderly and so on.

## Chapter VI Important items

### I. Performance of commitments

1. Commitments made by the company's actual controller, shareholders, related parties, acquirer and related parties committed by the Company have been fulfilled during the reporting period or have not been fulfilled by the end of the reporting period

Applicable  Inapplicable

During the reporting period, the company does not have commitments that have been fulfilled by the actual controller, shareholders, related parties, acquirers, the company and other committed parties within the reporting period or have not been fulfilled by the end of the reporting period.

2. If there is a profit forecast for the assets or projects of the company and the reporting period is still in the profit forecast period, the company shall explain why the assets or projects meet the original profit forecast

Applicable  Inapplicable

### II. Non-operational appropriation of funds by controlling shareholders and other related parties to the listed company

Applicable  Inapplicable

During the reporting period, there is no non-operational appropriation of funds by controlling shareholders and other related parties to the listed company.

### III. Violation of external guarantee

Applicable  Inapplicable

The company has no violation of external guarantee during the reporting period.

### IV. Explanation of the Board of Directors on the latest "Non-standard audit Report"

Applicable  Inapplicable

### V. Explanation of the Board of Directors, supervisory Board and independent directors (if any) to the "non-standard audit report" of the accounting firm during the reporting period

Applicable  Inapplicable

### VI. Description of changes in accounting policies, accounting estimates or correction of significant accounting errors compared with the previous year's financial report

Applicable  Inapplicable

There is no change in accounting policies, accounting estimates or correction of major accounting errors during the reporting period.

### VII. Explanation of changes in the scope of consolidated statements as compared with the financial statements of the previous year

Applicable  Inapplicable

There is no change in the scope of consolidated statements during the reporting period.

### VIII. Employment and dismissal of accounting firms

Now employed accounting firm

Name of domestic accounting firm	LiXin Certified Public Accountants (Special General Partnership)
Remuneration of domestic accounting firm (ten thousand yuan)	70
The number of consecutive years of audit services provided by domestic accounting firms	2
Name of certified public accountant of domestic accounting firm	Cui Song Guo Yao Wu
The number of consecutive years of audit services provided by certified public accountants of domestic accounting firms	1

Whether to hire an accounting firm for the current period

yes  no

Internal control of audit and accounting firms, financial consultants or sponsors

Applicable  Inapplicable

#### IX. Delisting after the disclosure of the annual report

Applicable  Inapplicable

#### X. Matters related to bankruptcy reorganization

Applicable  Inapplicable

No bankruptcy reorganization related matters occurred during the reporting period.

#### XI. Major litigation and arbitration matters

Applicable  Inapplicable

Litigation (arbitration) basic information	Amount involved (Ten thousand yuan)	Whether an estimated liability is formed	Progress of litigation (arbitration)	Litigation (arbitration) adjudication result and influence	Execution of litigation (arbitration) judgments	Date of disclosure	Disclosure index
Summary of other litigation that occurred during the reporting period and was settled as of the end of this reporting period and did not meet the material litigation disclosure standard	51.7	none	Closed case	At the end of the reporting period Closed case	Completion of performance		
Summary of other litigation that occurred during the reporting period that was not settled as of the end of this reporting period and did not meet the material litigation disclosure standard	198.51	none	Closed case	At the end of the reporting period Outstanding case	Up to report		

#### XII. Punishment and rectification

Applicable  Inapplicable

There is no punishment or rectification during the reporting period.

#### XIII. Integrity status of the Company and its controlling shareholders and actual controllers

Applicable  Not applicable

#### XIV. Major connected transactions

##### 1. Related transactions related to daily operations

Applicable  Not applicable

During the reporting period, there were no related transactions related to the company's daily operations.

## **2. Related transactions arising from the acquisition or sale of assets or equity**

Applicable  Not applicable

During the reporting period, there were no related transactions involving the acquisition or sale of assets or equity.

## **3. Related transactions for joint foreign investment**

Applicable  Not applicable

No related transactions of joint foreign investment occurred during the reporting period.

## **4. Related creditor's rights and debts**

Applicable  Not applicable

Whether there are non-operational related creditor and debt transactions

Yes  No

The company does not have non-operational related debt transactions during the reporting period.

## **5. Dealings with related financial companies**

Applicable  Not applicable

There is no deposit, loan, credit granting or other financial business between the Company and the finance company and the related parties.

## **6. Transactions between the financial company controlled by the company and related parties**

Applicable  Not applicable

There is no deposit, loan, credit or other financial business between the finance company controlled by the Company and the related parties.

## **7. Other significant connected transactions**

Applicable  Not applicable

For the routine related party transactions, please refer to "Wafangdian Bearing Co., LTD. 's Announcement on the Expected Routine Related Party Transactions in 2024" disclosed by the Company on Juchao Information Website on April 30, 2024 and Section 10, Section 12, "Related Parties and Related Transactions" 5 "Related Party Transactions" of this report.

Major related transaction interim report disclosure website related inquiries

## **XV. Major contracts and their performance**

### **1. Trusteeship, contracting and leasing**

#### **(1) Custody**

Applicable  Inapplicable

There is no custody during the reporting period.

#### **(2) Contracting situation**

Applicable  Inapplicable

There is no contracting during the reporting period.

#### **(3) Lease situation**

Applicable  Inapplicable

Lease Information

The Company does not have any major lease contracts.

Projects that bring profit and loss for the company to reach more than 10% of the total profit of the company during the reporting period

Applicable  Inapplicable

During the reporting period, there is no leasing project whose profit and loss of the company reaches more than 10% of the total profit of the company during the reporting period.

**2. Major Guarantee**

Applicable  Inapplicable

There is no material guarantee during the reporting period.

**3. Cash asset management by entrusting others**

**(1) Entrusted financial management**

Applicable  Inapplicable

There is no entrusted financial management during the reporting period.

**(2) Entrusted loans**

Applicable  Inapplicable

There is no entrusted loan during the reporting period.

**4. Other major contracts**

Applicable  Inapplicable

There are no other major contracts during the reporting period.

**XVI.Explanation of other important matters**

Applicable  Inapplicable

There is no other major event that needs to be explained during the reporting period.

**Xvii. Major events of the company's subsidiaries**

Applicable  Inapplicable

## Chapter X Financial report

### I. Financial report

Types of Audit opinions	Standard unreserved opinion
Date of audit report signing	April 26, 2024
Name of audit institution	Lipan Certified Public Accountants (Special General Partnership)
Audit report number	Xin Kuai Shi Bao Zi [2024] No. ZE10289
Name of auditor	Cui Song, Guo Yaowu

### Auditor's Report

**To the Shareholders of Wafangdian Bearing Company Limited:**

#### Opinion

We have audited the accompanying financial statements of Wafangdian Bearing Company Limited (“Wafangdian Bearing Company”), which comprise the consolidated and company's balance sheets as at 31 December 2023, the consolidated and company's income statements, the consolidated and company's statements of cash flows, and the consolidated and company's statements of changes in owners' equity for the year then ended, and notes to the financial statements.

In our opinion, the accompanying financial statements present fairly, in all material respects, the consolidated and company's financial position as at 31 December 2023 and the consolidated and company's financial performance and cash flows for the year then ended in accordance with the requirements of Accounting Standards for Business Enterprises.

## Basis for Opinion

We conducted our audit in accordance with China Standards on Auditing (“CSAs”). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of Wafangdian Bearing Company in accordance with the Code of Ethics for Professional Accountants of the Chinese Institute of Certified Public Accountants (“CICPA Code”), and we have fulfilled our other ethical responsibilities in accordance with the CICPA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We identified the following key audit matters in our audit:

1. [Revenue recognition]
2. [Recoverability of accounts receivable]

Key Audit Matters	How these matters were addressed in the audit process
<p>1. [Revenue recognition]</p> <p>For details of the accounting policy for revenue recognition and analysis of revenue, please refer to the accounting policy described in Note (22) of the Notes to Consolidated Financial Statements "III. Significant Accounting Policies and Accounting Estimates" and Note (36) of the Notes to Consolidated Financial Statements.</p> <p>Revenue from sales of various types of bearings in the consolidated statements of operations of Wafangdian Bearing Company for fiscal 2023 amounted to CNY 2,093,582,371.38.</p> <p>Since revenues and profits from bearing sales have a significant impact on the Company's results, the recognition of revenues depends on the ability to properly assess whether the product sales satisfy the agreement on the conditions for the transfer of control in the sales contract. The complexity of the commercial agreements, however, requires separate judgment. For this reason, we identified revenue as a key audit matter.</p>	<p>The audit procedures we performed on revenue recognition consisted primarily of:</p> <ol style="list-style-type: none"> <li>1. Understanding, evaluating and testing the effectiveness of the design and implementation of management's key internal controls related to revenue recognition;</li> <li>2. Performing analytical review procedures to analyze the reasonableness of changes in revenue and gross profit margin;</li> <li>3. Select a sample to examine sales contracts, identify contractual provisions related to the transfer of control of goods, and evaluate whether the revenue recognition point of Wafangdian Bearing Company Corporation meets the requirements of the Enterprise Accounting Standards;</li> <li>4. Selecting samples of revenue transactions recorded during the year, verifying whether the book revenue, sales invoices and customer confirmation sheets are consistent, and evaluating whether the relevant revenue recognition is in accordance with the revenue recognition accounting policy of Wafangdian Bearing Company;</li> <li>5. Implementing correspondence to customers. The correspondence procedure includes correspondence on the balance of accounts receivable at the end of the customer's period as well as sales during the reporting period;</li> <li>6. For shipment records around the balance sheet</li> </ol>

Key Audit Matters	How these matters were addressed in the audit process
	date, select samples and check the supporting documents such as shipment records and customer acknowledgement slips to evaluate whether revenues are included in the appropriate period.
<p data-bbox="183 436 702 470">2. [Recoverability of accounts receivable]</p> <p data-bbox="183 470 790 739">For details of the accounting policies and analysis of accounts receivable, please refer to the accounting policies described in Note (ix) to the consolidated financial statements under "III. Significant Accounting Policies and Estimates" and Note (iv) to the consolidated financial statements under "V. ## Other Information

Management of Wafangdian Bearing Company ("Management") is responsible for the other information. The other information comprises all of the information included in the 2023 annual report of Wafangdian Bearing Company, other than the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact. We have nothing to report in this regard.

### **Responsibilities of Management and Those Charged with Governance for the Financial Statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with the requirements of Accounting Standards for Business Enterprises, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing Wafangdian Bearing Company's ability to continue as a going concern, disclosing, if applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Wafangdian Bearing Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing Wafangdian Bearing Company's financial reporting process.

### **Auditor's Responsibilities for the Audit of the Financial Statements**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with CSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with CSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- (1) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- (2) Obtain an understand of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.
- (3) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

(4) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Wafangdian Bearing Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause Wafangdian Bearing Company to cease to continue as a going concern.

(5) Evaluate the overall presentation (including the disclosures), structure and contents of the financial statements, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

(6) Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within Wafangdian Bearing Company to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and, where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## II. Financial statements

The unit of the statements in the financial notes is: yuan

### III. The basic information of company

Wafangdian Bearing Company Limited (the “Company”, the “Group” is referred to “Company” together with its subsidiaries) is a joint stock limited company established in the People’s Republic of China (the “PRC”) on 16 July, 1996. In the opinion of the directors, its parent and ultimate holding company is Wafangdian Bearing Group Company Limited (“Wazhou Group”).

The Company’s B shares have been listed on the Shenzhen Stock Exchange since 19 February, 1997.

The Company’s founding meeting and the first meeting of the first board of directors decided that the effective date of the shareholding system reorganization in the accounting of the Company (that is, the date of the establishment of the Company's accounts) was determined as April 1, 1997 on March 19, 1997.

The Company has obtained the business license of the enterprise legal person on March 20, 1997, and the registration number is DaGongShangQiFaZi24239971-2. The business scope includes the manufacture and sale of bearings, mechanical equipment, auto parts and related products.

The Company's B shares were officially listed on the Shenzhen Stock Exchange on March 25, 1997, raising funds of CNY406.58 million. After the issuance, the Company's registered capital was CNY330 million.

In accordance with the Supplementary Notice on Issues Concerning the Equity Distribution of Listed Companies under the Rules Governing the Listing of Stocks of the Shenzhen Stock Exchange (hereinafter referred to as the “Supplementary Notice”) issued by the Shenzhen Stock Exchange on August 30, 2006, based on the audited financial report on September 30, 2006, the Company implemented the conversion of capital reserve into share capital, giving 2.2 shares for every 10 shares, and the total share capital increased from 330 million shares to 402.6 million shares, of which Wazhou Group owned the legal person shares increased from 200 million shares to 244 million shares, accounting for 60.6% of the total share capital; the Swedish SKF Company increased from 65 million shares to 79.3 million shares, accounting for 19.7% of the total share capital; public shares increased from 65 million shares to 79.3 million shares, accounting for 19.7% of the total share capital. After the implementation of this plan, the Company's shareholding structure meets the requirements of the "Supplementary Notice" of the Shenzhen Stock Exchange.

The parent company is Wazhou Group. General shareholders meeting is the company’s authority and have the resolution power over company’s business policy, financing, investment and profit appropriation etc. significant events in accordance with relevant law. Board of directors is responsible for general meeting and has the power over the company’s decision making. Management is in charge of implementation of resolution made by general

meeting and board meeting and is responsible for operation management.

The company belongs to the bearing manufacturing industry, mainly engaged in the production and sales of various types of bearings. The addresses of the registered office and principal place of business of the Company are No. 1, Phrase 1, North Gongji Street, Wafangdian, Liaoning Province, and the PRC Legal representative is Liu Jun. Registered according to law, the business scope of the company is as follows: Licensed items: inspection and testing services, import and export of goods, import and export of technologies (for items subject to approval according to law, business activities can only be carried out after approval by relevant departments, and the specific business items shall be subject to the approval result) Bearing manufacturing, bearings, gears and transmission components manufacturing, high speed precision heavy-duty bearing sales, sales bearings, gears and transmission parts, bearing sales, general equipment manufacturing (excluding special equipment manufacturing), high-speed rail equipment, parts manufacturing, machinery and equipment sales, rail transportation equipment, key system and parts sales, sales of lubricating oil, high-speed rail equipment and accessories sales, Wind generators and spare parts sales, machinery parts, spare parts sales, railway locomotive vehicle accessories manufacturing, railway locomotive vehicle accessories sales, auto parts and accessories manufacturing, auto parts wholesale and retail auto parts, metal products repair, sales metal materials, metal products sales, metal surface treatment and heat treatment processing, quenching process, machinery parts and spare parts processing, land use right leasing, housing leasing, non-residential real estate leasing, mechanical equipment leasing, computer and communication equipment leasing, transportation equipment leasing service, office equipment leasing service, storage equipment leasing service, special equipment leasing, labor services (excluding labor dispatch), Technology service, technology development, technology consultation, technology exchange, technology transfer, technology popularization (with the exception of the projects subject to approval according to law, independently carry out business activities according to law with the business license).

These financial statements were approved by the Company's Board of Directors on April 26, 2024.

#### **IV. The basis for the preparation of financial statements**

##### **(1) Basis of preparation**

The financial statements have been prepared in accordance with the "Accounting Standards for Business Enterprises - Basic Standards" and various specific accounting standards, guidelines for the application of accounting standards for business enterprises, interpretations of accounting standards for business enterprises and other related regulations (hereinafter collectively referred to as "Accounting Standards for Business Enterprises") issued by the Ministry of Finance, as well as the relevant provisions of the "General Provisions on Financial Reporting, No. 15 of the Rules Governing the Preparation of Information Disclosures by Companies Issuing Public Securities" of the China Securities Regulatory Commission.

**(2) Going concern**

This financial statements are prepared on the assumption of going concern.

**V. Significant Accounting Policies and Accounting Estimates**

The group established the accounting policy and estimate, such as operation cycle, bad debt recognition and measurement, dispatched inventory measurement and classification of fixed assets and FA's depreciation, intangible asset's amortization, capitalization condition of research and development expenses, revenue recognition and measurement based on the actual characters of business operation.

**(1) Declaration for compliance with Accounting Standards for Business Enterprises**

The financial statements are prepared by the Group according to the requirements of Accounting Standards for Business Enterprises, and reflect the relative information for the financial position, operating performance, cash flow of the Group truly and fully.

**(2) Accounting period**

The Group adopts the Gregorian calendar year as accounting period, i.e. from Jan 1 to Dec 31.

**(3) Operating cycle**

Normal operating cycle refers to the duration starting from purchasing the assets for manufacturing up to cash or realization of cash equivalents. The group sets twelve months for one operating cycle and as the liquidity criterion for assets and liability.

**(4) Functional currency**

The Group adopts CNY as functional currency.

**(5) Accounting for business combination under same control and not under same control**

Business combinations under common control: Assets and liabilities acquired by the consolidating party in a business combination (including goodwill resulting from the acquisition of the consolidated party by the ultimate controlling party) are measured at the carrying value of the consolidated party's assets and liabilities in the consolidated financial statements of the ultimate controlling party at the date of the combination. The difference between the book value of the net assets acquired in the merger and the book value of the merger consideration paid (or the total nominal value of shares issued) is adjusted against the equity premium in capital surplus, and if the equity premium in capital surplus is not sufficient for elimination, retained earnings are adjusted.

Business combinations not under common control: The cost of the combination is the fair value of the assets paid, liabilities incurred or assumed and equity securities issued by the purchaser to obtain control of the acquiree at the date of acquisition. The difference between the cost of the

combination and the share of the fair value of the acquiree's identifiable net assets acquired in the combination is recognized as goodwill; the difference between the cost of the combination and the share of the fair value of the acquiree's identifiable net assets acquired in the combination is recognized in profit or loss for the period. Each identifiable asset, liability and contingent liability of the acquiree acquired in a merger that meets the recognition criteria is measured at fair value at the date of acquisition.

Directly related costs incurred for a business combination are recognized in profit or loss as incurred; transaction costs for issuing equity securities or debt securities for a business combination are included in the initial recognition amount of the equity securities or debt securities.

## **(6) Criteria for determining control and Method of preparation of consolidated financial statements**

### 1. Criteria for determining control

The scope of consolidation in the consolidated financial statements is determined on the basis of control, and the scope of consolidation includes the Company and all of its subsidiaries. Control means that the Company has power over the investee, enjoys variable returns through its participation in the investee's related activities, and has the ability to use its power over the investee to influence the amount of its returns.

### 2. Consolidation procedures

The Company considers the entire enterprise group as one accounting entity and prepares consolidated financial statements in accordance with uniform accounting policies to reflect the financial position, results of operations and cash flows of the enterprise group as a whole. The effects of internal transactions that occur between the Company and its subsidiaries and between subsidiaries are eliminated. If an internal transaction indicates an impairment loss on the related asset, the full amount of such loss is recognized. If the accounting policies and accounting periods adopted by a subsidiary are not consistent with those of the Company, the necessary adjustments are made in accordance with the Company's accounting policies and accounting periods when preparing the consolidated financial statements.

The share of ownership equity, net profit or loss for the period and comprehensive income for the period attributable to minority shareholders of the subsidiaries are presented separately in the consolidated balance sheet under the item of ownership equity, in the consolidated income statement under the item of net profit and in the consolidated statement of total comprehensive income, respectively. The balance resulting from the subsidiary's minority share of current loss exceeding the minority's share of the subsidiary's opening ownership interest is eliminated to reduce shareholders' equity.

## (1) Increase number of subsidiaries or operations

During the reporting period, if a subsidiary or business is added as a result of a business combination under the same control, the operating results and cash flows of the subsidiary or business from the beginning of the period in which the subsidiary or business is combined to the end of the reporting period are included in the consolidated financial statements, while the opening balance of the consolidated financial statements and the relevant items in the comparative statements are adjusted as if the consolidated reporting entity had existed since the point when the ultimate controlling party began to control it.

If control over an investee under the same control can be exercised due to additional investment, equity investments held prior to the acquisition of control over the investee are eliminated from the opening retained earnings or current profit or loss for the comparative statement period, respectively, for the relevant gains or losses, other comprehensive income and other changes in net assets recognized between the later of the date of acquisition of the original equity interest and the date when the consolidated party and the investee are under the same control and the date of consolidation.

During the reporting period, the addition of subsidiaries or operations as a result of a business combination not under common control is included in the consolidated financial statements from the date of acquisition based on the fair value of each identifiable asset, liability and contingent liability determined at the date of acquisition.

If, for example, additional investments enable the exercise of control over an investee not under common control, the equity interest in the investee held prior to the date of acquisition is remeasured at the fair value of that equity interest at the date of acquisition, and the difference between the fair value and its carrying amount is recognized as investment income for the current period. The difference between the fair value and its carrying amount is recognized as investment income for the period. The equity interest in the investee held prior to the date of acquisition is transferred to investment income for the period to which the equity interest is transferred under the equity method.

## (2) Disposal of subsidiaries

### ① General treatment

When control over an investee is lost due to disposal of part of the equity investment or other reasons, the remaining equity investment after disposal is remeasured at its fair value at the date of loss of control. The difference between the sum of the consideration received for the disposal of the equity interest and the fair value of the remaining equity interest, less the sum of the share of

the net assets of the original subsidiary calculated on a continuing basis from the date of acquisition or the date of consolidation in proportion to the original shareholding and goodwill, is recognized as investment income in the period in which control is lost. Other comprehensive income and other changes in owners' equity under the equity method of accounting related to the equity investment in the original subsidiary that can be reclassified to profit or loss in the future are transferred to investment income in the current period when control is lost.

## ② Step-by-step disposal of subsidiaries

Disposal of equity investments in subsidiaries through multiple transactions in steps until the loss of control, the terms and conditions of the disposal of equity investments in subsidiaries and the economic impact of each transaction is consistent with one or more of the following, usually indicating that the multiple transactions are a package deal:

- i. The transactions are entered into simultaneously or after taking into account their mutual effects;
- ii. These transactions as a whole to achieve a complete business result;
- iii. The occurrence of one transaction depends on the occurrence of at least one other transaction;
- iv. A transaction is not economical when viewed alone, but is economical when considered together with other transactions.

If each transaction is a package transaction, each transaction is accounted for as a disposal of a subsidiary and loss of control; the difference between the disposal price and the share of the net assets of the subsidiary corresponding to the disposal of the investment before the loss of control is recognized in the consolidated financial statements as other comprehensive income and is transferred to profit or loss in the period is lost when control is lost.

If each transaction is not a package transaction, the accounting treatment is based on partial disposal of the equity investment in the subsidiary without loss of control before the loss of control; upon the loss of control, the accounting treatment is based on the general treatment of disposal of subsidiaries.

## (3) Purchase of minority interests in subsidiaries

The difference between the newly acquired long-term equity investment due to the purchase of minority interest and the share of net assets of the subsidiary calculated in proportion to the newly acquired shareholding on an ongoing basis from the date of acquisition or the date of consolidation is adjusted to the equity premium in capital surplus in the consolidated balance sheet; if the equity premium in capital surplus is not sufficient for elimination, it is adjusted to

retained earnings.

#### (4) Partial disposal of equity investments in subsidiaries without loss of control

The difference between the disposal price and the share of net assets of the subsidiary calculated on a continuing basis from the date of acquisition or the date of consolidation corresponding to the disposal of the long-term equity investment is adjusted to the equity premium in capital surplus in the consolidated balance sheet, and if the equity premium in capital surplus is not sufficient to offset it, retained earnings are adjusted.

#### (7) Cash and cash equivalent

The cash listed on the cash flow statements of the Group refers to cash on hand and bank deposit. The cash equivalents refer to short-term (normally with original maturities of three months or less) and liquid investments which are readily convertible to known amounts of cash and subject to an insignificant risk of changes in value.

#### (8) Translation of foreign currency

##### 1. Foreign currency transaction

Foreign currency transactions are translated at the spot exchange rate issued by People's Bank of China ("PBOC") when the transaction incurs. Monetary assets and liabilities in foreign currencies are translated into RMB at the exchange rate prevailing at the balance sheet day. Exchange differences arising from the settlement of monetary items are charged as in profit or loss for the period. Exchange differences of specific borrowings related to the acquisition or construction of a fixed asset should be capitalized as occurred, before the relevant fixed asset being acquired or constructed is ready for its intended uses.

##### 2. Translation of foreign currency financial statements

Assets and liabilities in the balance sheet are translated using the spot rate of exchange at the balance sheet date; items in owners' equity, except for "undistributed earnings", are translated using the spot rate of exchange at the time of occurrence. Income and expense items in the income statement are translated using the spot exchange rate at the date of the transaction.

Upon disposal of a foreign operation, the difference in translation of the foreign currency financial statements relating to the foreign operation is transferred from owners' equity to profit or loss in the period of disposal.

#### (9) Financial instrument

The Company recognizes a financial asset, a financial liability or an equity instrument when it becomes a party to a financial instrument contract.

## 1. Classification of financial instruments

Based on the Company's business model for managing financial assets and the contractual cash flow characteristics of financial assets, financial assets are classified at initial recognition as financial assets carried at amortized cost, financial assets at fair value through other comprehensive income, and financial assets at fair value through profit or loss.

The Company classifies financial assets at amortized cost that are not designated as financial assets at fair value through profit or loss if they both meet the following criteria:

- (a) The business model is to collect the contractual cash flows;
- The contractual cash flows are only payments of principal and interest based on the outstanding principal amount.

The Company classifies financial assets as financial assets at fair value through other comprehensive income (debt instruments) that are not designated as at fair value through profit or loss if they also meet the following criteria:

- Operating model with the objective of both collecting the contractual cash flows and selling the financial asset;
- The contractual cash flows are only payments on the principal and interest based on the outstanding principal amount.

For investments in non-trading equity instruments, the Company may irrevocably designate them at initial recognition as financial assets at fair value through other comprehensive income (equity instruments). This designation is made on an individual investment basis and the related investment meets the definition of an equity instrument from the perspective of the issuer.

Except for the above-mentioned financial assets measured at amortized cost and financial assets at fair value through other comprehensive income, the Company classifies all remaining financial assets as financial assets at fair value through profit or loss. On initial recognition, the Company may irrevocably designate financial assets that would otherwise be classified as financial assets at amortized cost or at fair value through other comprehensive income as financial assets at fair value through profit or loss if it can eliminate or significantly reduce the accounting mismatch.

Financial liabilities are classified at initial recognition as financial liabilities at fair value through profit or loss and financial liabilities at amortized cost.

A financial liability may be designated as a financial liability at fair value through profit or loss at

initial measurement if one of the following conditions is met:

- (1) The designation eliminates or significantly reduces an accounting mismatch.
- 2) The management and performance evaluation of a portfolio of financial liabilities or a portfolio of financial assets and financial liabilities is performed on a fair value basis in accordance with the enterprise's risk management or investment strategy as set out in formal written documentation and reported to key management personnel on this basis within the enterprise.
- (3) The financial liability contains embedded derivatives that are subject to separate splitting.

## 2. Recognition basis and measurement method of financial instruments

### (1) Financial assets measured at amortized cost

Financial assets measured at amortized cost, including notes receivable, accounts receivable, other receivables, long-term receivables and debt investments, are initially measured at fair value, with related transaction costs included in the initial recognition amount; accounts receivable that do not contain significant financing components and those that the Company has decided not to consider financing components that do not exceed one year are initially measured at contractual transaction prices.

Interest calculated using the effective interest rate method during the holding period is recognized in profit or loss.

On recovery or disposal, the difference between the acquisition price and the carrying amount of the financial asset is recognized in profit or loss for the current period.

### (2) Financial assets at fair value through other comprehensive income (debt instruments)

Financial assets (debt instruments) at fair value through other comprehensive income include receivables financing and other debt investments, which are initially measured at fair value, with related transaction costs recognized in the initial recognition amount. The financial assets are subsequently measured at fair value, and changes in fair value are recognized in other comprehensive income, except for interest, impairment loss or gain and exchange gain or loss calculated using the effective interest rate method.

Upon derecognition, the cumulative gain or loss previously recognized in other comprehensive income is transferred from other comprehensive income and recognized in profit or loss for the current period.

(3) Financial assets at fair value through other comprehensive income (equity instruments)

Financial assets (equity instruments) at fair value through other comprehensive income, including investments in other equity instruments, are initially measured at fair value, with related transaction costs recognized in the initial recognition amount. The financial assets are subsequently measured at fair value, with changes in fair value recognized in other comprehensive income. Dividends received are recognized in current profit or loss.

Upon derecognition, the cumulative gain or loss previously recognized in other comprehensive income is transferred from other comprehensive income and recognized in retained earnings.

(4) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading, derivative financial assets and other non-current financial assets, which are initially measured at fair value, with related transaction costs recognized in profit or loss. The financial assets are subsequently measured at fair value, with changes in fair value recognized in profit or loss for the period.

(5) Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and derivative financial liabilities, which are initially measured at fair value, with related transaction costs recognized in profit or loss. The financial liabilities are subsequently measured at fair value, with changes in fair value recognized in profit or loss for the period.

Upon derecognition, the difference between the carrying amount and the consideration paid is recognized in profit or loss for the current period.

(6) Financial liabilities measured at amortized cost

Financial liabilities measured at amortized cost include short-term borrowings, notes payable, accounts payable, other payables, long-term borrowings, bonds payable and long-term payables, which are initially measured at fair value, with related transaction costs included in the initial recognition amount.

Interest calculated using the effective interest rate method during the holding period is recognized in profit or loss.

Upon derecognition, the difference between the consideration paid and the carrying amount of the financial liability is recognized in profit or loss for the current period.

### 3. Basis of recognition and measurement of financial asset derecognition and financial asset transfers

The Company derecognizes a financial asset when one of the following conditions is met:

- The contractual rights to receive cash flows from the financial asset are terminated;
- The financial asset has been transferred and substantially all the risks and rewards of ownership of the financial asset have been transferred to the transferring party;
- A financial asset has been transferred and control over the financial asset is not retained, although the Company neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset.

When the Company modifies or renegotiates a contract with a counterparty and the modification constitutes a material change, the original financial asset is derecognized and a new financial asset is recognized in accordance with the modified terms.

A financial asset is not derecognized if substantially all the risks and rewards of ownership of the financial asset are retained when a transfer of the financial asset occurs.

In determining whether a transfer of financial assets meets the above conditions for derecognition of financial assets, the principle of substance over form is applied.

The Company distinguishes between transfers of financial assets as a whole and partial transfers of financial assets. If the transfer of a financial asset as a whole meets the derecognition condition, the difference between the following two amounts is recognized in profit or loss for the current period:

- (1) The carrying amount of the financial asset transferred;
- (2) The sum of the consideration received for the transfer and the cumulative amount of changes in fair value previously recognized directly in owners' equity (in the case where the transferred financial asset is a financial asset (debt instrument) measured at fair value through other comprehensive income).

If a partial transfer of a financial asset satisfies the derecognition condition, the carrying amount of the financial asset transferred as a whole is apportioned between the derecognized portion and the unrecognized portion according to their respective relative fair values, and the difference between the following two amounts is recognized in profit or loss:

- (1) The carrying amount of the derecognized portion;
- (2) The sum of the consideration for the derecognized portion and the amount corresponding to the derecognized portion of the cumulative amount of changes in fair value previously recognized directly in owners' equity (in the case where the financial asset involved in the transfer is a financial asset (debt instrument) measured at fair value through other comprehensive income).

If the transfer of a financial asset does not meet the derecognition condition, the financial asset continues to be recognized and the consideration received is recognized as a financial liability.

#### 4. Derecognition of financial liabilities

A financial liability or a portion thereof is derecognized when the present obligation of the financial liability is discharged in whole or in part. If the Company enters into an agreement with a creditor to replace an existing financial liability by assuming a new financial liability, and the contractual terms of the new financial liability are materially different from those of the existing financial liability, the existing financial liability is derecognized and a new financial liability is recognized at the same time.

If all or part of the contractual terms of an existing financial liability are substantially modified, the existing financial liability or part of it is derecognized, and the modified financial liability is recognized as a new financial liability at the same time.

When a financial liability is derecognized in whole or in part, the difference between the carrying amount of the derecognized financial liability and the consideration paid (including non-cash assets transferred or new financial liabilities assumed) is recognized in profit or loss for the period.

If the Company repurchases a portion of a financial liability, the carrying amount of the financial liability as a whole is allocated on the repurchase date based on the relative fair values of the portion that continues to be recognized and the portion that is derecognized. The difference between the carrying amount allocated to the derecognized portion and the consideration paid (including non-cash assets transferred or new financial liabilities assumed) is recognized in profit or loss for the period.

#### 5. Methods to determine the fair value of financial assets and financial liabilities

The fair value of financial instruments for which there is an active market is determined by quoted prices in an active market. The fair value of financial instruments for which no active market exists is determined using valuation techniques. In valuation, the Company uses valuation techniques that are applicable in the current circumstances and supported by sufficient available data and other information, selects inputs that are consistent with the characteristics of the asset or

liability considered by market participants in transactions for the relevant asset or liability, and gives preference to the use of relevant observable inputs. Unobservable inputs are used only if the relevant observable inputs are not available or not practicable to obtain.

#### 6. Methods of testing and accounting for impairment of financial instrument

The Company estimates the expected credit losses on financial assets measured at amortized cost, financial assets at fair value through other comprehensive income (debt instruments) and financial guarantee contracts, etc.

The Company recognizes expected credit losses by calculating the probability-weighted amount of the present value of the difference between the cash flows receivable under the contract and the cash flows expected to be received, taking into account reasonable and substantiated information about past events, current conditions and forecasts of future economic conditions, weighted by the risk of default.

For receivables and contract assets resulting from transactions governed by ASBE No. 14, Revenue, the Company always measures its allowance for losses at an amount equal to the expected credit losses over the entire duration, regardless of whether or not there is a significant financing component.

For lease receivables resulting from transactions regulated by ASBE No. 21, "Leases," the Company has elected to always measure its allowance for losses at an amount equal to the expected credit losses over the entire duration.

For other financial instruments, the Company assesses at each balance sheet date the change in credit risk of the related financial instruments since initial recognition.

The Company assesses whether the credit risk of a financial instrument has increased significantly since initial recognition by comparing the risk of default of the financial instrument at the balance sheet date with the risk of default at the date of initial recognition to determine the relative change in the risk of default over the expected life of the financial instrument. The Company generally considers that the credit risk of a financial instrument has increased significantly if it is more than 30 days past due, unless there is conclusive evidence that the credit risk of the financial instrument has not increased significantly since initial recognition.

If the credit risk of a financial instrument is low at the balance sheet date, the Company considers that the credit risk of the financial instrument has not increased significantly since initial recognition.

If the credit risk of a financial instrument has increased significantly since initial recognition, the

Company measures the allowance for losses at an amount equal to the expected credit losses over the entire life of the financial instrument; if the credit risk of a financial instrument has not increased significantly since initial recognition, the Company measures the allowance for losses at an amount equal to the expected credit losses of the financial instrument in the next 12 months. The resulting increase or reversal amount of the loss allowance is recognized as an impairment loss or gain in profit or loss. For financial assets (debt instruments) that are measured at fair value through other comprehensive income, the allowance for losses is recognized in other comprehensive income and the impairment loss or gain is recognized in profit or loss for the current period and does not reduce the carrying amount of the financial asset as stated in the balance sheet.

If there is objective evidence that a accounts receivable is credit impaired, the Company provides for impairment of that accounts receivable on a stand-alone basis.

For receivables and contract assets resulting from transactions governed by ASBE No. 14 - Revenue (2017), the Company consistently measures its allowance for losses at an amount equal to the expected credit loss over the entire life of the asset, regardless of whether it contains a significant financing component.

For lease receivables, the Company has elected to always measure the allowance for losses at an amount equal to the expected credit loss over the entire life of the receivables.

In addition to certain financial assets that are assessed for past due credit losses on an individual basis, the Group also assesses expected credit losses on financial assets measured at amortized cost on the basis of an aging portfolio.

In addition to the above receivables that are individually provided for bad debts, the Company classifies the remaining financial instruments into portfolios based on credit risk characteristics and determines expected credit losses on a portfolio basis. The categories of portfolio and the basis for determining expected credit losses for notes receivable, accounts receivable, accounts receivable financing, and other receivables are described below:

Items	Portfolio Type	Basis of determination
Receivable 1	Ageing portfolio	Expected credit losses are calculated by referring to historical credit loss experience and preparing a table of accounts receivable aging against the expected credit loss rate over the entire life of the accounts receivable, taking into account current conditions and forecasts of future economic conditions.

Receivable 2	Related party portfolio	Provision for bad debts is not made in principle, unless there is clear evidence of a genuine impossibility of recovery in whole or in part
Note receivable 1	Bank acceptance	
Note receivable 2	Trade acceptance	
Note receivable 3	Finance company acceptance	
Financing receivable	Bank acceptance	
Other receivable 1	Related party portfolio	Provision for bad debts is not made in principle, unless there is clear evidence of a genuine impossibility of recovery in whole or in part
Other receivable 2	Aging portfolio	Expected credit losses are calculated by reference to historical credit loss experience, taking into account current conditions as well as forecasts of future economic conditions through default exposures and expected credit loss rates over the entire duration.
Other receivable 3	Risk free portfolio (according to counterparty's credit, nature of the payment and transactions secure facility)	

If the Company no longer has a reasonable expectation that the contractual cash flows from a financial asset will be fully or partially recovered, the carrying amount of the financial asset is written down directly.

## (10) Inventory

### 1. Category and cost of inventory

Inventories are classified as: raw materials, packaging, low-value consumables, work in process, and finished goods.

Inventory is initially measured at cost, and the cost of inventory includes the cost of purchase, processing costs and other expenses incurred in bringing the inventory to its current location and condition.

### 2. Valuation method of issued inventory

Inventories are valued on a real-time moving weighted-average basis when they are issued.

### 3. inventory system

Adoption of perpetual inventory system

#### 4. Amortization method of low-value consumables and packaging

- (1) Low-value consumables are amortized using the one-time reversal method;
- (2) The one-time reversal method is used for packaging.

#### 5. Recognition criteria and accrual method for provision for decline in value of inventories

At the balance sheet date, inventories should be measured at the lower of cost or net realizable value. When the cost of inventories is higher than their net realizable value, a provision for the impairment of inventory should be made. Net realizable value is the estimated selling price of inventories in the ordinary course of activities, less the estimated costs to be incurred to completion, estimated selling expenses and related taxes.

The net realizable value of finished goods, inventory and materials for sale, which are directly used for sale, is determined in the normal course of production and operation as the estimated selling price of the inventory, less estimated selling expenses and related taxes; the net realizable value of materials subject to processing is determined in the normal course of production and operation as the estimated selling price of the finished goods produced, less estimated costs to be incurred to completion, estimated selling expenses and related taxes. The net realizable value of inventories held for the execution of sales contracts or labor contracts is calculated on the basis of the contract price, and if the quantity of inventories held exceeds the quantity ordered in the sales contract, the net realizable value of the excess inventories is calculated on the basis of the general sales price.

After the provision for the impairment of inventory, if the factors affecting the previous write-down of inventory value have disappeared, resulting in the net realizable value of inventory higher than its book value, the amount of the provision for the impairment of inventory is reversed within the original provision, and the reversed amount is included in the current profit and loss.

### **(11) Contract assets**

#### 1. Methods and criteria for recognition of contract assets

The Company presents contract assets or contract liabilities in the balance sheet based on the relationship between the performance obligations and payments from customers. The right to receive consideration for goods transferred or services provided by the Company to the customer (and which is dependent on factors other than the passage of time) is presented as a contract asset. Contract assets and contract liabilities under the same contract are shown on a net basis. The Company's unconditional (depending only on the passage of time) right to receive consideration from customers is shown separately as receivables.

## 2. Method of determining expected credit losses on contract assets and accounting treatment

The methods of determining expected credit losses on contract assets and the accounting treatment are described in detail in Note "(ix) 6. Methods of testing and accounting treatment for impairment of Financial instrument" in this Note.

### **(12) Long-term equity investments**

#### 1. Criteria for determining joint control and significant influence

Joint control refers to the control shared by an arrangement in accordance with the relevant agreement, and the relevant activities of the arrangement can only be decided with the unanimous consent of the participants sharing the control. If the Company exercises joint control over an investee together with other joint venture parties and has rights to the investee's net assets, the investee is a joint venture of the Company.

Significant influence means having the power to participate in the financial and operating decisions of the investee, but not being able to control or exercise joint control with other parties over the formulation of those policies. Where the Company is able to exercise significant influence over an investee, the investee is an associate of the Company.

#### 2. Determination of initial investment

##### (1) Long-term equity investments resulting from business combinations

For long-term equity investments in subsidiaries formed by business combinations under common control, the initial investment of long-term equity investments is determined at the date of consolidation based on the acquisition of the share of the ownership interest of the consolidated party in the book value of the consolidated financial statements of the ultimate controlling party. The difference between the initial investment cost of the long-term equity investment and the carrying value of the consideration paid is adjusted against the equity premium in capital surplus; if the equity premium in capital surplus is not sufficient for elimination, retained earnings are adjusted. If the Company is able to exercise control over an investee under the same control due to additional investment, the difference between the initial investment cost of the long-term equity investment recognized in accordance with the above principle and the sum of the book value of the long-term equity investment before reaching the consolidation plus the book value of the consideration paid for further acquisition of shares at the date of consolidation is adjusted against equity premium, and if the equity premium is not sufficient for elimination, it is reduced against retained earnings.

For long-term equity investments in subsidiaries formed through business combinations not under

common control, the initial investment cost of the long-term equity investment is based on the cost of the combination determined at the date of acquisition. If it is possible to exercise control over the investee under non-same control due to additional investment, the sum of the book value of the equity investment originally held plus the cost of the additional investment is used as the initial investment cost.

(2) Long-term equity investments acquired through other means instead of business combination

Long-term equity investments acquired by cash payment are recorded at initial investment cost based on the actual purchase price paid.

Long-term equity investments acquired by issuing equity securities are recorded at the initial investment cost based on the fair value of the equity securities issued.

3. Subsequent measurement and profit or loss recognition methods

(1) Long-term equity investments accounted for under the cost method

The Company accounts for its long-term equity investments in subsidiaries using the cost method unless the investments meet the conditions of being held for sale. Except for the declared but unpaid cash dividends or profits included in the actual price or consideration paid for the investment, the Company recognizes investment income for the current period based on the Company's entitlement to the declared cash dividends or profits of the investee.

(2) Long-term equity investments accounted for under the equity method

Long-term equity investments in associates and joint ventures are accounted for using the equity method. The difference between the initial investment cost and the share of the fair value of the identifiable net assets of the investee at the time of investment is not adjusted to the initial investment cost of the long-term equity investment; the difference between the initial investment cost and the share of the fair value of the identifiable net assets of the investee at the time of investment is recognized in profit or loss for the current period and the cost of the long-term equity investment is also adjusted.

The Company recognizes investment income and other comprehensive income according to the share of net profit or loss and other comprehensive income realized by the investee, respectively, and adjusts the carrying value of the long-term equity investment at the same time; the portion to which the Company is entitled according to the profit or cash dividends declared by the investee is calculated, and the carrying value of the long-term equity investment is reduced accordingly; for the investee's ownership interest other than net profit or loss, other comprehensive income and profit distribution For changes in the equity of the investee other than net profit or loss, other

comprehensive income and profit distribution ("changes in other owners' equity"), the carrying amount of the long-term equity investment is adjusted and recognized in owners' equity.

In recognizing the share of the investee's net profit or loss, other comprehensive income and other changes in owners' equity, the fair value of the investee's identifiable net assets at the time of acquisition is used as the basis for recognition, and the net profit and other comprehensive income of the investee are adjusted in accordance with the Company's accounting policies and accounting periods.

Unrealized gains or losses on internal transactions between the company and associate and joint ventures that are attributable to the Company on the basis of their proportionate share are offset and investment income is recognized on this basis, except when the assets invested or sold constitute a business. Unrealized losses on internal transactions with investees are recognized in full if there are impairment losses on assets.

The net loss incurred by the company in a joint venture or an associate, except for the obligation to assume additional losses, is limited to a write-down to zero of the carrying amount of the long-term equity investment and other long-term interests that substantially constitute the net investment in the joint venture or associate. If the joint venture or associate subsequently realizes net profit, the Company resumes recognition of revenue sharing after the revenue sharing amount makes up for the unrecognized loss sharing amount.

### (3) Disposal of long-term equity investments

The difference between the carrying amount and the actual acquisition price of a long-term equity investment is recognized in profit or loss for the current period.

If a long-term equity investment accounted for under the equity method is partially disposed of and the remaining equity interest is still accounted for under the equity method, the other comprehensive income recognized under the former equity method is carried forward in proportion to the corresponding percentage using the same basis as the direct disposal of the related assets or liabilities by the investee, and other changes in owners' equity are carried forward in proportion to the current profit or loss.

If the common control or significant influence over the investee is lost due to the disposal of equity investments, etc., other comprehensive income recognized as a result of the adoption of the equity method of accounting for the original equity investment is accounted for on the same basis as the direct disposal of the related assets or liabilities of the investee upon the termination of the adoption of the equity method of accounting, and all changes in other owners' equity are transferred to current profit or loss upon the termination of the adoption of the equity method of

accounting.

If control over the investee is lost due to disposal of part of the equity investment, the remaining equity interest that can exercise joint control or significant influence over the investee is accounted for under the equity method in the preparation of individual financial statements, and the remaining equity interest is adjusted as if it had been accounted for under the equity method from the time of acquisition, and other comprehensive income recognized prior to the acquisition of control over the investee is accounted for on the same basis as if the investee had directly disposed of the related assets or liabilities. If the remaining equity interest cannot exercise joint control or significant influence over the investee, it is recognized as a financial asset, and the difference between its fair value and its carrying amount at the date of loss of control is recognized in profit or loss for the current period, and for other comprehensive income and other owner's equity recognized prior to the acquisition of control of the investee, the remaining equity interest is recognized in profit or loss for the current period. All other comprehensive income and other changes in owners' equity recognized prior to the acquisition of control of the investee are carried forward.

If the disposal of an equity investment in a subsidiary through multiple transactions until the loss of control is a package transaction, each transaction is accounted for as a disposal of an equity investment in a subsidiary and the loss of control; the difference between the disposal price and the carrying value of the long-term equity investment corresponding to the equity interest disposed of before the loss of control is recognized as other comprehensive income in the individual financial statements, and then recognized as other comprehensive income when control is lost. The difference between the disposal price and the carrying amount of the long-term equity investment before the loss of control is recognized as other comprehensive income in the individual financial statements, and then transferred to profit or loss in the period in which control is lost. If it is not a package transaction, each transaction is accounted for separately.

### **(13) Investment properties**

Investment properties are real estate held to earn rentals or for capital appreciation, or both, and include land use rights that have been leased out, land use rights that are held and intended to be transferred after appreciation, and buildings that have been leased out (including buildings that are used for leasing after completion of self-construction or development activities and buildings that are under construction or development that will be used for leasing in the future).

Subsequent expenditures related to investment properties are included in the cost of investment properties when the inflow of related economic benefits is probable and their costs can be measured reliably; otherwise, they are recognized in current profit or loss when incurred.

The Company uses the cost model to measure existing investment properties. The same

depreciation policy as that for the Company's fixed assets is applied to investment properties - buildings for lease that are measured under the cost model, and land use rights for lease are subject to the same amortization policy as that for intangible assets.

#### **(14) Fixed assets**

##### 1. Recognition and initial measurement of fixed assets

Fixed assets are tangible assets held for the production of goods, provision of services, rental or management, and with a useful life of more than one fiscal year and a unit value of more than CNY2,000. A fixed asset is recognized when both of the following conditions are met:

- (1) It is probable that the economic benefits associated with the fixed asset will flow to the enterprise;
- (2) The cost of the fixed asset can be measured reliably.

Fixed assets are initially measured at cost (taking into account the effect of expected disposal costs).

Subsequent expenditures related to fixed assets are included in the cost of fixed assets when it is probable that the economic benefits associated with them will flow to the enterprise and their cost can be measured reliably; for the replaced part, the carrying amount is derecognized; all other subsequent expenditures are charged to current profit or loss when incurred.

##### 2. Depreciation Method

Depreciation of fixed assets is provided using the average annual method, and the depreciation rate is determined based on the category of fixed assets, estimated useful life and estimated net residual value rate. For fixed assets with provision for impairment, the depreciation amount is determined in future periods based on the carrying amount after deducting the provision for impairment and based on the remaining useful life. If each component of fixed assets has different useful lives or provides economic benefits to the enterprise in different ways, different depreciation rates or depreciation methods are selected and depreciated separately.

The depreciation methods, useful lives, residual value rate and annual depreciation rates of various types of fixed assets are as follows:

Category	Useful life (years)	Estimated net residual value rate (%)	Annual depreciation rate (%)
<b>Housing and Buildings</b>			

Including: Houses, factories, cubicles, pipelines, roads	30	3	3.23
Waste storage	20	3	4.85
Machinery equipment	10	3	9.7
Transportation equipment	5	3	19.4
<b>Electronic equipment</b>

### 3. Disposal of fixed assets

Fixed assets are derecognized when they are disposed of, or when no economic benefits are expected to arise from their use or disposal. The disposal proceeds from the sale, transfer, scrapping or destruction of fixed assets, net of their book value and related taxes and fees, are recognized in profit or loss for the current period.

#### (15) Construction in progress

Construction in progress is measured at the actual cost incurred. Actual costs include construction costs, installation costs, borrowing costs eligible for capitalization and other necessary expenditures incurred to bring the construction in progress to its intended useable condition. Construction in progress is transferred to fixed assets and depreciated from the following month when it reaches its intended useable state.

#### (16) Intangible assets

##### 1. Valuation method of intangible assets

(1) The company initially measures intangible assets at cost when they are acquired;

The cost of an externally acquired intangible asset includes the purchase price, related taxes and other expenses directly attributable to bringing the asset to its intended use.

(2) Subsequent measurement

The useful life of an intangible asset is analyzed and determined at the time of acquisition.

For intangible assets with finite useful lives, they are amortized over the period in which they bring economic benefits to the enterprise; if the period in which the intangible assets bring economic benefits to the enterprise cannot be foreseen, they are considered to be intangible assets

with indefinite useful lives and are not amortized.

## 2. Estimation of useful lives of intangible assets with finite useful lives

For intangible assets with finite useful lives, they are amortized over the period that they will bring economic benefits to the enterprise; if it is not possible to foresee the period that the intangible assets will bring economic benefits to the enterprise, they are regarded as intangible assets with indefinite useful lives and are not amortized.

Land use rights are amortized equally over their useful lives from the date of grant; ERP software and other intangible assets are amortized equally over the shortest of their estimated useful lives, contractual beneficial lives and effective lives as prescribed by law. The amortization amount is charged to the cost of the related assets and to current profit or loss according to the target beneficiary. The estimated useful lives and amortization methods for intangible assets with finite useful lives are reviewed at the end of each year, and any changes are treated as changes in accounting estimates.

## 3. Scope of Research and Development Expenditures

The Company's expenses incurred in the process of conducting research and development include related staff salaries, materials consumed, related depreciation and amortization expenses and other related expenses of the personnel engaged in research and development activities, and are summarized as follows:

The relevant employee compensation of the personnel engaged in R&D activities mainly refers to the relevant employee compensation of the personnel directly engaged in R&D activities, the management personnel closely related to R&D activities and the direct service personnel.

Depreciation expense refers to the expense of depreciation of instruments, equipment and buildings in use for research and development activities. Long-term deferred expenses refer to long-term deferred expenses incurred in the course of alteration, modification, renovation and repair of research and development facilities.

Direct input expense refers to the related expenditure actually incurred by enterprises for the implementation of research and development activities. Including direct consumption of materials, fuel and power costs; Expenses for the operation, maintenance, adjustment, inspection, inspection and repair of instruments and equipment used in research and development activities, as well as lease fees for fixed assets rented through business leasing for research and development activities.

## 4. Specific criteria for classifying research and development phases

Expenditures on in-house research and development projects are categorized into research stage expenditures and development stage expenditures.

Research stage: the stage of original and planned investigation and research activities for the purpose of acquiring and understanding new scientific or technological knowledge.

Development phase: the stage of applying research results or other knowledge to a plan or design to produce new or substantially improved materials, devices, products and other activities before commercial production or use.

#### 5. The specific conditions for capitalization of development stage expenditures

Expenditures in the research stage are recognized in profit or loss when they are incurred. Expenditures in the development phase are recognized as intangible assets if the following conditions are met. Expenditures in the development phase that do not meet the following conditions are recognized in the current period's profit or loss:

- (1) It is technically feasible to complete the intangible asset so that it can be used or sold;
- (2) There is an intention to complete the intangible asset for use or sale;
- (3) The manner in which the intangible asset will generate economic benefits, including the ability to demonstrate the existence of a market for the products produced by applying the intangible asset or the existence of a market for the intangible asset itself, and the usefulness of the intangible asset if it will be used internally;
- (4) The availability of sufficient technical, financial and other resources to support the completion of the development of the intangible asset and the ability to use or sell the intangible asset;
- (5) Expenditures attributable to the development phase of the intangible asset can be measured reliably.

If it is not possible to distinguish between research-phase expenditures and development-phase expenditures, all research and development expenditures incurred are recognized in the current period's profit or loss.

#### **(17) Impairment of long term assets**

Long-term equity investments, investment properties measured using the cost model, fixed assets, construction in progress, right-of-use assets, intangible assets with finite useful lives, oil and gas assets and other long-term assets are tested for impairment if there is an indication of impairment at the balance sheet date. If the result of the impairment test indicates that the recoverable amount of an asset is less than its carrying amount, a provision for impairment is made for the difference and an impairment loss is recorded. The recoverable amount is the higher of the asset's fair value less costs of disposal and the present value of estimated future cash flows of the asset. The

provision for asset impairment is calculated and recognized on an individual asset basis. If it is difficult to estimate the recoverable amount of an individual asset, the recoverable amount of the asset group is determined using the asset group to which the asset belongs. An asset group is the smallest combination of assets that can generate cash inflows independently.

For goodwill resulting from business combinations, intangible assets with indefinite useful lives, and intangible assets that have not yet reached a serviceable status, impairment tests are performed once a year at the end of each year, regardless of whether there is an indication of impairment.

The Company conducts goodwill impairment tests and apportions the carrying value of goodwill formed as a result of a business combination to the relevant asset group from the date of purchase in accordance with a reasonable method; if it is difficult to apportion to the relevant asset group, it is apportioned to the relevant asset group combination. A relevant asset group or a combination of asset groups is an asset group or a combination of asset groups that can benefit from the synergistic effect of a business combination.

When impairment test of the relevant asset group or combination of asset groups that contain goodwill, if there is an indication of impairment of the asset group or combination of asset groups related to goodwill, the asset group or combination of asset groups that do not contain goodwill is first tested for impairment, the recoverable amount is calculated and compared with the relevant carrying amount, and a corresponding impairment loss is recognized. If the recoverable amount is less than the carrying amount, the impairment loss is first reduced by the carrying amount of goodwill apportioned to the asset group or group of assets, and then reduced by the carrying amount of each asset group or group of assets other than goodwill in proportion to its proportionate share of the carrying amount of the other assets. The carrying value of each asset is then reduced by the carrying value of each asset other than goodwill.

Once the above impairment loss is recognized, it will not be reversed in subsequent accounting periods.

#### **(18) Long-term amortization**

Long-term amortization is an expense that has been incurred but should be borne by the current and future periods and is apportioned over a period of more than one year. These costs are amortized evenly over the period of benefit. If an item of long-term amortization does not benefit subsequent accounting periods, the unamortized amortized value of the item is transferred to current profit or loss.

#### **(19) Contract liability**

An entity's obligation to transfer goods or services to a customer for which the entity has received

consideration (or the amount is due) from the customer. Contract asset and contract liability originate from same contact shall be listed at net amount.

## **(20) Employee compensation**

### 1. Accounting for short-term compensation

The Company recognizes actual short-term compensation incurred by employees as a liability in the accounting period in which the employees provide services to the Company, and recognizes it in the current profit or loss or the cost of related assets.

The social insurance premiums and housing fund paid by the Company for its employees, as well as the labor union funds and employee education funds withdrawn in accordance with regulations, are used to determine the corresponding amount of employee compensation in accordance with the prescribed accrual basis and accrual ratio during the accounting period in which the employees provide services to the Company.

Employee benefit expenses incurred by the Company are charged to current profit or loss or the cost of related assets based on the actual amount incurred when incurred, of which non-monetary benefits are measured at fair value.

### 2. Accounting for post-employment benefits

#### (1) Defined contribution plan

The Company contributes to basic pension and unemployment insurance for employees in accordance with the relevant local government regulations. During the accounting period in which the employees provide services to the Company, the amount payable is calculated based on the contribution base and ratio set by the local regulations, recognized as a liability, and charged to current profit or loss or cost of related assets. In addition, the Company participates in an enterprise annuity plan/supplemental pension fund approved by the relevant state authorities. The Company contributes a certain percentage of the employees' total salaries to the annuity plans/local social insurance agencies, and the corresponding expenses are recognized in the current profit or loss or cost of related assets.

#### (2) Defined benefit plans

The Company attributes the benefit obligations arising from the defined benefit plans to the period in which the employees render services in accordance with the formula determined by the expected accumulated benefit unit method, and recognizes them in current profit or loss or cost of related assets.

The deficit or surplus resulting from the present value of the defined benefit plan obligation less

the fair value of the defined benefit plan assets is recognized as a net defined benefit plan liability or net asset. If a defined benefit plan has a surplus, the Company measures the net defined benefit plan asset at the lower of the surplus or asset limit of the defined benefit plan.

All defined benefit plan obligations, including those expected to be paid within twelve months after the end of the annual reporting period in which employees render services, are discounted based on market yields on treasury bonds or high-quality corporate bonds in active markets that match the maturity and currency of the defined benefit plan obligations as of the balance sheet date.

The service cost incurred by the defined benefit plan and the net interest on the net liabilities or net assets of the defined benefit plan are recognized in profit or loss or the cost of the related assets; changes resulting from the remeasurement of the net liabilities or net assets of the defined benefit plan are recognized in other comprehensive income and are not reversed to profit or loss in subsequent accounting periods, and the entire portion previously recognized in other comprehensive income is carried forward to unrecognized earnings to the extent of equity upon termination of the original defined benefit plan. The portion of other comprehensive income within equity is transferred to unappropriated earnings upon termination of the defined benefit plan.

Upon settlement of a defined benefit plan, a gain or loss on settlement is recognized as the difference between the present value of the defined benefit plan obligation and the settlement price determined at the settlement date.

### 3.Accounting for termination benefits

If the Company provides termination benefits to employees, it recognizes employee compensation liabilities arising from termination benefits and recognizes them in profit or loss at the earlier of: when the Company cannot unilaterally withdraw termination benefits provided as a result of a termination plan or a proposed reduction in force; and when the Company recognizes costs or expenses related to a restructuring involving the payment of termination benefits.

#### **(21) Accrued liabilities**

The Company recognizes an obligation related to a contingent event as an accrued liabilities when the following conditions are simultaneously met:

- (1) The obligation is a present obligation assumed by the Company;
- (2) It is probable that the performance of the obligation will result in an outflow of economic benefits to the Company;

(3) The amount of the obligation can be measured reliably.

A provision is initially measured at the best estimate of the expenditure required to settle the related present obligation.

In determining the best estimate, the risks associated with the contingency, uncertainty and the time value of money are considered. Where the effect of the time value of money is material, the best estimate is determined by discounting the related future cash outflows.

Where a continuous range of expenditures required exists and it is equally probable that various outcomes will occur within that range, the best estimate is determined at the mid-point of the range; in other cases, the best estimate is treated separately as follows:

- Where the contingency relates to a single item, the best estimate is determined in accordance with the most probable occurrence amount.
- If the contingency involves multiple items, it is determined on the basis of various possible outcomes and related probabilities.

If all or part of the expenditure required to settle the estimated liability is expected to be reimbursed by a third party, the amount of reimbursement is recognized separately as an asset when it is substantially certain that it will be received, and the amount of reimbursement recognized does not exceed the carrying amount of the estimated liability.

The Company reviews the carrying amount of the estimated liability at the balance sheet date, and if there is conclusive evidence that the carrying amount does not reflect the current best estimate, the carrying amount is adjusted in accordance with the current best estimate.

## **(22) Revenue**

### **1. Accounting policies used for revenue recognition and measurement**

The Company recognizes revenue when it has fulfilled its performance obligations under a contract, i.e., when the customer obtains control of the relevant goods or services. The acquisition of control of the relevant goods or services is defined as the ability to dominate the use of the goods or services and derive substantially all of the economic benefits therefrom.

If a contract contains two or more performance obligations, the Company apportions the transaction price to each individual performance obligation on the contract commencement date in proportion to the relative share of the individual selling price of the goods or services promised by each individual performance obligation. The Company measures revenue based on the transaction price apportioned to each individual performance obligation.

The transaction price is the amount of consideration to which the Company expects to be entitled as a result of the transfer of goods or services to the customer, excluding amounts collected on behalf of third parties and amounts expected to be refunded to the customer. The Company determines the transaction price in accordance with the terms of the contract, taking into account its past customary practices, and considers the impact of variable consideration, the existence of significant financing components in the contract, non-cash consideration, and consideration payable to the customer in determining the transaction price. The Company determines the transaction price that includes variable consideration by an amount that does not exceed the amount for which it is highly probable that there will be no material reversal of the cumulative recognized revenue at the time the relevant uncertainty is removed. If there is a significant financing component in the contract, the Company determines the transaction price based on the amount payable in cash assuming that the customer will pay for the goods or services as soon as control is obtained, and amortizes the difference between this transaction price and the contract consideration using the effective interest rate method over the term of the contract. Performance obligations are fulfilled within a certain period of time if one of the following conditions is met, otherwise, performance obligations are fulfilled at a certain point in time:

- The customer obtains and consumes the economic benefits resulting from the Company's performance at the same time as the Company's performance.
- The customer is able to control the goods under construction in the course of the Company's performance.
- The goods produced in the course of the Company's performance have irreplaceable use and the Company is entitled to receive payment for the portion of the performance that has been completed to date in the aggregate throughout the term of the contract.

For performance obligations performed within a certain period of time, the Company recognizes revenue in accordance with the progress of performance during that period, except when the progress of performance cannot be reasonably determined. The Company uses the output method or input method to determine the progress of performance, taking into account the nature of the goods or services. When the progress of performance cannot be reasonably determined, the Company recognizes revenue in the amount of costs already incurred until the progress of performance can be reasonably determined, if the costs already incurred are expected to be reimbursed.

For performance obligations performed at a point in time, the Company recognizes revenue at the point in time when the customer obtains control of the related goods or services. In determining whether the customer has acquired control of the goods or services, the Company considers the following indications:

- The Company has a present right to receive payment for the goods or services, i.e., the customer has a present obligation to pay for the goods or services.
- The Company has transferred legal title to the goods to the customer, i.e., the customer has legal title to the goods.
- The Company has transferred physical possession of the goods to the customer, i.e. the customer has taken physical possession of the goods.
- The Company has transferred the principal risks and rewards of ownership of the goods to the customer, i.e., the customer has acquired the principal risks and rewards of ownership of the goods.
- The customer has accepted the goods or services, etc.

The Company determines whether its status is that of a principally liable person or an agent at the time of engaging in a transaction based on whether it has control over the goods or services prior to transferring them to the customer. If the Company is able to control the goods or services prior to transferring them to the customer, the Company is the principal and recognizes revenue based on the total consideration received or receivable; otherwise, the Company is the agent and recognizes revenue based on the amount of commissions or fees it expects to be entitled to receive.

## 2. Disclosure of specific revenue recognition and measurement methods by business type

Revenue from the sale of goods: The Group recognizes revenue from the sale of goods when the major risks and rewards of ownership of the goods have been transferred to the purchaser, the Group has neither retained the right of continued management normally associated with ownership nor exercised effective control over the goods sold, the amount of revenue can be measured reliably, it is probable that the related economic benefits will flow to the enterprise, and the related costs incurred or to be incurred can be measured reliably. Revenue from the sale of goods is realized.

Revenue from the transfer of assets: Revenue from the transfer of the right to use assets is recognized when it is probable that the economic benefits associated with the transaction will flow to the Group and the amount of revenue can be measured reliably.

### **(23) Contract Costs**

Contract costs include contract performance costs and contract acquisition costs.

Costs incurred by the Company to perform a contract that are not regulated by the relevant standards, such as inventories, fixed assets or intangible assets, are recognized as contract

performance costs as an asset when the following conditions are met:

- The cost is directly related to a contract that is currently or expected to be acquired.
- The cost increases the Company's resources available to meet future performance obligations.
- The cost is expected to be recovered.

Incremental costs incurred by the Company to acquire a contract that are expected to be recovered are recognized as a contract acquisition cost as an asset.

Assets related to contract costs are amortized using the same basis as revenue recognition for the goods or services to which the asset relates; however, for contract acquisition costs that are amortized over a period of less than one year, the Company recognizes them in profit or loss as incurred. If the carrying value of an asset related to the contract cost is higher than the difference between the following two items, the Company provides for impairment of the excess and recognizes an impairment loss on the asset:

1. the remaining consideration expected to be received for the transfer of the goods or services related to the asset
2. the estimated costs to be incurred for the transfer of such related goods or services.

If there is a subsequent change in the factors impaired in prior periods that causes the aforementioned difference to be higher than the carrying amount of the asset, the Company reverses the original provision for impairment and recognizes it in profit or loss, provided that the carrying amount of the asset after the reversal does not exceed the carrying amount of the asset at the date of reversal assuming no provision for impairment was made.

## **(24) Government grants**

### 1. Types

Government grants, which are monetary or non-monetary assets acquired by the Company from the government without compensation, are classified as asset-related government grants and revenue-related government grants.

Government grants related to assets are obtained by the Company for the acquisition and construction or otherwise forming long-term assets. Revenue-related government grants refer to government grants other than asset-related government grants.

The specific criteria for the Company to classify government grants as asset-related are:

government grants obtained by the Group and used for the acquisition and construction or otherwise forming long-term assets

The Company's specific criteria for classifying government grants as revenue-related are: government grants other than those related to assets

For those government grants for which the government documents do not specify the objects of the grants, the Company classifies the government grants as asset-related or revenue-related based on the following judgment: the Group makes judgment in accordance with the above-mentioned principles of differentiation, and if it is difficult to differentiate, the whole is classified as revenue-related government grants.

## 2. Recognition point

Government grants are recognized when the Company is able to meet the conditions attached to them and when they can be received.

## 3. Accounting treatment

Government grants related to assets are reduced to the carrying amount of the relevant assets or recognized as deferred income. If recognized as deferred income, it is recognized in profit or loss in accordance with a reasonable and systematic method in installments over the useful life of the relevant assets (if it is related to the Company's daily activities, it is recognized in other income; if it is not related to the Company's daily activities, it is recognized in non-operating income);

Government grants related to revenue, which are used to compensate the Company for relevant costs and expenses or losses in subsequent periods, are recognized as deferred revenue and charged to current profit or loss (to other income if they are related to the Company's ordinary activities; to non-operating income if they are not related to the Company's ordinary activities) or offset against relevant costs and expenses or losses in the period in which the relevant costs and expenses or losses are recognized; to compensate the Company for If it is used to compensate the Company for the related costs or losses incurred, it is directly recognized in profit or loss (other income if it is related to the Company's daily activities; non-operating income if it is not related to the Company's daily activities) or reduced by the related costs or losses.

### **(25) Deferred income tax assets and deferred income tax liabilities**

Income taxes consist of current income taxes and deferred income taxes. The Company recognizes current income tax and deferred income tax in profit or loss, except for income tax arising from business combinations and transactions or events directly recognized in owners' equity (including other comprehensive income).

Deferred income tax assets and deferred income tax liabilities are recognized based on the difference between the tax basis of assets and liabilities and their carrying amounts (temporary differences).

Deferred tax assets are recognized for deductible temporary differences to the extent that it is probable that taxable income will be available in future periods against which the deductible temporary differences can be utilized. For deductible losses and tax credits that can be carried forward to future years, deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible losses and tax credits can be utilized.

Deferred income tax liabilities are recognized for taxable temporary differences, except under special circumstances.

The special circumstances under which deferred tax assets or deferred tax liabilities are not recognized include

- Initial recognition of goodwill;
- Transactions or events that are neither business combinations nor, at the time of their occurrence, affect accounting profit and taxable income (or deductible losses), and for which the initial recognition of assets and liabilities does not result in taxable temporary differences and deductible temporary differences of an equivalent amount.

Deferred income tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries, associates and joint ventures, unless the Company is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax assets are recognized for deductible temporary differences associated with investments in subsidiaries, associates and joint ventures when it is probable that the temporary differences will reverse in the foreseeable future and it is probable that future taxable income will be available against which the deductible temporary differences can be utilized.

At the balance sheet date, deferred income tax assets and deferred income tax liabilities are measured at the tax rates applicable to the periods when the related assets are expected to be recovered or the related liabilities settled, in accordance with the tax laws.

At the balance sheet date, the Company reviews the carrying amount of deferred tax assets. The carrying amount of deferred tax assets is written down if it is more likely than not that sufficient taxable income will not be available in future periods to offset the benefit of the deferred tax assets. To the extent that it is probable that sufficient taxable income will be available, the written

down amount is reversed.

When there is a legal right to settle on a net basis and the intention is to settle on a net basis or to acquire assets and settle liabilities simultaneously, current income tax assets and current income tax liabilities are stated at the net amount after offsetting.

At the balance sheet date, deferred income tax assets and deferred income tax liabilities are presented on a net basis after offsetting when both of the following conditions are met:

- The taxable entity has the legal right to settle current income tax assets and current income tax liabilities on a net basis;
- Deferred income tax assets and deferred income tax liabilities relate to income taxes levied by the same tax authority on the same taxable entity or to different taxable entities, but in each future period in which it is significant that the deferred income tax assets and liabilities reverse, the taxable entities involved intend to settle the current income tax assets and liabilities on a net basis or to acquire the assets and The reversal of deferred income tax assets and liabilities is a significant transaction.

## **(26) Lease**

A lease is a contract in which the lessor cedes the right to use an asset to the lessee for a certain period of time for consideration. At the inception date of the contract, the Company assesses whether the contract is a lease or contains a lease. A contract is a lease or contains a lease if one party to the contract cedes the right to control the use of one or more identified assets for a certain period of time in exchange for consideration.

If a contract contains several separate leases, the Company splits the contract and accounts for each separate lease separately. If a contract contains both lease and non-lease components, the lessee and the lessor split the lease and non-lease components.

### **1. The Company as lessee**

#### **(1) Right-of-use assets**

At the commencement date of the lease term, the Company recognizes right-of-use assets for leases other than short-term leases and leases of low-value assets. Right-of-use assets are initially measured at cost. This cost includes:

- the initial measurement amount of the lease liability;
- the amount of lease payments made on or before the commencement date of the lease term, net

of amounts related to lease incentives taken if lease incentives exist;

- the initial direct costs incurred by the Company;
- costs that the Company expects to incur to disassemble and remove the leased asset, restore the site where the leased asset is located, or restore the leased asset to the condition agreed upon under the terms of the lease, excluding costs that are part of the costs incurred to produce the inventory.

The Company subsequently depreciates right-of-use assets using the straight-line method. If it is reasonably certain that ownership of the leased asset will be obtained at the end of the lease term, the Company depreciates the leased asset over its remaining useful life; otherwise, the leased asset is depreciated over the shorter of the lease term or the remaining useful life of the leased asset.

The Company determines whether a right-of-use asset is impaired and accounts for the identified impairment loss in accordance with the principles described in Note 3(17), "Impairment of Long-lived Assets".

## (2) Lease liabilities

The Company recognizes a lease liability for leases other than short-term leases and leases of low-value assets at the commencement date of the lease term. Lease liabilities are initially measured at the present value of the outstanding lease payments. Lease payments consist of

- fixed payments (including material fixed payments), net of amounts related to lease incentives, if lease incentives exist;
- variable lease payments that are dependent on an index or rate;
- payments expected to be payable based on the residual value of the guarantee provided by the company;
- the exercise price of the purchase option, provided that the company reasonably determines that it will exercise the option;
- the amount to be paid upon exercise of the option to terminate the lease, provided that the lease term reflects that the Company will exercise the option to terminate the lease.

The Company uses the interest rate embedded in the lease as the discount rate, but if the interest rate embedded in the lease cannot be reasonably determined, the Company's incremental borrowing rate is used as the discount rate.

The Company calculates the interest expense on the lease liability for each period of the lease term based on a fixed periodic interest rate, which is included in the current profit or loss or the cost of the related asset.

Variable lease payments that are not included in the measurement of the lease liability are charged to current profit or loss or the cost of the related assets when they are actually incurred.

After the commencement date of the lease term, the Company remeasures the lease liability and adjusts the corresponding right-of-use asset if the carrying value of the right-of-use asset has been reduced to zero, but the lease liability still needs to be further reduced, the difference is recognized in profit or loss for the current period:

- When there is a change in the valuation of the purchase option, lease renewal option or termination option, or when the actual exercise of the aforementioned options is not consistent with the original valuation, the Company remeasures the lease liability at the present value calculated by the changed lease payments and the revised discount rate;
- When there is a change in the substantive fixed payment amount, a change in the amount expected to be payable for the guaranteed residual value, or a change in the index or rate used to determine the lease payment amount, the Company remeasures the lease liability at the present value calculated from the changed lease payment amount and the original discount rate. However, if the change in the lease payment amount results from a change in the floating interest rate, the present value is calculated using the revised discount rate.

### (3) Short-term leases and leases of low-value assets

The Company has elected not to recognize right-of-use assets and lease liabilities for short-term leases and leases of low-value assets, and to recognize the related lease payments in current profit or loss or the cost of the related assets on a straight-line basis over each period of the lease term. Short-term leases, which are leases with a lease term of not more than 12 months at the commencement date of the lease term and do not include a purchase option. Low-value asset leases, which are leases with a lower value when the single leased asset is a brand-new asset. If the company subleases or expects to sublease the leased assets, the original lease is not a low-value asset lease.

### (4) Change of lease

If a lease is changed and the following conditions are met at the same time, the company will account for the lease change as a separate lease:

- the lease modification expands the scope of the lease by adding the right to use one or more

leased assets;

- The increased consideration is equivalent to the separate price of the expanded portion of the lease adjusted for the circumstances of that contract.

If a lease modification is not accounted for as a separate lease, at the effective date of the lease modification, the company reapportioned the consideration of the modified contract, redetermined the lease term, and remeasured the lease liability based on the present value of the modified lease payments and the revised discount rate.

If a lease change results in a reduction in the scope of the lease or a shortening of the lease term, the Company reduces the carrying value of the right-of-use asset accordingly and recognizes the gain or loss related to partial termination or complete termination of the lease in profit or loss for the current period. If other lease changes result in the remeasurement of the lease liability, the Company adjusts the carrying value of the right-of-use asset accordingly.

## 2. The Company as lessor

At the commencement date of the lease, the Company classifies leases into finance leases and operating leases. A finance lease is a lease that transfers substantially all the risks and rewards associated with ownership of the leased asset, regardless of whether ownership is ultimately transferred. Operating leases refer to leases other than finance leases. When the Company acts as a sublease lessor, it classifies the sublease based on the right-to-use assets arising from the original lease.

### (1) Accounting for operating leases

Lease receipts under operating leases are recognized as rental income on a straight-line basis over each period of the lease term. The Company capitalizes the initial direct costs incurred in connection with operating leases and apportions them to current profit or loss over the lease term on the same basis as rental income is recognized. Variable lease payments that are not included in the lease receipts are recognized in current profit or loss when they are actually incurred. If a change in an operating lease occurs, the Company accounts for it as a new lease from the effective date of the change, and the amount of lease payments received in advance or receivable in connection with the lease before the change is regarded as the amount of payments received under the new lease.

### (2) Accounting for finance leases

On the commencement date of the lease, the Company recognizes finance lease receivables for finance leases and derecognizes finance lease assets. When the Company makes initial

measurement of the finance lease receivable, the net lease investment is used as the recorded value of the finance lease receivable. The net lease investment is the sum of the unguaranteed residual value and the present value of the lease receipts not yet received at the commencement date of the lease term discounted at the interest rate embedded in the lease.

The Company calculates and recognizes interest income for each period of the lease term based on a fixed periodic interest rate. Derecognition and impairment of finance lease receivables are accounted for in accordance with Note 3 (ix) "Financial Instruments" of this note.

Variable lease payments that are not included in the net lease investment measurement are recognized in profit or loss when they are actually incurred.

If a change in a finance lease occurs and the following conditions are met, the Company accounts for the change as a separate lease:

- the change expands the scope of the lease by adding the right to use one or more leased assets;
- the increased consideration is equivalent to the separate price of the expanded portion of the lease adjusted for the circumstances of that contract.

If a change in a finance lease is not accounted for as a separate lease, the Company treats the changed lease separately in the following circumstances:

- If the change becomes effective on the lease commencement date and the lease would be classified as an operating lease, the Company accounts for it as a new lease from the effective date of the lease change and uses the net investment in the lease prior to the effective date of the lease change as the carrying amount of the leased asset;
- If the change becomes effective on the lease commencement date and the lease is classified as a finance lease, the Company accounts for the lease in accordance with the policy on modification or renegotiation of contracts as described in Note 3 (ix) Financial Instruments.

### 3. Sale and leaseback transactions

The Company assesses whether the transfer of assets in sale-and-leaseback transactions is a sale in accordance with the principles described in Note 3(22) "Revenue".

#### (1) As a lessee

If the transfer of assets in a sale-and-leaseback transaction is a sale, the Company, as the lessee, measures the right-of-use asset resulting from the sale-and-leaseback at the portion of the carrying

value of the original asset that relates to the right-of-use acquired by the leaseback and recognizes a gain or loss only for the right transferred to the lessor; if the transfer of assets in a sale-and-leaseback transaction is not a sale, the Company, as the lessee, continues to recognize the transferred asset and at the same time recognizes a financial liability equal to the transfer proceeds. The company continues to recognize the transferred asset as a lessee and at the same time recognizes a financial liability equal to the transferred revenue. For details of the accounting treatment of financial liabilities, please refer to Note 3 (9) "Financial Instruments".

(2) As lessor

If the transfer of assets in a sale-and-leaseback transaction is a sale, the Company accounts for the purchase of the assets as a lessor and accounts for the lease of the assets in accordance with the aforementioned policy "2. If the transfer of assets in a leaseback transaction is not a sale, the Company, as the lessor, does not recognize the transferred asset, but recognizes a financial asset equal to the transferred revenue. For details of the accounting treatment of financial assets, please refer to Note 3 (9) "Financial Instruments".

**(27) Debt restructuring**

1. The Company as a creditor

The Company derecognizes a claim when the contractual right to receive cash flows from the claim is terminated. If a debt restructuring is carried out by settling the debt with assets or converting the debt into an equity instrument, the Company recognizes the related assets when they meet the definition and recognition criteria.

For debt restructuring by means of settlement of debts with assets, the Company initially recognizes the transferred non-financial assets at cost. The cost of inventories includes the fair value of the relinquished claims and other costs directly attributable to bringing the asset to its present location and condition, such as taxes, transportation, handling and insurance. The cost of an investment in an associate or joint venture includes the fair value of the relinquished claim and other costs such as taxes directly attributable to the asset. The cost of investment property, including the fair value of the relinquished claims and other costs such as taxes directly attributable to the asset. The cost of property, plant and equipment includes the fair value of the relinquished claim and other costs directly attributable to the asset, such as taxes, transportation, loading and unloading, installation, and professional services, incurred before the asset is brought to its intended useable condition. The cost of biological assets, including the fair value of the relinquished claim and other costs directly attributable to the asset, such as taxes, transportation, and insurance. The cost of intangible assets, including the fair value of the relinquished claims and other costs directly attributable to taxes incurred in bringing the asset to its intended use. If a debt restructuring by way of conversion of debt into an equity instrument results in the creditor

converting the claim to an equity investment in an associate or a joint venture, the Company measures the initial investment cost of the claim at the fair value of the relinquished claim and other costs, such as taxes, that are directly attributable to the asset. The difference between the fair value of the relinquished claim and its carrying amount is recognized in profit or loss.

If debt restructuring is carried out by modifying other terms, the Company recognizes and measures the restructured claims in accordance with "III. (IX) Financial Instruments" in this note.

For debt restructuring using multiple assets or a combination of assets, the Company first recognizes and measures the transferred financial assets and restructuring claims in accordance with "III. (IX) Financial instruments" in this note, and then, in proportion to the fair value of each asset other than the transferred financial assets, recognizes a net gain or loss on the fair value of the claims net of the amount recognized for the transferred financial assets and restructuring claims. The fair value of each asset other than the transferred financial assets is then allocated to the net amount after deducting the recognized amount of the transferred financial assets and the restructuring claim in proportion to the fair value of each asset, and the cost of each asset is determined separately on this basis in accordance with the aforementioned method. The difference between the fair value and the carrying amount of the abandoned claims shall be recognized in profit or loss for the current period.

## 2. The Company as debtor

The Company derecognizes a debt when the present obligation of the debt is discharged.

For debt restructuring by way of settlement of debts with assets, the Company derecognizes the relevant assets and debts settled when the conditions for derecognition are met, and the difference between the carrying amount of the debts settled and the carrying amount of the assets transferred is recognized in profit or loss for the current period.

For debt restructuring by converting debt to equity instruments, the Company derecognizes the debt when the debt settled meets the conditions for derecognition. The Company initially recognizes an equity instrument at the fair value of the equity instrument. If the fair value of the equity instrument cannot be reliably measured, it is measured at the fair value of the debt settled. The difference between the carrying amount of the debt settled and the amount recognized for the equity instrument shall be recognized in profit or loss for the current period.

If debt restructuring is carried out by modifying other terms, the Company recognizes and measures the restructured debt in accordance with "III (IX) Financial Instruments" in this note.

When debt restructuring is carried out by using multiple assets to settle debts or by combining them, the Company recognizes and measures equity instruments and restructured debts in

accordance with the aforementioned method, and the difference between the carrying amount of the debt settled and the sum of the carrying amount of the transferred assets and the amounts recognized for equity instruments and restructured debts is recognized in profit or loss for the current period.

## (28) Methodology for determining materiality criteria and basis for selection

Items	Materiality criterion
Significant single provision for bad debt accounts receivable	Where there is solid evidence that a credit impairment has occurred on an account receivable, the amount is not expected to be recovered or is unlikely to be recovered, a single provision is made for doubtful debts and expected credit losses are recognized
Accounts receivable The amount of provision for recovery or repatriation of current doubtful accounts is significant	If there is solid evidence that the credit risk of the accounts receivable separately accrued in the previous period has decreased significantly, the future cash flow of the accounts receivable shall be predicted according to the reassessed credit risk, and the increased cash flow difference shall be reversed, and the amount of the reversal shall be included in the current profit or loss.
Write off significant receivables for the period	For receivables which have solid evidence that they cannot be recovered in whole or in part, the portion which cannot be recovered shall be regarded as bad debt loss and the provision for bad debts already drawn shall be written off; If the provision for bad debts is insufficient to be written off, the difference in bad debt losses shall be included in the current profit or loss.

## (29) Changes in significant accounting policies and accounting estimates

### 1. Changes in significant accounting policies

Implementation of ASBE Interpretation No. 16, "Accounting for Deferred Taxes on Assets and Liabilities Arising from a Single Transaction to Which the Initial Recognition Exemption Does Not Apply".

The Ministry of Finance issued "Interpretation No. 16 of the Accounting Standards for Business Enterprises" ("Interpretation No. 16") on November 30, 2022 (Caijing [2022] No. 31, hereinafter referred to as "Interpretation No. 16"), which stipulates that the "Accounting treatment of deferred income taxes related to assets and liabilities arising from a single transaction that are not exempt from initial recognition" shall be implemented from November 30, 2022 onwards. The "Accounting Treatment for Deferred Taxes on Assets and Liabilities Arising from Individual Transactions that are not Subject to the Initial Recognition Exemption" is effective from January 1, 2023 onwards.

Interpretation No. 16 stipulates that for a single transaction that is not a business combination and does not affect either accounting profit or taxable income (or deductible losses) at the time the transaction occurs, and for which the initial recognition of assets and liabilities results in the

creation of taxable temporary differences and deductible temporary differences in equal amounts (including lease transactions in which the lessee initially recognizes a lease liability on the commencement date of the lease term and includes it in the assets with the right of use, and transactions in which the lessee initially recognizes a lease liability for a fixed asset or other asset and includes it in the assets with the right of use), and in which there is an abandonment obligation for a fixed asset or other asset, the initial recognition of an asset or a liability is excluded. The exemption from initial recognition of deferred tax liabilities and deferred tax assets does not apply to individual transactions (including lease transactions in which the lessee initially recognizes a lease liability and credits it to the right-of-use asset on the commencement date of the lease term, as well as individual transactions in which the lessee recognizes a projected liability and credits it to the cost of the relevant asset due to the existence of an abandonment obligation for a fixed asset, etc.), and the enterprise shall recognize the corresponding When the transaction occurs, the enterprise should recognize the corresponding deferred tax liabilities and deferred tax assets in accordance with the relevant provisions of "ASBE No. 18 - Income Taxes" and other relevant regulations.

If taxable temporary differences and deductible temporary differences arise from a single transaction to which this provision applies that occurs between the beginning of the earliest period for which the financial statements are presented for the first time and the date of its application, as well as lease liabilities and right-of-use assets recognized at the beginning of the earliest period for which the financial statements are presented as a result of a single transaction to which the provision applies and the recognition of projected liabilities related to abandonment obligations and the corresponding related assets, enterprises shall make adjustments in accordance with this provision. companies should make adjustments in accordance with this provision.

The Company implemented this provision from January 1, 2023, and the implementation of this provision did not have a significant impact on the Company's financial position and results of operations.

## 2. Changes in significant accounting estimates

There were no changes in the Company's significant accounting estimates during the reporting period.

## VI. Taxation

### 1. The main applicable tax and rate to the Group as follows:

Tax	Tax base	Tax rate
Value-added tax (VAT)	The output tax is calculated on the basis of the income from the sale of goods and taxable services calculated in accordance with the provisions of the tax law, and after deducting the input tax allowed to be deducted in the current period, the difference is the value-added tax payable	13%,9%,6%,5%
City construction tax	Value-added tax payables	7%

<b>Tax</b>	<b>Tax base</b>	<b>Tax rate</b>
Education surcharge	Value-added tax payables	3%
Local education surcharge	Value-added tax payables	2%
Enterprise income tax (EIT)	Current period taxable profit	15% or 25%
Real estate tax	70% of cost of own property or revenue from leasing property	1.2% or 12%
Land use tax	Land using right area	CNY 6 per square meter

Notes: EIT rate for different tax payer

<b>Tax principles</b>	<b>EIT rate</b>
Wafangdian Bearing Co., Ltd	15%
Wazhou Liaoyang Bearing construction Co., Ltd	15%
Dalian Wazhou Precision Motor Car Bearing Company Limited	25%
Wazhou Precision of Spherical Roller Bearings (Wafangdian) Co., Ltd	25%

## 2. Tax preference

On December 3, 2020, the Company obtained the qualification of high-tech enterprise certification, high-tech enterprise certification certificate number is GR202021200656, valid for 3 years, according to the tax law, can enjoy the preferential tax policy of enterprise income tax levied at a tax rate of 15% within 3 years.

The subsidiary Waxiang Liaoyang Bearing Manufacturing Co., Ltd. obtained the qualification of high-tech enterprise identification on December 20, 2023, and the high-tech enterprise identification certificate number is GR202321002020, valid for 3 years, and can enjoy the preferential tax policy of levying enterprise income tax at a tax rate of 15% within 3 years according to the tax law.

Notes receivable with bad debt provision based on the characters of credit risk portfolio:

Combined accrual items:

Aging	Closing Balance		
	Accounts receivable	Provision for bad debts	Proportion (%)
Within 1 year	784,002,240.34	39,234,462.24	5.00
1-2 years	69,545,383.46	6,954,538.35	10.00
2-3 years	23,076,562.45	4,615,312.49	20.00
3-4years	9,116,525.49	4,558,262.75	50.00
4-5years	1,334,211.66	1,067,369.33	80.00
Over 5 years	2,243,064.15	2,243,064.15	100.00
Related Party Portfolio	255,793,030.43		
<b>Total</b>	<b>1,145,111,017.98</b>	<b>58,673,009.30</b>	

3. Provision for bad debts charged off, reversed or recovered during the period:

Category	Opening balance	Change during the year			Closing Balance
		Accrued	Collect/carry over	Written-off	
Provision for bad debt	135,308,007.64	7,732,014.97	1,249,854.25	10,771,134.09	131,019,034.27
<b>Total</b>	<b>135,308,007.64</b>	<b>7,732,014.97</b>	<b>1,249,854.25</b>	<b>10,771,134.09</b>	<b>131,019,034.27</b>

4. Accounts receivable written off in current period:

Item	Written-off Amount
Accounts receivable written off	10,771,134.09

Significant amount written off:

Company name	Nature of receivable	Amount	Reason	Procedure to be performed	Related party
Wafangdian Bearing Group Special Steel Co.,Ltd	Trade payment	5,092,669.00	Unable to recover	Internal approval	N
Shandong Hengji New Material Co.,Ltd	Trade payment	2,284,666.96	Unable to recover	Internal approval	N
Henan Taihang Vibration Machinery Co.,Ltd	Trade payment	989,207.41	Unable to recover	Internal approval	N
Shaanxi Hande Axle Co.,Ltd	Trade payment	309,157.59	Unable to recover	Internal approval	N

Zibo Boshan Qianjin Reducer Factory Co.,Ltd	Trade payment	244,579.32	Unable to recover	Internal approval	N
Taizhou Luqiao Meitian Motorcycle Co.,Ltd	Trade payment	200,562.00	Unable to recover	Internal approval	N

Shijiazhuang Electric Machinery Co.,Ltd	Trade payment	172,543.31	Unable to recover	Internal approval	N
Shenyang SAIC Jinbei Automobile Transmission Co.,Ltd	Trade payment	109,908.15	Unable to recover	Internal approval	N
<b>Total</b>		<b>9,938,079.21</b>			

## 5、The top five significant accounts receivable categorized by debtors:

Debtors name	Closing Balance			Proportion of total closing balance (%)	Receivable bad debts & contractual assets impairment
	Receivable	Contractual assets	Total		
Wafangdian Bearing Group Corporation and subsidiaries	255,377,958.78		255,377,958.78	20.98	
China National Railway Group Corporation and subsidiaries	65,328,867.27		65,328,867.27	5.37	3,315,586.02
China Railway Group Corporation (CRGC)and subsidiaries	46,806,964.33		46,806,964.33	3.84	2,640,533.11
Dalian Heavy Industry Crane Group Corporation and subsidiaries	38,058,776.35		38,058,776.35	3.13	2,022,930.49
China Shipbuilding Industry Materials Southwest Co.,Ltd	23,949,683.21		23,949,683.21	1.97	1,276,968.12
<b>Total</b>	<b>429,522,249.94</b>		<b>429,522,249.94</b>	<b>35.29</b>	<b>9,256,017.74</b>

## v. Financing receivable

## 1.Receivables financing

Items	Closing Balance	Opening Balance
Bank acceptance	55,546,474.87	30,996,930.63
<b>Total</b>	<b>55,546,474.87</b>	<b>30,996,930.63</b>

## 2.Changes in receivables financing during the period and changes in fair value

Items	Opening Balance	New in this period	Derecognition during the period	Closing Balance	Accumulated provision for losses recognized in other comprehensive income
Bank acceptance	30,996,930.63	45,546,474.87	30,996,930.63	45,546,474.87	
<b>Total</b>	<b>30,996,930.63</b>	<b>45,546,474.87</b>	<b>30,996,930.63</b>	<b>45,546,474.87</b>	

## 3.Pledged receivable financing up to the end of year

Items	Amount
Bank acceptance	10,000,000.00
<b>Total</b>	<b>10,000,000.00</b>

## 4.Receivable financing endorsed or discounted but not mature at the end of year

Items	Amount derecognized at end of period	Amounts not derecognized at the end of the period
-------	--------------------------------------	---

Items	Amount derecognized at end of period	Amounts not derecognized at the end of the period
Bank acceptance	356,497,666.90	
<b>Total</b>	<b>356,497,666.90</b>	

#### vi. Prepayment

##### 1. Aging of advances to suppliers

Items	Closing Balance		Opening Balance	
	Amount	Percentage (%)	Amount	Percentage (%)
Within 1 year	14,347,294.97	84.70	52,055,924.36	98.40
1 to 2 years	2,423,315.53	14.30	543,392.56	1.03
2 to 3 years	169,282.17	1.00	301,749.09	0.57
More than 3 years				
<b>Total</b>	<b>16,939,892.67</b>	<b>100.00</b>	<b>52,901,066.01</b>	<b>100.00</b>

##### 2. The top five significant advances to suppliers categorized by debtors

Company name	Closing Balance	Proportion of receivable (%)
Daye Special Steel co.,Ltd	7,130,802.81	42.09
Fushun Special Steel Co., Ltd	3,039,178.58	17.94
Wafangdian Bearing Power Co., Ltd	1,367,700.54	8.07
Ben Steel Plate Co., Ltd	1,058,384.41	6.25
Northeast Special Steel Group Co., Ltd	1,010,862.63	5.97
<b>Total</b>	<b>13,606,928.97</b>	<b>80.32</b>

#### vii. Other receivables

Items	Closing Balance	Opening Balance
Interest receivable	-	-
Dividend receivable	-	-
Other receivable	9,403,175.09	10,555,282.33
<b>Total</b>	<b>9,403,175.09</b>	<b>10,555,282.33</b>

##### 1. Other receivables

###### (1) Disclosure by aging:

Aging	Closing Balance	Opening Balance
Within 1 year (including 1 year)	5,467,667.70	8,149,792.09
1-2 years	3,088,808.31	3,131,360.53
2-3 years	2,110,239.68	520,211.96
3-4 years	302,195.88	254,121.72
4-5 years	89,830.61	119,264.25

Over 5 years	6,046,915.80	5,508,712.55

<b>Income tax expense</b>	<b>-51,211.91</b>

## **ii. Earnings per share**

### 1. Basic earnings per share

Basic earnings per share is calculated by dividing consolidated net income attributable to ordinary shareholders of the parent by the weighted average number of ordinary shares of the Company in issue:

Items	Current period	Previous period
Consolidated net income attributable to ordinary shareholders of the parent	-99,478,593.08	-139,897,498.87
Weighted average number of common shares of the Company issued and outstanding	402,600,000.00	402,600,000.00

Basic earnings per share	-0.25	-0.35
Include: Basic earnings per share from continuing operations	-0.25	-0.35
Basic earnings per share from discontinued operations		

## 2. Diluted earnings per share

Diluted earnings per share is calculated by dividing the consolidated net income attributable to ordinary shareholders of the parent (diluted) by the weighted average number of ordinary shares of the Company in issue (diluted)

Items	Current period	Previous period
Consolidated net income attributable to ordinary shareholders of the parent (diluted)	-99,478,593.08	-139,897,498.87
Weighted average number of common shares of the Company issued and outstanding (diluted)	402,600,000.00	402,600,000.00
Diluted earnings per share	-0.25	-0.35
Include: Diluted earnings per share from continuing operations	-0.25	-0.35
Diluted earnings per share from discontinued operations		

### iii. Notes on Cash Flow

#### 1. Cash related to operating activities

##### (1) Other cash received in connection with operating activities

Items	Current period	Previous period
Interest income	930,938.31	160,520.69
Government Grants	4,502,681.93	1,135,700.85
Current payments	19,680,468.66	25,104,985.62
Refund of deposits and reserve funds	31,095.23	1,526,175.87
Others	9,636,711.88	16,430,341.88
<b>Total</b>	<b>34,781,896.01</b>	<b>44,357,724.91</b>

##### (2) Other cash paid in connection with operating activities

Items	Current period	Previous period
Selling expenses	42,765,692.93	43,467,830.64

<b>Total</b>	<b>6,503,503.15</b>	<b>5,244,292.60</b>	<b>1,259,210.55</b>

**ii. Liability items involving government grants**

Liability items	Opening Balance	New grants	Recognized in non-operating income	Transferred to other gains	Charged to costs	Other changes	Closing Balance	Asset-related/revenue-related
Deferred income	48,324,479.14	205,869.15		5,430,167.89			43,100,180.40	Asset-related

**XI. Risk Related to Financial Instruments****i. Types of risks arising from financial instruments**

The Company is exposed to a variety of financial risks in the course of its operations: credit risk, liquidity risk and market risk (including exchange rate risk, interest rate risk and other price risks).

**1. Credit risk**

Credit risk is the risk that the counterparty will fail to fulfill its contractual obligations and cause the Company to incur a financial loss.

The carrying amount of recognized financial assets in the consolidated balance sheet; for financial instruments measured at fair value, the carrying amount reflects the risk exposure, but not the maximum risk exposure, which will change with future changes in fair value.

In order to reduce credit risk, the Group has set up a special department to determine credit limits, conduct credit approvals and perform other

The Group has established a special department to determine credit limits, conduct credit approvals and implement other monitoring procedures to ensure that necessary measures are taken to recover overdue claims. In addition, the Group reviews the collection status of each individual receivable at each balance sheet date to ensure that adequate provision for bad debts is made for uncollectible amounts. As a result, the management of the Group considers that the Group's exposure to credit risk is significantly reduced.

The Group's liquidity is placed with banks with high credit ratings, therefore, the credit risk of liquidity is low.

The Group has adopted necessary policies to ensure that all sales customers have good credit history. Except for the accounts receivable amount

The Group has no other significant credit concentration risk except for the top five amounts of accounts receivable.

The total amount of the top five accounts receivable: RMB314 million.IX. Fair value disclosures.

## 2. Liquidity risk

Liquidity risk is the risk that an enterprise will experience a shortage of funds to meet its obligations that are settled by delivery of cash or other financial assets.

The Group manages liquidity risk by ensuring that there is sufficient liquidity to meet obligations as they fall due without incurring unacceptable losses or causing damage to the enterprise's reputation. The Group regularly analyzes the structure and maturity of its liabilities to ensure adequate funding. The management of the Group monitors the utilization of bank borrowings and ensures compliance with the borrowing agreements. It also negotiates with financial institutions for financing in order to maintain a certain credit line and minimize liquidity risk.

The undiscounted contractual cash flows of each of the Company's financial liabilities by maturity date are set out below:

items	Closing Balance					Total undiscounted contract amount	Book value
	Immediate reimbursement	Within1 year	1-2 years	2-5 years	Over 5 years		
Short-term loans		598,000,000.00				598,000,000.00	598,000,000.00
Notes payable		460,840,218.52				460,840,218.52	460,840,218.52
Long-term loans			99,450,000.00			99,450,000.00	99,450,000.00
<b>Total</b>		<b>1,058,840,218.52</b>	<b>99,450,000.00</b>			<b>1,158,290,218.52</b>	<b>1,158,290,218.52</b>

items	Opening Balance					Total undiscounted contract amount	Book value
	Immediate reimbursement	Within1 year	1-2 years	2-5 years	Over 5 years		
Short-term loans		699,000,000.00				699,000,000.00	699,000,000.00
Notes payable		462,446,562.00				462,446,562.00	462,446,562.00
<b>Total</b>		<b>1,161,446,562.00</b>				<b>1,161,446,562.00</b>	<b>1,161,446,562.00</b>

## 3. Market risk

Market risk of a financial instrument is the risk that the fair value or future cash flows of the financial instrument will fluctuate because of changes in market prices, including exchange rate risk, interest rate risk and other price risks.

### (1) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Group's risk of changes in cash flows from financial instruments due to changes in interest rates relates mainly to variable-rate bank borrowings. The Group's policy is to maintain floating interest rates on these borrowings.

### (2) Exchange rate risk

Exchange rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Group's exposure to foreign exchange risk relates primarily to the U.S. dollar, and the Group's major export operations are settled in U.S. dollars. As at December 31, 2023, except for the balances of monetary items in foreign currencies in this Note V. (54), the Group's assets and liabilities were in RMB. The foreign exchange risk arising from these assets and liabilities with foreign currency balances may have an impact on the Group's results of operations.

The Company's exposure to exchange rate risk mainly arises from financial assets and financial liabilities denominated in U.S. dollars, and the amounts of foreign-currency financial assets and foreign-currency financial liabilities translated into Renminbi are set out below:

items	Closing Balance			Opening Balance		
	US dollar	Other foreign currency	Total	US dollar	Other foreign currency	Total
Currency funds	25,441,589.96	16,058,483.62	41,500,073.57	40,360,595.18	16,970,554.13	57,331,149.31
Accounts receivable	11,684,283.87	2,386,464.94	14,070,748.81	6,119,680.29	1,346,740.61	7,466,420.90
<b>Total</b>	<b>37,125,873.83</b>	<b>18,444,948.56</b>	<b>55,570,822.38</b>	<b>46,480,275.47</b>	<b>18,317,294.74</b>	<b>64,797,570.20</b>

### (3) Other price risks

As of December 31, 2023, the Group's purchased bearing components may be subject to price fluctuations.

Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices other than exchange rate risk and

interest rate risk.

## ii. Transfer of financial assets

### 1. Transfers of financial assets

Method of transferring financial assets	Transferred financial assets		Status	Basis of judgment
	Nature	Amount		
Notes endorsed and outstanding	Bank acceptance	302,155,516.10	Non-derecognition	
Notes endorsed and outstanding	Finance company acceptance	12,011,143.08	Non-derecognition	
Notes endorsed and outstanding	Trade acceptance	43,099,544.33	Non-derecognition	
<b>Total</b>		<b>357,266,203.51</b>		

### 2. Financial assets derecognized due to transfers

items	Modalities for the transfer of financial assets	Amount	Associated gains or losses
Receivables financing		356,497,666.90	
<b>Total</b>		<b>356,497,666.90</b>	

## XII. Fair value disclosures

The inputs used in fair value measurements are divided into three levels:

Level 1 inputs are unadjusted quoted prices in active markets for identical assets or liabilities that are available at the measurement date.

Level 2 inputs are inputs other than Level 1 inputs that are directly or indirectly observable for the related asset or liability.

Level 3 inputs are unobservable inputs for the relevant asset or liability.

The level to which the fair value measurement results belong is determined by the lowest level to which the inputs that are significant to the fair value measurement as a whole belong.

### i. Closing fair value of assets and liabilities measured at fair value

items	F V at the year end			Total
	1st Level FV Measurement	2nd Level FV Measurement	3rd Level FV Measurement	
<b>I. Continuously measured at FV</b>				
◆ Tradable financial asset	214,178.33			214,178.33
1. Financial assets at fair value through profit or loss	214,178.33			214,178.33
(1) Equity instrument investment	214,178.33			214,178.33
◆ Receivables financing		55,546,474.87		55,546,474.87
<b>Total assets measured at fair value on an ongoing basis</b>	214,178.33	55,546,474.87		55,760,653.20

**ii. Basis for determining the market value of continuing and discontinued Level 1 fair value measurement items**

The Group obtains the unadjusted closing price on the public stock exchange at December 31, 2023 for its investment in certain equity instruments included in financial assets held for trading.

**XIII . Related Parties Relationship and Transactions**

**i. Status of the Wafangdian Bearing Company Limited's parent company**

Parent company	Registered address	Business nature	Registered capital	Shareholding percentage	Voting power percentage

#### **XIV. Commitments and contingencies**

As of December 31, 2023, the Group has significant commitments or material contingencies that do not require disclosure.

#### **XV. Events after the Balance Sheet Date**

Until the financial report date, there is no significant post balance sheet event for disclosure.

#### **XVI. Other Significant Events**

##### **i. Major impact of the implementation of the "Rules Governing the Preparation of Information Disclosure by Publicly Offered Securities Companies No. 15 - General Provisions on Financial Reporting (Revised in 2023)**

In preparing these financial statements, the Company disclosed the relevant financial information in accordance with the requirements of "No. 15 Rules for Information Disclosure Preparation and Reporting of Companies with Publicly Issued Securities - General Provisions on Financial Reporting (Revised in 2023)" issued by the China Securities Regulatory Commission on December 22, 2023, except for financial instruments, inventories, operating income, cash flow, research and development expenditure, government grants and other items, the implementation of this provision did not have a significant impact on the format of disclosure of key financial data for comparable accounting periods for other items.

##### **ii. Others**

In addition to the above matters, as of December 31, 2023, there are other important matters that the Group is not required to disclose.

#### **XVII. Notes to the Main Items of the Financial Statements of Parent Company**

**i. Accounts receivable**

(1). Accounts receivable with the bad debt provisions under accounting aging analysis method

Aging	Closing Balance	Opening balance
Within 1 year	951,468,006.08	976,123,178.58
