The Group's Vision 本集團展望

Looking back on 2025, the global economy moved forward amid turbulence, filled with uncertainties and opportunities. Considering the drastic economic fluctuations across the globe as a result of, among other things, the on-going Sino-US tensions, the Russo-Ukrainian war and the tension in the Middle East, various uncertainties may affect the prospects of the Group's business. However, the Group will continue to work together and seek business opportunities to expand revenue streams, enhance the Group's value. Meanwhile, natural disasters caused by climate change are becoming increasingly frequent and severe. This series of difficulties and challenges has kept international and public attention highly focused on environmental, green energy, and climate issues.

The Chinese government continues to place a strong focus on environmental and climate issues. The National Development and Reform Commission has mandated provinces to conduct energy conservation reviews for enterprises consuming over 10,000 tons of standard coal annually within 2025. By the end of 2025, this review scope will be expanded to include enterprises consuming over 5,000 tons of standard coal annually, covering about 70% of energy consumption and carbon emissions. The "14th Five-Year Plan" has also established several binding indicators for energy conservation and carbon reduction, including a 13.5% decrease in energy consumption per unit of GDP and an 18% reduction in carbon dioxide emissions per unit of GDP by 2025. These objectives further intensify the requirements for energy conservation and emissions reduction in the manufacturing sector, encouraging enterprises to accelerate the adoption of advanced environmental protection technologies and equipment.

回顧二零二五年，全球經濟在動盪中前行，充滿了變數與契機。考慮到中美關係持續緊張、俄烏戰爭及中東局勢緊張等因素導致全球經濟劇烈波動，各種不確定因素可能影響本集團業務的前景。然而，本集團將繼續共同努力，尋求商機，以擴大收入來源，提高本集團的價值。此外，氣候變化帶來的天然災害日益頻發及嚴重。一連串的困難和挑戰使國際及大眾對環境、綠色能源和氣候議題持續高度關注。

中國政府持續關注環境氣候議題。國家發改委已要求各省於二零二四年內對年耗能1萬噸標準煤以上的企業進行節能審查。到二零二五年底，審查範圍將擴大到年消耗5,000噸標準煤以上的企業，覆蓋約70%的能源消耗及碳排放。「十四五」規劃亦確定了多項節能減碳的約束性指標，包括到二零二五年每單位GDP能耗下降13.5%，每單位GDP二氧化碳排放下降18%。該等目標進一步強化了製造業節能減排的要求，鼓勵企業加快採用先進的環保技術及設備。

The Group's Vision 本集團展望

The policy focus is on the green transformation of the manufacturing sector, including the promotion of process improvements in energy-intensive and high emission industries. The State Council's "Action Plan for the Green Transformation of Manufacturing" emphasizes on enhancing the application of environmental protection technologies and equipment to improve the level of clean production within industries. The government has established a special environmental protection fund to support the research and application of super-large dust collectors, particularly in the technological upgrades of high-pollution industries. Environmental protection agencies have further strengthened their oversight of heavily polluting industries, requiring the installation of advanced dust collection equipment to meet ultra-low emission standards. These measures provide strong policy support and market assurance for the super-large dust collector industry.

In view of this, the Group firmly believes that under the national goal of green and low-carbon transformation, the domestic environmental protection industry will develop rapidly, and the environmental protection and emission reduction industry will continue to be one of the important strategic industries with great development prospects. With our advanced technology and rich industry experience, plus a stable workplace and professional, competent team, the Group's business will have better development and opportunities in the future.

政策重點是製造業的綠色轉型，包括促進高耗能、高排放行業的工藝改進。國務院《製造業綠色轉型行動計劃》強調加強環保技術裝備應用，提高工業清潔生產水準。此外，中國政府已設立環保專項基金，支持超大型除塵器的研究及應用，尤其是高污染行業的技術升級。環保部門已進一步加強對重污染行業的監管，要求安裝先進的除塵設備，以達到超低排放標準。該等措施為超大型除塵器行業提供了強有力的政策支持及市場保障。

有見及此，本集團深信在國家綠色低碳轉型的目標下，國內環保產業將迅速發展，環保減排產業將繼續成為重要戰略性產業之一，具有極大的發展前景。憑藉我們先進的技術與豐富的行業經驗，加上穩定的工作場所和專業精幹的工作團隊，集團業務未來將有更好的發展及機遇。

Hazardous Waste

The Group strictly follows the “National Directory of Hazardous Wastes” to identify hazardous wastes that pose a hazard in the production process and may endanger human or environmental health, including waste paint buckets. To ensure minimal pollution when dealing with hazardous waste, we have established a “Hazardous Waste Environmental Monitoring Policy” and implemented appropriate and consistent measures. All hazardous wastes will be stored in a special hazardous waste storage room in the factory after collection, and entrusted to a legal institution with professional qualifications to collect and handle hazardous waste, to ensure that hazardous waste will not cause leakage or environmental pollution before being recycled.

Non-Hazardous Waste

To reduce the environmental burden of its business operations, the Group is committed to minimising the generation of non-hazardous waste across both production and office activities. On the production lines, metal scraps such as waste steel are collected for recycling and sold to third-party recyclers, thereby enabling comprehensive resource reutilisation. In office management, the main types of waste generated are paper and stationery. The Group not only implements mechanisms for waste separation, collection and compliant disposal, but also actively promotes green office practices by encouraging double-sided printing and enhancing recycling facilities, guiding employees to work together towards waste-reduction goals.

USE OF RESOURCES

Our primary resource usage consists of purchased electricity, diesel, and unleaded gasoline. We are committed to reducing energy consumption and improving energy efficiency, pledging to reduce electricity usage. During the Reporting Period, we have continuously taken the following measures:

- Set electrical appliances and electronic equipment to energy-saving mode;
- Installed and used energy-efficient and temperature-controlled air conditioning; and
- Turn on the air conditioner only when the ambient temperature is 25 degrees or above.

有害廢棄物

本集團嚴格按照《國家危險廢物名錄》識別於生產過程中具有造成危險、可能危害人類或環境健康的有害廢棄物，當中包括廢油漆桶。為確保在處理有害廢物時把污染減至最低，我們已制定《危險廢物環境監測制度》，並採取合適及統一的措施。所有有害廢棄物在經過收集後需先存放在廠區內特設的危險廢物暫存間，再委託具有專業資格處理危險廢物的合法機構進行回收及處置，確保有害廢棄物在回收前不會造成洩漏或環境污染。

無害廢棄物

為降低業務對環境的負擔，本集團致力在生產及辦公環節全面減少無害廢棄物的產生。在生產線上，我們將產生的廢鋼等金屬碎屑進行回收並轉售予第三方回收商，實現資源的綜合再利用。在辦公室管理方面，產生的廢棄物以紙張及文具為主。我們不僅落實分類收集與合規處置機制，更大力提倡環保辦公習慣，透過推廣雙面列印及優化回收設施，引導員工共同實踐減廢目標。

資源使用

我們的主要資源使用為外購用電、柴油及無鉛汽油。我們致力減少能耗及提升能源使用效率，承諾減少用電。報告期間，我們持續採取下列措施：

- 將電器及電子設備設置為節能模式；
- 安裝並使用符合節能效益及恆溫空調；及
- 僅在環境溫度為25度或以上時方開啟空調。

Water Resources and Sewage Discharge

The main water consumption of the Group's business operations is used for employees' domestic water, canteen water, water-based paint thinners and cooling water from rainwater harvesting. Sewage mainly comes from domestic sewage, production process does not produce a large amount of industrial wastewater. Water is purchased from the local water supply, so there is no issue in sourcing the applicable water source. During the Reporting Period, the Group's water consumption data is as follows:

To minimize pollution of water resources, wastewater from flushing toilets is treated through septic tanks, and wastewater from canteens is treated with grease traps, such wastewater is properly treated by sewage treatment facilities before being discharged into surrounding rivers.

We regard water as a precious resource and are committed to improving the Group's overall water efficiency and reducing water consumption through various measures, including posting water conservation tips in office areas, toilets, and pantries to promote the message of cherishing water resources among our employees.

水資源及污水排放

本集團於業務營運中主要用水為員工生活用水、食堂用水、水性油漆稀釋劑用水及來自雨水收集的冷卻用水。污水主要來自生活污水，生產過程所產生的工業廢水量較小。由於用水均購自於當地的供水機構，我們於求取適用水源上並無任何問題。報告期間，本集團的用水數據如下：

為盡量減少對水資源的污染，沖廁所用的廢水會經化糞池處理、食堂廢水則會經隔油池處理後，經過污水處理設施妥善處理後排放至周邊河道。

我們視水為珍貴資源，致力通過多項措施提高集團整體用水效率及減少耗水，包括在辦公區、洗手間及茶水間張貼節約用水的提示，向員工宣揚珍惜用水的訊息。

Additionally, we periodically communicate environmental protection messages to employees through environmental reminders, workshops, and training activities to raise their environmental awareness.

環境及天然資源

本集團深明環境對業務營運及企業發展的重要性，致力於環境保護，減少溫室氣體排放和廢棄物產生，並承諾減少用電。另外，我們不定時通過張貼環保提示、工作坊及培訓活動等方式，向員工傳達環境保護的訊息，以提高他們的環保意識。

Climate Change

氣候變化

The Group is keenly aware that the physical and transition risks arising from climate change are reshaping the operating environment. Whether in the form of increasingly frequent and severe natural disasters, or through China's "dual-carbon" targets and HKEX's progressively enhanced disclosure requirements. As a responsible enterprise, the Group actively implements various emission reduction measures and participates in climate action, aiming to optimize the Group's business and improve energy efficiency, thereby reducing pollutants and greenhouse gas emissions and contributing to mitigating climate change.

We have developed emergency plans for extreme weather, aimed at minimizing its impact on daily operations. In the event of typhoons and storms, all production work is suspended and some machines are transferred to designated places to reduce the damage to machines. To ensure raw materials supply is not suspended due to extreme weather in specific regions, we select suppliers from different regions. We will continue to pay attention to and assess the impact of climate change on the Group. Through these well-established policies, we are committed to managing carbon emissions, energy use and related risks, in order to reduce our impact on the environment. In addition, we actively foster environmental awareness among employees and encourage them to integrate sustainable practices into their daily work.

GOVERNANCE

The duties of the Board are set out in the section "Sustainable Governance Structure" of this Report. To ensure the effectiveness of its oversight, Board members endeavour to maintain adequate ESG knowledge and skills, and continuously enhance their professional capabilities by regularly participating in ESG- and climate-related training and by engaging external professional advisers. With respect to climate-related matters, the Board is required to hold at least one meeting each year specifically on climate issues, including setting targets for climate-related risks and opportunities and monitoring progress against them, so as to adjust strategies in a timely manner in response to climate change.

本集團深知氣候變化帶來的物理風險及轉型風險正重塑營運環境。不論是各種愈發頻繁及嚴重的自然災害，還是中國「雙碳」目標及港交所披露要求升級。因此，我們積極實行多項減排措施及參與氣候行動，務求優化集團業務及提高能源效益，從而減少污染物及溫室氣體排放，為緩和氣候變化作出貢獻。

我們對極端天氣制定緊急預案，旨在將其對日常運營的影響減至最低。在颱風及暴雨侵襲時，暫停所有生產工作並將部分機器轉移至指定地方，減少機器的損壞。為確保原材料不會因個別地區發生的極端天氣而暫停供應，我們揀選來自不同地區的供應商。我們將持續關注並評估氣候變化對本集團的影響。通過這些完善的政策，我們致力於管理碳排放、能源使用及相關風險，以減少對環境的影響。此外，我們積極培養員工的環保意識，鼓勵他們將可持續實踐融入日常工作。

管治

董事會的職責可參考本報「可持續發展管治架構」一節。為確保董事會的監督能力，董事會成員致力保持充足的環境、社會及管治知識與技能，並通過定期參與環境、社會及管治及氣候相關培訓及建立專業顧問機制，持續提升專業能力。對於氣候相關的議題，我們規定董事會每年至少一次就氣候相關問題進行會議，包括制定氣候相關風險及機遇的目標並監察其進展情況，以及時調整策略應對氣候變化。

METRICS AND TARGETS

The Group actively responds to China's "dual-carbon" targets and Hong Kong's "Climate Action Plan 2050", and encourages employees to actively conserve energy. Looking ahead, the Group has set a target internally to participate in at least one climate-related activity or initiative annually. Through close collaboration with various stakeholders, we will continue to actively support energy conservation and emission reduction efforts, implement carbon reduction measures, and jointly drive forward the decarbonization journey. We will continue to monitor progress towards this goal and, where necessary, seek support from professional advisers. During the Reporting Period, we participated in the Energy Saving Charter organised by the Environment and Ecology Bureau of Hong Kong, demonstrating our determination to reduce emissions and accelerate the transition to a low-carbon future.

指標及目標

During the Reporting Period, we have also engaged Riskory Consultancy Limited, a third-party ESG advisor with certified carbon auditors and carbon emission traders, to conduct carbon audits and assist us with carbon offsetting. The carbon offset project we have utilised is the Hebei ChengAn Biomass Cogeneration Project (Project ID: 3797) from the United Nations Clean Development Mechanism ("CDM"), which focuses on generating electricity by utilising local straw from cotton. The electricity generated from this project is sold to the Hebei Provincial Power Grid, replacing the capacity of coal-fired power plants.
