Lens Technology Co., Ltd.

Code: 300433 ISIN: CNE100001YW7

Founded	12/21/2006	Email	lsgf@hnlens.com
Listing	03/18/2015	Telephone	(+86)731-83285699
Website	www.hnlens.com	Fax	(+86)731-83285010
Domicile	Bio-pharmaceutical Park, Liuyang, Hunan	Office	Bio-pharmaceutical Park, Liuyang, Hunan

Business Summary (Updated: 08/22/2023)

Lens Technology is a leading supplier in global consumer electronics, provide solutions for appearance and functional components which used on smart terminal. We focus on R&D, production and sale of touch cover glass panel, while engages itself to the popularization and application of the new materials such as sapphire and ceramic on consumer electronics. We developing and manufacturing mold, special equipment, raw materials and technological process. Our products are widely used in mid-to-high end smart phones, tablets PC, laptops, smart wearable devices, digital cameras, players, GPS navigator, automobile instrument, intelligent home. Various famous brands in the word of consumer electronics industry are our customers. We take up 50% share in mid-to-high market.

Since the promotion and application of new technologies and new functions such as 5G communication technology and wireless charging have prompted new requirements for smart phone' s back-cover materials, non-metallic materials, represented by glass, will gradually replace metal materials like aluminum alloy used in mobile phone' s back cover, and smart phones with double-glass covers significantly increase, customers have a strong demand for our main products, and the demand is expected to grow remarkably in next few years. We have prepared production capacity for the increasing demand. In addition, we are engaged to developing the touch module and precision (fine) ceramics and cooperates with excellent enterprises in related fields for technology and production capacity. By integrating resources closely related to our main products, it will improve our one-stop service ability and status, prompt closer relationship with customers and open up new demand of downstream market to lay a foundation for developing new growth sources and profitability.,

Highlights (Updated: 08/22/2023)

Len Technology is the earliest companie engaged in the cover-glass manufacturing industry. Ms. Zhou Qunfei chairman of the board, has 29 years of industry experience and is the absolute technological leader in the industry. Lens Technology has significantly competitive advantage in the fields of technology and process, fast R&D and production capacity, independent R&D ability for special equipments, scale of production, quality management, and global high quality customers, setting a high threshold for competitors.

The production of cover glass characterizes in the high precision and difficulty of process. As the pioneer of this industry, Lens has mastered the core technologies and manufacturing know-how, and has been in possession of technologies and advantages. Lens Technology has been devoted to developing new technologies, new processes and new products by investing massive resources, and has a sophisticated, efficient and fast R&D and production capacity, with which Lens Technology can promptly respond to the demand for customized products. Lens Technology entrusts the equipment manufacturers abiding by the confidentiality agreement to provide equipments exclusively. Most of the fixtures, molds, and auxiliary materials used in production are made by Lens Technology. Large-scale production allows Lens to have a stable business operation, realize the scale effect and maintain the leading role of the industry and guarantee the continuous advancement of R&D and scientific and technological innovation. Lens Technology implements the quality standards required by customers and itself strictly, and improves product quality from all aspects, including but not limited to supplier' s choice, incoming material control, the production line quality monitoring, the product inspection. Years of hard working and development in the area of consumer electronics cover glass and functional components has gained stable and global customer resources with high qualities for Lens Technology.

Investment Risks (Updated: 08/22/2023)

The main risks which Lens Technology faced are the risks of gross margin decline, fluctuations in the market demand, increasing expenses on R&D, investments in new materials, technologies, products and equipments, high client concentration, investment project, intensifying competition in the industry and exchange rate fluctuations.
